To be excavated as part of remedial action plan

Bold: Exceeds residential RRS

Qualifiers:

J	The associated numerical value is an estimated quantity.
B	Analyte present in the blank and the sample.
*	Spike recovery is equal to or outside the control criteria used.
P	> 40% difference for detected concentrations between two columns - changed from 25% per DOE SOW Rev. 4 (6/30/04)
D	Analytes analyzed at a secondary dilution.
E	Reported value is estimated because of the presence of interference.

To be excavated as part of remedial action plan

Bold: Exceeds residential RRS

Qualifiers:

J	The associated numerical value is an estimated quantity.
B	Analyte present in the blank and the sample.
*	Spike recovery is equal to or outside the control criteria used.
P	> 40% difference for detected concentrations between two columns - changed from 25% per DOE SOW Rev. 4 (6/30/04)
D	Analytes analyzed at a secondary dilution.
E	Reported value is estimated because of the presence of interference.

Qualifiers:

	To be excavated as part of remedial action plan
Bold:	**Exceeds residential RRS**
J	The associated numerical value is an estimated quantity.
B	Analyte present in the blank and the sample.
*	Spike recovery is equal to or outside the control criteria used.
P	> 40% difference for detected concentrations between two columns - changed from 25% per DOE SOW Rev. 4 (6/30/04)
D	Analytes analyzed at a secondary dilution.
E	Reported value is estimated because of the presence of interference.

To be excavated as part of remedial action plan

Bold: Exceeds residential RRS

Qualifiers:

J	The associated numerical value is an estimated quantity.
B	Analyte present in the blank and the sample.
*	Spike recovery is equal to or outside the control criteria used.
P	> 40% difference for detected concentrations between two columns - changed from 25% per DOE SOW Rev. 4 (6/30/04)
D	Analytes analyzed at a secondary dilution.
E	Reported value is estimated because of the presence of interference.

Table 4F Soil Data Outside Exposure Domains

CSX Exposure Domain	Date Sampled	Depth Range	1,2,3-Trichloropropane (mg/kg)	1,2-Dibromoethane (mg/kg)	4,4'-DDD (mg/kg)	4,4'-DDE (mg/kg)	4,4'-DDT (mg/kg)	4-Nitrophenol (mg/kg)	Aldrin (mg/kg)	alpha-BHC (mg/kg)	Arsenic (mg/kg)	Benzene (mg/kg)	beta-BHC (mg/kg)	Cadmium (mg/kg)	Chlordane (mg/kg)	Chlorobenzene (mg/kg)	Chlorpyrifos (mg/kg)	Copper (mg/kg)	Coumaphos (mg/kg)	Diazinon (mg/kg)	Dieldrin (mg/kg)	Dimethoate (mg/kg)	Disulfoton (mg/kg)

To be excavated as part of remedial action plan

Bold: Exceeds residential RRS

Qualifiers:

J	The associated numerical value is an estimated quantity.
B	Analyte present in the blank and the sample.
*	Spike recovery is equal to or outside the control criteria used.
P	> 40% difference for detected concentrations between two columns - changed from 25% per DOE SOW Rev. 4 (6/30/04)
D	Analytes analyzed at a secondary dilution.
E	Reported value is estimated because of the presence of interference.

Bold: Exceeds Residential RRS

* Average calculated where the maximum detected value exceeds the residential RRS and where frequency of detection > 5%.
1/2 the detection limit used for non-detect results.

** Evaluated further if maximum concentration exceed Residential RRS, there is more than one detect, and the detection frequency > 10%

APPENDIX F

INTERPOLATION AND AREA-AVERAGING TECHNIQUE EXAMPLE

INTERPOLATION AND AREA-AVERAGING TECHNIQUE EXAMPLE

Introduction

In order to determine whether or not the property can be certified to RRS, representative concentrations are compared to the selected cleanup criteria. Drexel has selected the Residential RRS as the cleanup criteria for certification. Although the VRP Act defines the representative concentration as an "average concentration," the 95% upper confidence limit (UCL) on the average concentration is more typically used in risk assessment to address potential uncertainties in the site characterization data and to ensure that exposures are not underestimated. The USEPA has developed a software tool called ProUCL specifically for computing these 95% UCL values (USEPA, 2007). However, the statistical models used for computing 95% UCL values are all based on the assumption that site data were generated following a random or systematic sampling strategy. In many cases, including the Drexel site, environmental samples are collected using a biased strategy in which many more samples are collected from areas of known or suspected contamination than from areas without contamination. In these situations, the USEPA acknowledges that it is appropriate to compensate for the sampling bias when computing the mean and the 95% UCL of the mean to avoid overestimating these parameters (USEPA, 2011).

Approaches for compensating for sampling bias typically involve the use of geospatial software tools that can interpolate concentrations such that all areas within an exposure domain contribute equally to the calculated representative concentration. Accordingly, Drexel has selected to use an interpolation method (using ArcGIS 3D Analyst software) to spatially interpolate constituent concentrations and then use ProUCL to determine the average concentration (95% UCL) of the interpolated data, which is referred to in this document as the "area-average." Accordingly, the area-averages will be compared to the cleanup criteria to determine whether or not each exposure domain can be certified to the cleanup criteria.

An interative approach was used to determine the remediation areas by looking at the distribution of different constituents in each depth interval for each exposure domain. In order to illustrate the process, what follows is a description of the interpolation and area-averaging technique using toxaphene as an example.

Interpolation

The first step in the process of determining the remedial action dimensions (depth and lateral extent) for the soils is to perform a spatial analysis of the concentration distribution of chemicals exceeding the RRS. Statistical interpolation can be applied to environmental data taking into consideration the spatial correlations among the data. By correlating distance and direction to the specific constituent concentration being interpolated, interpolation determines how the

constituent concentration at sampled points can be used to estimate the concentration across areas not sampled. ArcGIS 3DAnalyst was used for interpolating the data using the natural neighbor method. Once the concentrations have been interpolated across the exposure domains at each depth interval, the area-average can be computed.

