Stakeholder Meeting on EPA's Carbon Pollution Emission Guidelines for Existing Stationary Sources: Electric Utility Generating Units

January 14, 2015

Stakeholder meeting to discuss "Developing Georgia's State Plan"

The Georgia Environmental Protection Division (EPD) Air Protection Branch will hold a stakeholder meeting on January 14, 2015 to discuss US Environmental Protection Agency's (US EPA) *Carbon Pollution Emission Guidelines for Existing Stationary Sources: Electric Utility Generating Units; Proposed Rule*, also called EPA's Clean Power Plan. EPA proposed the emission guidelines for states to follow in developing plans to address greenhouse gas emissions from existing fossil fuel-fired electric generating units. Specifically, the EPA is proposing state-specific rate-based goals for carbon dioxide emissions from the power sector, as well as guidelines for states to follow in developing plans (called "111(d) plans") to achieve the state-specific goals. EPA expects to finalize the emission guidelines in June 2015.

To register for the stakeholder meeting click the following link –
