Comments:

My husband and I have owned 56 acres on the Ogeechee River in Southern Hancock County for 29 years. We moved to this beautiful place for the unpolluted air and water. I am deeply concerned about the effects of this project upon the water supply in this region. We already are in a serious drought. A few years ago ~~will~~ we had to drill a 400 foot well to find water. If this plant demands 13.8 gallons of water each day, I am worried about the effect upon my forest plots, not to mention my garden and the wild life that surrounds me.