For each depth interval, the average concentration of each constituent at each sample location in that depth interval was calculated. For non-detect results, one half the detection limit was used. [For example, at one hypothetical boring location in the 2-5ft interval there are two toxaphene results: 2mg/kg at 3ft and <1mg/kg at 5ft. The resulting average concentration for this boring for the 2-5ft depth interval would be (2mg/kg + 1/2(1mg/kg))/2 = 1.25 mg/kg.] The natural logarithms[4] of these concentrations were calculated and used as the input for the interpolation analysis. The data collected from the surface impoundments were excluded from this analysis as the surface impoundments are self-contained units and are being addressed separately.

3D Analyst was used to interpolate the concentrations of each constituent in each depth interval. Figures 1-4 show the toxaphene results for the 0-2ft, 2-5ft, 5-15ft, and greater than 15 ft depth intervals. The upper left image on each figure shows the average concentrations at each boring. The upper right image on each figure shows the results of the interpolation. The next step is to determine the area-average (which is shown on the lower left portion of the figures).

Determining Area-Average

Square cells 10x10ft in size were overlaid on the interpolated surface. The interpolated concentrations were then assigned to each 10x10ft cell, as shown on the lower left portion of Figures 1-4. The exponentials of these values were then calculated[5]. Next, the 95% UCL was calculated in ProUCL for each dataset (constituent/depth interval/exposure domain). The results for the interpolated 95% UCLs for toxaphene are shown below.

Area Averages (95% UCL based on Interpolation) for Toxaphene
Pre-Remedial Action

Exposure Domain	0-2ft (mg/kg)	2-5ft (mg/kg)	5-15ft (mg/kg)	>15 ft (mg/kg)
CSX	22	33	24	NC
Drexel East	4.1	2.1	7.9	0.35
Drexel West	NC	ND	NC	NC
North Swale	ND	ND	NA	NA
South Swale	3.1	ND	NA	NA

ND: Not-detected.
NC: Not calculated (maximum concentration is below the Residential RRS).
NA: Not analyzed. Samples not collected at these depth intervals.
Shading indicates area-averages that exceed the Residential RRS (10.88 mg/kg)

[4] Previous analysis completed for the VIRP indicated that the data is log normally distributed and that interpolating the natural log of the concentrations was the most appropriate means of interpolation.
[5] In some instances the results of the interpolation did not extend over the entire domain, thus a value of 0 was automatically assigned to the 10x10 cells outside the interpolation area. When the exponential of 0 is taken the result is a value of 1. However, as the RRS for many constituents is less than 1, a value of 1 does not accurately represent a non-detect condition. Thus, a value of 0 was assigned wherever there was an interpolated value of 0.

Based on the table above, toxaphene needs to be evaluated further in the 0-2ft, 2-5ft, and 5-15ft depth intervals in the CSX exposure domain.

Remediation Simulation

As mentioned above, for each depth interval within each exposure domain it was determined in an iterative fashion the extent of remedial action (excavation) that would result in post-remedial action area averages below the Residential RRSs. Data from the interpolation was exported for mapping in ArcView GIS. Here, remediation polygons were created that allowed for selective export of data outside the remediation polygons so that the area-weighted average concentration could be developed. To simulate excavation, it was determined which 10x10 cells fall within the excavation areas (polygons). These concentrations were then removed from the dataset and the 95% UCL was calculated for the remaining data (outside the excavation footprint). This post-processing of the data was conducted within each depth interval for each exposure domain (as necessary).

Three additional factors were important in determining the excavation areas. First, as described in the Ecological Remediation Plan (EPS 2012c), certain areas of the site require action to meet ecological goals. These ecological areas were incorporated into the overall excavation footprints. Second, CSX does not allow excavation within 12 ft of the centerline of the main rail line. Thus, this 12 foot corridor was designated as a "no-cut zone" and excavation areas were kept outside of this zone. Third, additional excavations (in addition to those indicated by the area-averaging/interpolation analysis) on CSX property were used to meet specific goals for CSX.

An example of this process using toxaphene is shown on Figures 1-3. The lower left hand image on these figures show the remedial action areas for each depth interval. These figures also show the 95% UCL both pre-remedial action and post-remedial action. This information is also summarized below for the CSX domain:

Depth Interval	Residential RRS	Pre-Remedial Action 95% UCL	Post-Remedial Action 95% UCL
0-2 ft	10.88 mg/kg	22 mg/kg	0.83 mg/kg
2-5 ft	10.88 mg/kg	33 mg/kg	2.9 mg/kg
5-15 ft	10.88 mg/kg	24 mg/kg	6.0 mg/kg

Table 5 of the Fifth Progress Report shows that the post-remedial action condition for all constituents in all exposure domains (with the exception of EDB in deep soils) meets the Residential RRS.

4 SOIL REMEDIATION

4.1 Delineation

In the June 19th, 2014 letter, the EPD concurred that the soil has been horizontally and vertically delineated.

4.2 First Phase Soil Remediation: Former Surface Impoundments

Drexel conducted remediation of former surface impoundments (SI) at the Site beginning in late November 2013. The Sixth Progress Report contained details concerning this remediation and provided documentation that this portion of the Site (the "Drexel West" exposure domain) is now in compliance with residential RRS. Figure 5 shows the different exposure domains. EPD (in the June 19, 2014 letter) concurs that the SI excavation is complete and that the Drexel West Exposure Domain is in compliance with residential RRS for soil.

Some of the soil excavated during this remediation had not been disposed of at the time of the Sixth Progress Report. Samples of the stockpiled soil from SI-5 failed for TCLP chlordane. Exotech conducted a treatability test on the soil to determine the feasibility of treating the soil such that it could be disposed of as non-hazardous. Five different chemical combinations (persulfate with iron activator, persulfate with sodium hydroxide activator, zero valent iron, calcium polysulfide, dithianite and zero valent iron with surfactant) were evaluated. Nearly all approaches resulted in a decrease in chlordane concentrations, with sodium persulfate and calcium polysulfide providing the greatest decreases (77-84% reduction). However, TCLP test results at the conclusion of the treatability test still failed for chlordane. Accordingly, the material (895.44 tons) was transported to Heritage Environmental Services for incineration. A copy of the invoice from Heritage is included as Appendix C.

4.3 Second Phase Soil Remediation: Rail Line Remediation

4.3.1 Actions Complete

EPD approved of the remedial plan for the remainder of the Site, but requested that confirmation samples be collected. A memorandum was submitted by EPS to the EPD on July 2, 2014 with the proposed sampling plan and how the data would be evaluated. A copy of this memorandum is included as Appendix D. EPD approved this plan in an e-mail dated July 2, 2014.

