Comments:

I support the building of Plant Washington. Georgia needs jobs. Georgia needs power. We do need to make sure that the plant is built by Georgia construction workers. It also needs to be run by Georgians.

Comments:

I fully support the building of Plant Washington above Sandersville. The plant will:

- provide energy that is needed for the State of Georgia to be attractive to outside companies.
- provide jobs for Washington and surrounding counties.
- increase the tax base for Washington County
- provide an alternative industrial base in the county so the County can be successful.

As a lifelong resident and former science teacher, I am a strong proponent of the plant and have no concerns for my safety, the safety of my children, or the safety of our county's natural resources.

Comments:

I am a citizen of Washington County for 10 years. My family + I love this community. We support the Coal Plant. I believe that Power 4 Georgia has done an outstanding job representing the facts to the community. The plant is vital to our community's growth in terms of economic development + clean energy. I further believe that the EPD need to listen the citizens of this community + not to people who are not from here + no nothing of our plight + our situation.

Email levans@sandersvilletech.edu

Comments: I am in favor of the building of Plant Washington

1. Jobs for the area - now at over 15% unemployment
2. Reasonable Costs for energy
3. Increase in tax base

but more important -

If the E.P.D. determines that the plant will produce energy safely then I have confidence in their research, knowledge, experience and they won't approve of the process if was hazardous to our area.

Comments:

I support this power plant by Power 4 GA in Washington County. The reduced-cost electricity/power and new jobs will greatly support the due economic needs of this area.
