Clean Energy not Coal

Dear Energy Leader,

AIR PROTECTION BRANCH

I urge you to end the role that you currently have in the construction of a new coal-fired power plant in Washington County. Given the high cost of building and operating a new coal plant and their harmful effects on our air and water, this plant is not the best option to meet energy needs for Georgia or Washington County residents. Through a combination of energy efficiency initiatives and homegrown renewable energy sources such as biomass, wind, and solar power, Georgia can meet future energy demands without building costly and polluting coal plants.

Sincerely,
