Dr. Carol A. Couch
Director, Georgia Environmental Protection Division
Georgia Department of Natural Resources
2 Martin Luther King Jr. Drive
Suite 1152 East Tower
Atlanta, Georgia 30334

Dear Dr. Couch,

I want to register my full support for Power4Georgians' proposed development of Plant Washington in Washington County. I am a resident of Washington County and an adjoining property owner to the site selected for this facility. And I am thrilled by the opportunity Plant Washington represents for our local community.

I have attended numerous public meetings hosted by Power4Georgians and their project engineers to discuss the plant and I am confident that they have a solid plan for producing affordable electricity with minimal environmental impact.

In addition, Plant Washington will create well paying local jobs which are sorely needed in our community. Plant Washington will also dramatically improve our local tax base, providing Washington County with better schools, roads, public safety, health care and other infrastructure benefits well into the future.

Plant Washington is a win-win for our community on so many levels. That is why Plant Washington has such strong support locally. People realize that a project like Plant Washington represents a once in a lifetime opportunity for Washington County.

I am hopeful that EPD will approve the permits necessary to allow Plant Washington to move forward so that we can continue to grow our community in a positive manner.

Sincerely,

Benjie R Tarbutton