Sampling was conducted on July 23, 2014 in accordance with the plan. A Geoprobe rig was used to advance the two boring locations to a depth of 10 feet (ft). Figure 6 shows the locations of the two samples (B-110 and B-111). Samples from each location were collected at 1ft below ground surface (bgs) and 10ft bgs. All samples were analyzed for pesticides (SW8081B) and

RCRA metals (SW6010C and SW7471B). Samples were placed in laboratory-supplied containers, packed on ice and delivered to the laboratory for analysis.

The analytical results are summarized on Table 2 and the laboratory report is included as Appendix E. Table 2 shows a comparison of the analytical results for constituents detected above the residential soil RRS, to the maximum concentrations proposed to be left on-Site after the Phase 2 remediation (from Table 6B of the Fifth Progress Report). All of the results were below either the residential RRS or these maximum concentrations being left on-Site; therefore, no additional re-interpolation was required and the remediation plan presented in the Fifth Progress Report remains unchanged.

4.3.2 South Swale

In the June 16th, 2014 letter, the EPD requested that the demonstration of compliance of soil in the South Swale Exposure Domain include a comparison to the Ecological Remedial Goals (ERG). Accordingly, Table 6B from the Fifth Progress Report has been updated and is included as Table 3. This table shows the post-remediation concentrations in the South Swale domain compared to both the RRSs and the ERGs. The maximum concentrations to be left on-Site are below the ERGs.

4.3.3 Next Step

Conducting remediation work along a CSX rail line requires close coordination with CSX, including approval by CSX of both an excavation plan and a shoring plan. An excavation plan (based on the EPD-approved remediation plan) has been submitted to CSX for approval. Drexel has selected a shoring contractor who is working on the shoring design, which will be submitted to CSX for approval.

Once the designs have been approved, Drexel will request bids from multiple remediation contractors to conduct the rail line and drainage swale remediation work. The remediation is anticipated to begin in May-June 2015 to allow for the various approvals from CSX and to accommodate Drexel's production schedule.

Endrin ketone	(mg/kg)	<0.0038	<0.0041	<0.039	<0.38	<0.083		
gamma-BHC (Lindane)	(mg/kg)	<0.0019	<0.0021	<0.019	<0.19	<0.042		
gamma-Chlordane	(mg/kg)	<0.0019	<0.0021	<0.019	<0.19	<0.042		
Heptachlor	(mg/kg)	<0.0019	<0.0021	<0.019	<0.19	<0.042		
Heptachlor epoxide	(mg/kg)	<0.0019	<0.0021	<0.019	<0.19	<0.042		
Methoxychlor	(mg/kg)	<0.019	<0.021	<0.19	<1.9	<0.42		

Of the constituents that were detected, only one result was above it's residential RRS.
That result is below the highest concentration being left on-site in the Drexel East after the planned remediation.

EPS

Table 3. Comparison of Post-Remediation Values to Cleanup Criteria - South Swale Exposure Domain

Parameter	Human Health Cleanup Criteria			Ecological Cleanup Criteria		Pre-Remediation	Post-Remediation	
	Residential RRS (mg/kg)	Industrial SS RRS (mg/kg)	Industrial SB RRS (mg/kg)	Short-Tailed Shrew LOAEL RG (mg/kg)	American Robin LOAEL RG (mg/kg)	Maximum Detected Conc (mg/kg)	Maximum Detected Conc (mg/kg)	Interpolated 95% UCL (mg/kg)
South Swale 0-2 ft								
4,4'-DDD	19	47	47	97	58	74	5.3	
4,4'-DDE	14	38	38	39	25	19	1.3	
4,4'-DDT	20	54	54	26	17	273	0.22	
Arsenic	20	38	41	51	62	58	15	
Chlordane	9.2	9.2	9.2	33	52	57	**10**	0.27
Chlorpyrifos	15	94	94	112	105	690	ND	
Copper	915	2886	2886	1423	214	18100	16	
Dimethoate	0.7	0.7	0.7	705	38	8.0	ND

PHASE 1 – LABORATORY REPORTS

AES

ANALYTICAL ENVIRONMENTAL SERVICES, INC.

November 29, 2013

Timmerly Bullman
Environmental Planning Specialists, Inc.
1050 Crown Pointe Parkway, Suite 550
Atlanta GA 30338

TEL: (404) 315-9113
FAX: (404) 315-8509

RE: Drexel Chemical

Dear Timmerly Bullman: Order No: 1311I58

Analytical Environmental Services, Inc. received 12 samples on 11/22/2013 6:05:00 PM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Lab ID: 1311I58

Case Narrative

Antimony, arsenic, cadmium, chromium, copper, and lead were required for metals analysis per Timmerly Bullman via email on 11/22/2013.

Full list metals including mercury were required per Timmerly Bullman via email on 11/25/2013.

Pesticide Analysis by Method 8081B:

Due to sample matrix, samples 1311I58-001A, -002A, -004A, -008A, -011A and -012A required dilution during preparation resulting in elevated reporting limits.

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1311I58

Checklist completed by Adam B 11/22/13
Signature Date

Carrier name: FedEx __ UPS __ Courier __ Client ✓ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 3.2 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

RE: Drexel

Dear Timmerly Bullman: Order No: 1311I88

Analytical Environmental Services, Inc. received 5 samples on 11/23/2013 11:50:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Project: Drexel
Lab ID: 1311I88

Case Narrative

Volatile Organic Compounds Analysis by Method 8260B:

Acetone values for samples 1311I88-003A and -005A are "E" qualified indicating estimated values over linear calibration range. Samples were diluted and reanalyzed with the analyte being below the reporting limit.

Antimony, arsenic, cadmium, chromium, copper, and lead were required for metals analysis per Timmerly Bullman via email on 11/22/2013.

Full list metals including Hg were required per Timmerly Bullman via email on 11/25/2013.

Pesticide Analysis by Method 8081B:

Due to sample matrix, sample 1311I88-001D required dilution during analysis resulting in elevated reporting limits.

