RECEIVED
MAY 28 2008
AIR PROTECTION BRANCH

Attention: James Capp

As a property owner and resident of Washington County I want to make your department aware that my family is against Plant Washington (GA Power).

We own 1,400 ac. near the plant site. There are four residents on this property. We have ponds, streams and wetlands. We have tried to keep the property natural for wildlife and green space. We moved here from Fulton County for the peace and quiet of the area; giving up better paying jobs. Since moving here the air quality has beome a greater problem. The area is a very dry area with alot of wells drying up the past few years. It is hard for us to belive DNR/EPD would even consider an application for a coal powered plant.

Most people in this county are afraid to speak up because it is run by a chosen few.

We are forming a group to make more people aware that this plant is not a

done deal until EPD approves it. Please make sure the public is informed of any meetings held by EPD. We are very concerned about the environmental impact of this coal powered plant.

Sincerely,

Patricia A. Daniel
