Subject: Application No. 20161, Dated January 7, 2011  
Chambers R&B Landfill, AIRS No: 01100014  
Application For a Landfill Gas-To-Energy Facility

Dear Ms. Jenkins,

Waste Management Inc (WM) is currently preparing a response to the letter from Georgia Environmental Protection Division (GAEPD) dated March 25, 2011 regarding the above referenced application. We are nearly complete with our formal response, but due to travel plans of key personnel, we respectfully request a one week extension in the deadline for the response, to allow submittal by May 20, 2011.

The GAEPD letter identifies the fact that the Toxic Impact Analysis and the Class I and Class II NSR Air Impact Analysis had not been submitted as of March 25, 2011, and requested that these portions of the application be submitted as soon as possible. Since the preparation of the analysis is dependent upon the concurrence from GAEPD regarding the emissions factors presented in the application, it is the intent of WM that the analysis will be completed only after GAEPD and WM have agreed upon the appropriate emissions factors. To conduct this analysis prior to establishment of these factors could result in the analysis of emissions that are later changed and thus resulting in an unnecessary expenditure of effort by both WM in preparing the analysis and GAEPD in reviewing the analysis.

We anticipate that the Toxic Impact Analysis and the Class I and Class II NSR Air Impact Analysis would be completed and submitted within 30 days of final acceptance by GAEPD of these emissions factors.

Please advise if you concur with the approach.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tim Bassett', written over a horizontal line.

Tim Bassett