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1311I88

Checklist completed by Jam B 11/23/13
Signature Date

Carrier name: FedEx __ UPS __ Courier __ Client ✓ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 3.2° Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

FAX: (404) 315-8509

RE: Drexel Chemical Company

Dear Timmerly Bullman: Order No: 1312033

Analytical Environmental Services, Inc. received 5 samples on 12/3/2013 7:30:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Project: Drexel Chemical Company
Lab ID: 1312033

Case Narrative

Metals Analysis by Method 6010C:

Due to sample matrix, sample 1312033-002C and 003B required dilution during preparation and/or analysis resulting in elevated reporting limits.

Pesticide Analysis by Method 8081B:

Due to sample matrix, samples 1312033-002D and -004B required dilution during analysis resulting in elevated reporting limits.

Matrix spike and matrix spike duplicate analyses were not performed with Batch 184393 due to insufficient sample volume.

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1312033

Checklist completed by [signature] 12/3/13
Signature Date

Carrier name: FedEx ✓ UPS __ Courier __ Client __ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes ✓ No __ Not Present __

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 3.1 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted __ Yes ✓ No __

Water - pH acceptable upon receipt? Yes ✓ No __ Not Applicable __

Adjusted? _____ Checked by PT

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

FAX: (404) 315-8509

RE: Drexel Chemical Company

Dear Timmerly Bullman: Order No: 1312112

Analytical Environmental Services, Inc. received 4 samples on 12/4/2013 7:30:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Case Narrative

Metals Analysis by Method 6010C:

Due to sample matrix, samples 1312112-001A, -002A, and -003A required dilution during preparation and/or analysis resulting in elevated reporting limits for Thallium.

Sample ID "13337-SI20-CS4-8" was changed to "13337-SI20-CS7-11", "13337-SI20-CS5-8" was changed to "13337-SI20-CS8-11", and "13337-SI20-CS6-8" was changed to "13337-SI20-CS9-11" per Timmerly Bullman on 12/5/13 via email.

Pesticide Analysis by Method 8081B:

Due to sample matrix, samples 1312112-001B and -004A required dilution during analysis resulting in elevated reporting limits.

Qualifiers:

- * Value exceeds maximum contaminant level
- BRL Below reporting limit
- H Holding times for preparation or analysis exceeded
- N Analyte not NELAC certified
- B Analyte detected in the associated method blank
- > Greater than Result value
- E Estimated (value above quantitation range)
- S Spike Recovery outside limits due to matrix
- Narr See case narrative
- NC Not confirmed
- < Less than Result value
- J Estimated value detected below Reporting Limit

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1312112

Checklist completed by _____ 12/4/13
Signature Date

Carrier name: FedEx ✓ UPS __ Courier __ Client __ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes ✓ No __ Not Present __

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 3.0 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

FAX: (404) 315-8509

RE: Drexel Chemical Company

Dear Timmerly Bullman: Order No: 1312440

Analytical Environmental Services, Inc. received 2 samples on 12/6/2013 11:09:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1312440

Checklist completed by [signature] 12/6/13
Signature Date

Carrier name: FedEx __ UPS __ Courier __ Client ✓ ~~US~~ Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes ✓ No __ Not Present __

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 4.4 ✓ Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

FAX: (404) 315-8509

RE: Drexel Chemical Company

Dear Timmerly Bullman: Order No: 1312814

Analytical Environmental Services, Inc. received 1 samples on 12/10/2013 3:15:00 PM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1312814

Checklist completed by [signature] 12/10/13
Signature Date

Carrier name: FedEx __ UPS __ Courier __ Client ✓ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 3.0 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

FAX: (404) 315-8509

RE: Drexel

Dear Timmerly Bullman: Order No: 1401117

Analytical Environmental Services, Inc. received 6 samples on 1/3/2014 2:15:00 PM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Revision 2/18/2014

Sample/Cooler Receipt Checklist

Client EAS Work Order Number 1401117

Checklist completed by [signature] 11/3/14
Signature Date

Carrier name: FedEx __ UPS __ Courier __ Client ✓ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 3.1 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

RE: Drexel Chemical Company

Dear Timmerly Bullman: Order No: 1401B68

Analytical Environmental Services, Inc. received 6 samples on 1/17/2014 2:10:00 PM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1401868

Checklist completed by [signature] 1.17.14
Signature Date

Carrier name: FedEx __ UPS __ Courier __ Client ✓ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 3.2 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

RE: Drexel Chemical Company

Dear Timmerly Bullman: Order No: 1401E35

Analytical Environmental Services, Inc. received 3 samples on 1/22/2014 7:30:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1401E35

Checklist completed by _____ 1/22/14
Signature Date

Carrier name: FedEx ✓ UPS __ Courier __ Client __ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 3.1 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

TEL: (404) 315-9113
FAX: (404) 315-8509

RE: Drexel Chemical Company

Dear Timmerly Bullman: Order No: 1401G77

Analytical Environmental Services, Inc. received 3 samples on 1/24/2014 7:30:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1401G77

Checklist completed by Signature 1/24/14 Date

Carrier name: FedEx ✓ UPS __ Courier __ Client __ US Mail __ Other _____

Shipping container/cooler in good condition?	Yes ✓	No __	Not Present __
Custody seals intact on shipping container/cooler?	Yes __	No __	Not Present ✓
Custody seals intact on sample bottles?	Yes __	No __	Not Present ✓
Container/Temp Blank temperature in compliance? (4°C±2)*	Yes ✓	No __	

Cooler #1 3.2 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present?	Yes ✓	No __
Chain of custody signed when relinquished and received?	Yes ✓	No __
Chain of custody agrees with sample labels?	Yes ✓	No __
Samples in proper container/bottle?	Yes ✓	No __
Sample containers intact?	Yes ✓	No __
Sufficient sample volume for indicated test?	Yes ✓	No __
All samples received within holding time?	Yes ✓	No __
Was TAT marked on the COC?	Yes ✓	No __
Proceed with Standard TAT as per project history?	Yes __	No __ Not Applicable ✓
Water - VOA vials have zero headspace?	No VOA vials submitted ✓	Yes __ No __
Water - pH acceptable upon receipt?	Yes __	No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

TEL: (678) 714-8420
FAX: (678) 714-8425

RE: Drexel

Dear Dale Carpenter: Order No: 1311L31

Analytical Environmental Services, Inc. received 1 samples on 11/27/2013 8:30:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Case Narrative

Sample Receiving Nonconformance:

The samples were received at ambient temperature, outside required temperature range of 0-6°C. No ice or melted ice was present. We proceeded with the analysis per client history.

