

Changes Made to the 2014 List of Waters after the Draft List was put on Public Notice

Reach ID/Reach Name	Reach Location/Reach County	Reach Basin	Water Type	Change Since Public Notice
R030701060402/ Altamaha River	ITT Rayonier to Penholoway Creek/ Wayne	Altamaha	Stream	Based on comments received, the “notes” section of the report was updated to better reflect why the water has been placed in Category 3.
R031300030102/ Rocky Branch	Tributary to the Chattahoochee River – Columbus/ Muscogee	Chattahoochee	Stream	Based upon a reevaluation of the data, fecal coliform was removed as an impairment and the water was returned to Category 1 (Supporting) which is the category it was in the 2012.
R031501050208/ Coosa River	Rome to Beach Creek/ Floyd	Coosa	Stream	The draft list contained a note that the fecal coliform impairment was caused by urban runoff. Since fecal coliform was removed as an impairment in 2014, this note has been removed since it is no longer relevant.
R031501050511/ Alpine Creek	Headwaters to Stateline/ Chattooga	Coosa	Stream	The notes section of the list was updated to clarify that the possible sources of impairment for dissolved oxygen included nonpoint source and municipal discharge.
R031501020505/ Little Scarecorn Creek	Headwaters to Talking Rock Creek/ Pickens	Coosa	Stream	The “priority” column in the draft 2014 list showed that the TMDL for Bio M would be drafted in 2014, but the “notes” section indicated that it would be drafted in 2013. In order to fix this discrepancy, the “notes” section was updated to reflect that this TMDL would be drafted in 2014.
R060200020508/ Ivylog Creek	Tributary to Lake Nottely/ Union	Tennessee	Stream	The “priority” column in the draft 2014 list showed that the TMDL for Bio M would be drafted in 2014, but the “notes” section indicated that it would be drafted in 2013. In order to fix this discrepancy, the “notes” section was updated to reflect that this TMDL would be drafted in 2014.
