Company/Issue: Yellow Pine Air Quality Permit

(Please Print Clearly – May Use Back for Additional Comments)

Name Jonathan Parker, Registered Forester

Affiliation Southern Select Forestry Services, Inc.

Address

Phone #

Comments: Please consider the total effect of this plant in terms of "smoke" emmissions. This plant will greatly reduce outdoor burning & prescribe (control) fires. for forest management. The Forestry Commission can supply an idea of how many acres & type outdoor fire permits issued within 50 miles of plant site.

Because prescribe burning is only inexpensive way to manage unwanted vegetation, improve wildlife (manage certain ecosystems that require reduced woody understory), etc. a biomass market will improve air quality in my opinion.