Sample/Cooler Receipt Checklist

Client A+O Work Order Number 1311L31

Checklist completed by _____ 11/27/13
Signature Date

Carrier name: FedEx __ UPS __ Courier __ Client ✓ US Mail __ Other _____

Shipping container/cooler in good condition? Yes __ No __ Not Present ✓

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes __ No ✓

Cooler #1 Amber Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

RE: Drexler Chemical Company

Dear Timmerly Bullman: Order No: 1312246

Analytical Environmental Services, Inc. received 1 samples on 12/3/2013 7:30:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

FAX: (404) 315-8509

RE: Drexel Chemical Company

Dear Timmerly Bullman: Order No: 1312112

Analytical Environmental Services, Inc. received 4 samples on 12/4/2013 7:30:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Case Narrative

Metals Analysis by Method 6010C:

Due to sample matrix, samples 1312112-001A, -002A, and -003A required dilution during preparation and/or analysis resulting in elevated reporting limits for Thallium.

Sample ID "13337-SI20-CS4-8" was changed to "13337-SI20-CS7-11", "13337-SI20-CS5-8" was changed to "13337-SI20-CS8-11", and "13337-SI20-CS6-8" was changed to "13337-SI20-CS9-11" per Timmerly Bullman on 12/5/13 via email.

Pesticide Analysis by Method 8081B:

Due to sample matrix, samples 1312112-001B and -004A required dilution during analysis resulting in elevated reporting limits.

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1312112

Checklist completed by _____ 12/4/13
Signature Date

Carrier name: FedEx ✓ UPS __ Courier __ Client __ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes ✓ No __ Not Present __

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 3.0 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

RE: Drexel

Dear Dale Carpenter: Order No: 1401118

Analytical Environmental Services, Inc. received 1 samples on January 3, 2014 2:15 pm for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Case Narrative

Pesticide Analysis by Method 1311/8081:

gamma-BHC and Chlordane values for the QC samples 1401118-001BMS-1 and MS-2 are "E" qualified indicating estimated values over linear calibration range due to the level of Chlordane present in the unspiked sample.

FAX: (404) 315-8509

RE: Drexel

Dear Timmerly Bullman: Order No: 1401777

Analytical Environmental Services, Inc. received 1 samples on 1/11/2014 11:30:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest
Project Manager

Lab ID: 1401777

Case Narrative

Samples labeled as "104101" were received but were not listed on the COC. The samples were placed on hold per Timmerly Bullman on 1/15/14.

Sample/Cooler Receipt Checklist

Client EPS Work Order Number 1401777

Checklist completed by Jason B. 1/13/14
Signature Date

Carrier name: FedEx ✓ UPS __ Courier __ Client __ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (4°C±2)* Yes ✓ No __

Cooler #1 3.2 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes __ No ✓

Chain of custody agrees with sample labels? Yes __ No ✓

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

RE: Drexel

Dear Dale Carpenter: Order No: 1401B65

Analytical Environmental Services, Inc. received 1 samples on January 17, 2014 2:00 pm for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

RE: Drexel Chemical Company

Dear Timmerly Bullman: Order No: 1401L53

Analytical Environmental Services, Inc. received 1 samples on 1/31/2014 1:00:00 PM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

FAX: (404) 315-8509

RE: Drexel Chemical Company

Dear Timmerly Bullman: Order No: 1401L55

Analytical Environmental Services, Inc. received 1 samples on 1/31/2014 1:00:00 PM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/13-06/30/14.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/15.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

James Forrest

APPENDIX K

PHASE 2 – LABORATORY REPORTS

State of Georgia
Department of Natural Resources
ENVIRONMENTAL PROTECTION DIVISION

SURFACE MINING PERMIT

Permit Number: **1251-99** Date Issued: **May 12, 1999**

Permittee: **Mr. Rann Folsom**
Folsom Construction Company
2281 Highway 41 South
Cordele, Georgia 31015

Operation: **Cedar Creek Borrow Area**

County: **Crisp** Permitted Acres: **13**

In accordance with the provisions of the Georgia Surface Mining Act of 1968, O.C.G.A. §12-4-70, et seq., and the Rules of the Georgia Department of Natural Resources, Chapter 391-3-3, Surface Mining, both as amended, this Permit is issued for the surface mining operation as recorded hereon and presented in the Application received on **February 23, 1999** and the Mining Land Use Plan approved on **March 22, 1999.**

This Permit is conditioned upon the Operator's continued compliance with the provisions of the Georgia Surface Mining Act of 1968, O.C.G.A. §12-4-70, et seq., and the Rules of the Georgia Department of Natural Resources, Chapter 391-3-3, Surface Mining, both as amended; the provisions of the Approved Surface Mining Land Use Plan and Approved Amendments, if any; and any special conditions which may be attached to this Permit.

This Permit shall be rendered null and void should the mining activity not commence within twelve (12) months from the date this Permit becomes final, or should cessation of mining occur for a period of eighteen (18) months without the Operator obtaining an inactive status classification through an Approved Amendment of the Surface Mining Land Use Plan.

FAMILY OF CURVES METHOD FOR DETERMINING MAXIMUM DENSITY OF SOILS

Client: Griffin Folsom Construction LLC **Date:** August 14, 2014

Project: - Cordele, Georgia **PT&E #:** 15693

Sample Description: Tan silty fine to medium sand **Test Spec: ASTM D** 698

Maximum Dry Density From Family of Curves: 108.5

Optimum Moisture Content From Family of Curves: 9.5

Date Sampled: 8-4-14

Sampled From: Jobsite

ONE POINT PROCTOR RESULTS

Wet Density: 115.2

Moisture Content: 6.5

Family of Curves Used: A

FAX: (404) 315-8509

RE: Drexel

Dear Timmerly Bullman: Order No: 1509774

Analytical Environmental Services, Inc. received 2 samples on 9/9/2015 2:48:00 PM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/15-06/30/16.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) Direct Examination, effective until 09/01/17.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Qualifiers:

- * Value exceeds maximum contaminant level
- BRL Below reporting limit
- H Holding times for preparation or analysis exceeded
- N Analyte not NELAC certified
- B Analyte detected in the associated method blank
- > Greater than Result value
- E Estimated (value above quantitation range)
- S Spike Recovery outside limits due to matrix
- Narr See case narrative
- NC Not confirmed
- < Less than Result value
- J Estimated value detected below Reporting Limit

Analytical Environmental Services, Inc.

