

STATE OF GEORGIA
TMDL IMPLEMENTATION PLAN
OCMULGEE RIVER BASIN

Prepared by
The Georgia Department of Natural Resources
Environmental Protection Division
Atlanta, GA

TMDL Implementation Plans are not required for these segments:

Waterbody Name	Stream Location	Pollutant
1. Little Shellstone Creek	Headwaters to Shellstone Creek	Bio(Sediments)
2. Ocmulgee River	Beaverdam Creek to Walnut Creek	FC
3. Ocmulgee River	House Creek to Altamaha River	FCG(Hg)
4. South River	Atlanta to Flakes Mill Road	FCG(PCBs)
5. South River	Flakes Mill Road to Pole Bridge Creek	FCG(PCBs)
6. South River	Pole Bridge Creek to Hwy. 20	FCG(PCBs)
7. Stone Mountain Lake	Stone Mountain Park (DeKalb County)	FCG(Hg)
8. Tributary to Tobesofkee Creek	Barnesville	Toxicity
9. Yellow River	Centerville Creek (Hwy 124) to Hammock Creek	FC

INTRODUCTION

TMDL implementation plans are not required for the preceding segments because Georgia Environmental Protection Division (Georgia EPD) has delisted them.

DELISTED SEGMENTS

EPA requires Georgia EPD to demonstrate good cause for not including streams that were previously listed on the Section 303(d) list. Good cause includes, but is not limited to, more recent and accurate data, more sophisticated water quality modeling, flaws in the original analysis that led to the waterbody being listed or changes in conditions, for example, new control equipment, or elimination of discharges. In the Draft 2002 Section 303(d) listing proposal Georgia EPD submitted good cause justification to EPA to delist the stream segments listed below from its 2002 Section 303(d) list.

Georgia EPD delisted stream segments using methodology from the Water Quality in Georgia 1998-99 Report (305(b) report), Appendix A, and USEPA document Guidance for 303(b) listing. In considering all the data on the affected segments EPD concluded that water quality is being met and removed them from the 2002 Section 303(d) list.
