Dear Ms. Abrams,

The United Association of Plumbers and Pipefitters Local Union 72 and our environmental consultant, William Research recently sent your agencies letters commenting on the Plant Washington's applications for water withdrawals, a drinking water system, an air permit, and a waste water discharge permit. Plant Washington representatives have recently contacted us and have said that those comments distorted the environmental impacts from their proposed facility and contained inaccuracies.

We would like to withdraw those comments so that we can more carefully evaluate the contentions made in those comments, and consider whether Plant Washington's concerns are warranted.

We reserve the right to submit further comments on this project if we learn the facility will in fact cause unnecessary environmental impacts.

Sincerely,

Richard L. Oliver  
Business Manager