Sample/Cooler Receipt Checklist

Client ERS Work Order Number 1509774

Checklist completed by _____ 9/9/15
Signature Date

Carrier name: FedEx __ UPS __ Courier __ Client ✓ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (0°≤6°C)* Yes ✓ No __

Cooler #1 3.2° Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted __ Yes ✓ No __

Water - pH acceptable upon receipt? Yes ✓ No __ Not Applicable __

Adjusted? _____ Checked by SB

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

FAX: (404) 315-8509

RE: Drexel

Dear Timmerly Bullman: Order No: 1511B76

Analytical Environmental Services, Inc. received 4 samples on 11/12/2015 9:35:00 AM for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.
AES' certifications are as follows:
-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/15-06/30/16.
-AIHA-LAP, LLC Laboratory ID: 100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) Direct Examination, effective until 09/01/17.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

Sample/Cooler Receipt Checklist

Client ERS Work Order Number 1511B76

Checklist completed by [signature] 11/12/15
Signature Date

Carrier name: FedEx ✓ UPS __ Courier __ Client __ US Mail __ Other _____

Shipping container/cooler in good condition? Yes ✓ No __ Not Present __

Custody seals intact on shipping container/cooler? Yes __ No __ Not Present ✓

Custody seals intact on sample bottles? Yes __ No __ Not Present ✓

Container/Temp Blank temperature in compliance? (0°≤6°C)* Yes ✓ No __

Cooler #1 3.6 Cooler #2 _____ Cooler #3 _____ Cooler #4 _____ Cooler#5 _____ Cooler #6 _____

Chain of custody present? Yes ✓ No __

Chain of custody signed when relinquished and received? Yes ✓ No __

Chain of custody agrees with sample labels? Yes ✓ No __

Samples in proper container/bottle? Yes ✓ No __

Sample containers intact? Yes ✓ No __

Sufficient sample volume for indicated test? Yes ✓ No __

All samples received within holding time? Yes ✓ No __

Was TAT marked on the COC? Yes ✓ No __

Proceed with Standard TAT as per project history? Yes __ No __ Not Applicable ✓

Water - VOA vials have zero headspace? No VOA vials submitted ✓ Yes __ No __

Water - pH acceptable upon receipt? Yes __ No __ Not Applicable ✓

Adjusted? _____ Checked by _____

Sample Condition: Good ✓ Other(Explain) _____

(For diffusive samples or AIHA lead) Is a known blank included? Yes __ No ✓

See Case Narrative for resolution of the Non-Conformance.

* Samples do not have to comply with the given range for certain parameters.

3 REPORTING 4

1 INTRODUCTION

The Drexel Chemical Company facility located at 120 Cape Road in Cordele, Georgia (Tax Parcel No. 040 031, the "Property") will be meeting the requirements of the Georgia Environmental Protection Division ("EPD") approved Remediation Plan[1] under the Voluntary Remediation Program ("VRP") by using engineering and institutional controls. The institutional controls implemented will be an Environmental Covenant that provides for implementation of this Monitoring and Maintenance (M&M) Plan. The Remediation Plan outlined the engineering controls consisting of a groundwater treatment system that would be implemented at the Property and a schedule for a monitoring program of both the treatment system and groundwater. This M&M Plan formalizes the operation and monitoring of the treatment system, groundwater monitoring, and reporting requirements. The purpose of the groundwater treatment system and monitoring program is to address and assess the presence of 1,2-dibromoethane (EDB) in groundwater at the Property.

[1] The Final Remediation Plan was presented in the Fifth Progress Report in December 2013. The plan was approved by the EPD in a letter dated June 19, 2014.

2 GROUNDWATER REMEDIATION AND MONITORING

2.1 Groundwater Remediation

2.1.1 Treatment System Description

A groundwater treatment system began operation on April 13, 2016 following extensive soil remediation by excavation at the Property. The treatment system consists of an extraction well (EW-1) from which groundwater is pumped that then flows through two carbon steel tanks in series. The carbon steel tanks each contain 500 lb of virgin coconut shell carbon (a.k.a. Granular Activated Carbon, "GAC"). The treated water is stored in a 30,000 gallon storage tank for on-demand non-potable (e.g. not to be used for drinking, cooking or other human consumption) use by the facility. The water may be used for sinks, toilets, washing, etc.

Upon completion of one year (12 months) of groundwater treatment, if EDB concentrations have met the Residential RRS (0.09 ppb of EDB), Drexel may discontinue use of the groundwater treatment system. If after two years (24 months) the concentration of EDB has not significantly improved and it appears that it is unrealistic that the goal of meeting the Residential RRS will be achieved, Drexel may discontinue use of the groundwater treatment system.

2.1.2 Treatment System Monitoring

The treatment system will be monitored per the Remediation Plan. Water samples will be collected from the influent (groundwater extracted from EW-1) to and effluent from the treatment system. The water samples will be analyzed for EDB. This monitoring will occur on the following schedule per the Remediation Plan:

- Weekly for one month (beginning April 13, 2016), then
- Biweekly for two months, then
- Monthly for nine months, then
- Semi-annually until the treatment system is no longer in operation.

2.2 Groundwater Monitoring

The groundwater monitoring program will involve sampling the wells that are located in the area of highest groundwater EDB concentrations (BW-1, BW-6-1 and EW-1) and wells downgradient of this area (BW-2, BW-5 and Well D). Figure 1 shows the locations of these wells. The samples collected from these wells will be analyzed for EDB. As mentioned in Section 2.1, groundwater

collected from the extraction well (EW-1) will be analyzed at least semi-annually. The other wells (BW-1, BW-2, BW-5, BW-6-1 and Well D) will be analyzed annually. Sampling of EW-1 has already begun per the schedule outlined in Section 2.1. The first annual monitoring event will be conducted before the end of December, 2016.

2.3 Maintenance

The treatment system will be maintained in good order while it is operational. If it appears that the GAC has become "spent," then the GAC in the vessels will be replaced. The groundwater monitoring wells (locks, wells, well labels, well pad etc.) will be kept in good order and be promptly repaired as needed.

2.4 Well Decommissioning

Once the treatment system is no longer in operation, the groundwater monitoring program will cease. At that time, the wells will be properly decommissioned.

