Comments:

This past week-end 12,000 young people marched in Washington to close a coal plant there. Jim Hansen - a NASA engineer last year ~~tend~~ led a team that stated 350 ppm carbon dioxide is max to retain our earth as one similar to what ~~what~~ it was when life adapted. We are now at 387 ppm.

I am signed up for green power with Snapping Shoals. Last year I was refunded money because green power was not available.

Why build more coal if you can not provide paying customer green power? Build Green
