Re: June 2016 Semi-Annual Voluntary Remediation Program Progress Report
Manchester Tank Company, HSI No. 10765
811 West Avenue
Cedartown, Polk County, Georgia
Tax Parcel 024-014

Dear Mr. Schiff:

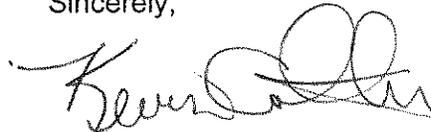

The Georgia Environmental Protection Division (EPD) has reviewed the above referenced document which has been submitted for the former Manchester Tank Company site.

EPD has no comments on this document at this time and acknowledges the slippage in the project schedule due to the difficulty in obtaining access for the offsite groundwater treatment system and the need for a second phase of the pre-design investigation.

Please continue to submit Semi-Annual VRP Progress Reports as described in the VRP. EPD anticipates receipt of the next Semi-Annual VRP Progress Report by December 2, 2016. EPD understands that the draft Consent Order will be finalized once access issues are resolved for the site. Please let us know if EPD can further support efforts in obtaining access.

If you have any questions, please contact Robin Futch PG of the Response and Remediation Program at (404) 657-8686.

Sincerely,

Kevin Collins
Unit Coordinator
Response and Remediation Program