3 REPORTING

Annually (by December 31 of each year), Drexel will submit an Annual Report to the EPD. This report will contain the following:

- Certification that the groundwater at the Property is not being used for potable use
- Any analytical results from the treatment system and groundwater monitoring program (if collected).

Example language for the Annual Report is as follows:

> _____ is the current owner of the Property. The Environmental Covenant for the Property, recorded on ____, requires that the current Property owner certify annually that the Activity and Use Limitations in the Covenant are being abided by. _____ certifies that, in the past twelve months:
>
> 1. There has been no use or extraction of groundwater beneath the Property for potable use.
> 2. The Monitoring and Maintenance Plan has been followed. A description of the actions that have taken place during this year and associated analytical results are attached.

APPENDIX N

DRAFT ENVIRONMENTAL COVENANT

After Recording Return to:
Georgia Environmental Protection Division
2 Martin Luther King Jr. Drive, SW
Suite 1054
Atlanta, Georgia 30334

Environmental Covenant

This instrument is an Environmental Covenant executed pursuant to the Georgia Uniform Environmental Covenants Act, O.C.G.A. § 44-16-1, *et seq.* This Environmental Covenant subjects the Property identified below to the activity and/or use limitations specified hereinbelow. The effective date of this Environmental Covenant shall be the date upon which a fully executed original of this Environmental Covenant has been recorded in the deed records maintained by the Clerk of the Superior Court of Crisp County, Georgia in accordance with O.C.G.A. § 44-16-8(a).

Fee Owner of Property/Grantor:
Drexel Chemical Company
P.O. Box 13327
Memphis, Tennessee 38113-0327
Attn: Leigh Shockey, CEO

Grantee/Holder:
Drexel Chemical Company
P.O. Box 13327
Memphis, Tennessee 38113-0327
Attn: Leigh Shockey, CEO

Grantee/Entity with express power to enforce:
State of Georgia
Department of Natural Resources
Environmental Protection Division ("EPD")
2 Martin Luther King Jr. Drive, SE
Suite 1054 East Tower
Atlanta, Georgia 30334

Property:

The property subject to this Environmental Covenant (hereinafter "Property") consists of two (2) tracts of land, consisting of approximately 6.829 acres and located in Land Lot 87, 11th Land District of Crisp County, Georgia. A complete legal description of the Property is attached hereto as Exhibit A and a map of the area is attached hereto as Exhibit B.

Tax Parcel Number:

040 031 of Crisp County, Georgia.

Name and Location of Administrative Records:

The corrective action at the Property that is the subject of this Environmental Covenant is described in the following document[s]:

- Voluntary Remediation Program Application dated February, 2011
- First Progress Report dated October 2011
- Second Progress Report dated April 2012
- Third Progress Report October 2012
- Fourth Progress Report dated April 2013
- Fifth Progress Report (containing the Final Remediation Plan) dated December 2013
- Sixth Progress Report dated April 2014
- Seventh Progress Report dated October 2014
- Eighth Progress Report dated April 2015
- Ninth Progress Report dated November 2015
- Voluntary Remediation Program Compliance Status Report dated June, 2016
- Monitoring and Maintenance Plan dated June, 2016

These documents are available at the following locations:

Georgia Environmental Protection Division
Response and Remediation Program
2 Martin Luther King Jr. Drive, SE, Suite 1054 East Tower
Atlanta, Georgia 30334
M-F 8:00 AM to 4:30 PM excluding state holidays

Description of Contamination and Corrective Action:

This Property has been designated as needing corrective action due to the presence of hazardous wastes, hazardous constituents or hazardous substances regulated under state law. Contact the property owner or the Georgia Environmental Protection Division for further information concerning this Property. This notice is provided in compliance with the Georgia Hazardous Site Response Act.

This Environmental Covenant is made pursuant to the Georgia Uniform Environmental Covenants Act, O.C.G.A. § 44-16-1 *et seq.* by Grantor against the Property and in favor of Drexel Chemical Company as Grantee/Holder and EPD as Grantee/Entity with express power to enforce the covenants set forth herein, and burdens and runs with the Property and is binding on the Grantor, the Grantees, and their respective successors and assigns. This Environmental Covenant is required because of the presence of various constituents in soil and groundwater related to pesticide manufacturing including 1,2-Dibromoethane, 4,4'-DDD, 4,4'-DDT, alpha-BHC, Arsenic, beta-BHC, Cadmium, Chlordane, Chromium, Cyclohexane, delta-BHC, Dichloromethane (Methylene chloride), Disulfoton, Endosulfan sulfate, Endrin Aldehyde, Ethyl benzene, gamma-BHC (Lindane), Heptachlor, Isopropylbenzene, Lead, Malathion, Methyl parathion, Mevinphos, o-Xylene, Selenium, Thallium, Toxaphene. These constituents are "regulated substances" as defined under the Georgia Hazardous Site Response Act, O.C.G.A. § 12-8-90 *et seq.*, and the rules promulgated thereunder (hereinafter "HSRA" and "Rules", respectively). The Corrective Action consists of engineering controls (groundwater treatment and monitoring specified in EPD approved Monitoring and Maintenance Plan); and institutional controls (limitation on use of the

Property) to protect human health and the environment. Accordingly, this Environmental Covenant imposes such limitations upon the use of the Property.

Grantor hereby declares that the uses to which the Property may be put shall be restricted as expressly set forth below under "Activity and/or Use Limitations," and such covenant shall run with the land and be binding upon Grantor, its successors and assigns in title to the land; further, Grantor hereby grants to Grantee/Holder and EPD the express right and power to enforce said Activity and/or Use Limitations, together with such other rights as are expressly set forth herein in favor of such parties. EPD shall have full right of enforcement of the rights conveyed under this Environmental Covenant pursuant to HSRA, O.C.G.A. § 12-8-90 *et seq.*, and the rules promulgated thereunder. Failure to timely enforce compliance with this Environmental Covenant or the Activity and/or Use Limitations contained herein by any person or entity shall not bar subsequent enforcement by such person or entity and shall not be deemed a waiver of the person's or entity's right to take action to enforce any non-compliance. Nothing in this Environmental Covenant shall restrict EPD from excising any authority under applicable law.

Grantor makes the following declaration as to limitations, restrictions, and uses to which the Property may be put and specifies that such declaration: (i) shall constitute covenants to run with the land, pursuant to O.C.G.A. § 44-16-5(a); (ii) is perpetual, unless modified or terminated pursuant to the terms of this Environmental Covenant and pursuant to O.C.G.A. § 44-16-9; and (iii) shall be binding on all parties and all persons claiming under or through Grantor, including all current and future owners of any portion of or interest in the Property (hereinafter "Owner"). Should a transfer or sale of the Property or any interest therein occur before such time as this Environmental Covenant has been amended or revoked, then this Environmental Covenant shall be binding on the transferee(s) or purchaser(s).

This Environmental Covenant shall inure to the benefit of Grantee/Holder, EPD, and their respective successors and assigns and shall be enforceable by the Director of EPD ("Director") or his agents or assigns, as well as Grantee/Holder or its successors and assigns, and other party(ies) as provided for in O.C.G.A. § 44-16-11 in a court of competent jurisdiction.

Activity and/or Use Limitation(s)

1. Registry. Pursuant to O.C.G.A. § 44-16-12, this Environmental Covenant and any amendment or termination thereof may be contained in EPD's registry for environmental covenants.

2. Notice. The Owner of the Property must give thirty (30) days' advance written notice to EPD of the Owner's intent to convey any interest in the Property. No conveyance of title, easement, lease, or other interest in the Property shall be consummated by the Owner without adequate and complete provision for continued monitoring, operation, and maintenance of the Corrective Action. The Owner of the Property must also give thirty (30) days' advance written notice to EPD of the Owner's intent to change the use of the Property, apply for a building permit that would impact any remaining soil contamination, or propose any major site work that would affect the Property.

3. Notice of Limitation in Future Conveyances. Each instrument hereafter conveying an interest in the Property subject to this Environmental Covenant shall contain a notice of the activity and use limitations set forth in this Environmental Covenant and shall provide the recorded location of the Environmental Covenant.

4. Periodic Reporting. Annually, by no later than December 31 following the effective date of this Environmental Covenant, the Owner shall submit to EPD an Annual Report as specified in the EPD approved Monitoring & Maintenance Plan including but not limited to documentation stating whether or not the activity and use limitations in this Environmental Covenant are being abided by.

5. Activity and Use Limitation(s).

(a). Change in Use of the Property. If the exposure domain used for area averaging exceeds the potential development sites for residential home construction, the properties shall be reevaluated.

(b). Groundwater Limitation. The use or extraction of untreated groundwater beneath the Property for drinking water or for any other use shall be prohibited until HSRA regulated substances are treated to below the applicable RRS for groundwater. Any extracted groundwater from the Property that is treated may be used for non-potable purposes.

(c). Groundwater Monitoring. The Owner shall sample and analyze the wells at the Property as specified in the EPD approved Monitoring and Maintenance Plan.

(d). Management of Soil. Soil excavated from below fifteen (15) feet at the area designated in Figure 1 as containing EDB, shall not be used as fill material at any on-site or off-site location.

6. Right of Access. In addition to any rights already possessed by EPD and/or Grantee/Holder, the Owner shall allow authorized representatives of EPD and Grantee/Holder the right to enter the Property at reasonable times for the purpose of determining compliance with this Environmental Covenant.

7. Recording of Environmental Covenant and Proof of Notification. Within thirty (30) days after the date of the Director's signature, the Owner shall file this Environmental Covenant with the Clerk of the Crisp County Superior Court, and send a file stamped copy of this Environmental Covenant to EPD within thirty (30) days after recording (subject to Owner's receipt of such copy from the Clerk within such time period).

8. Termination or Modification. The Environmental Covenant shall remain in full force and effect in accordance with O.C.G.A. § 44-5-60, unless and until the Director determines that the Property is in compliance with the Type 1, 2, 3, or 4 Risk Reduction Standards, as defined in Rules Section 391-3-19-.07, whereupon this Environmental Covenant may be amended or revoked in accordance with Section 391-3-19-08(7) of the Rules and O.C.G.A. § 44-16-1 *et seq.* This Environmental Covenant may also be modified upon approval of the Director.

9. Severability. If any provision of this Environmental Covenant is found to be unenforceable in any respect, the validity, legality, and enforceability of the remaining provisions shall not in any way be affected or impaired.

10. No Property Interest Created in EPD. This Environmental Covenant does not in any way create any interest in favor of EPD in the Property that is subject to the Environmental Covenant, it being acknowledged and agreed that EPD's interest is limited to that of a third party with right of enforcement. Furthermore, the act of approving this Environmental Covenant does not in any way create any interest in favor of EPD in the Property in accordance with O.C.G.A. § 44-16-3(b).

Representations and Warranties.

Grantor hereby represents and warrants to the other signatories hereto:

a) That the Grantor has the power and authority to enter into this Environmental Covenant, to grant the rights and interests herein provided and to carry out all obligations hereunder;

b) That the Grantor is the sole owner of the Property and holds fee simple title which is free, clear and unencumbered except as set forth on Exhibit A, attached hereto and incorporated herein by reference;
c) That to Grantor's knowledge, the Grantor has identified all other parties that hold any interest (e.g., encumbrance) in the Property and notified such parties of the Grantor's intention to enter into this Environmental Covenant;
d) That to Grantor's knowledge, this Environmental Covenant will not materially violate, contravene, or constitute a material default under any other agreement, document or instrument to which Grantor is a party, by which Grantor may be bound or affected;
e) That the Grantor has served (1) Grantee/Holder, (2) each person holding a recorded interest in the Property subject to this covenant, (3) each person in possession of the real property subject to this covenant, (4) each municipality, county, consolidated government, or other unit of local government in which real property subject to the covenant is located, and (5) each owner in fee simple whose property abuts the Property subject to this Environmental Covenant with an identical copy of this Environmental Covenant in accordance with O.C.G.A. § 44-16-4(d).
f) That to Grantor's knowledge, this Environmental Covenant will not materially violate or contravene any zoning law or other law regulating use of the Property; and
g) That to Grantor's knowledge, this Environmental Covenant does not authorize a use of the Property that is otherwise prohibited by a recorded instrument that has priority over this Environmental Covenant.

Notices.

Any document or communication required to be sent pursuant to the terms of this Environmental Covenant shall be sent to the following persons:
