Hi Rosendo,
Sorry for not replying. I did get it. I have not had the chance to review your questions properly. On item #3, no response was received from EPA. Not sure if they will ever respond. I will check internally about the policy to send live Excel spreadsheets - should be able to do it.

Have a good weekend,
Sal

Sal,

I sent you the email below a couple of days ago. I'm just making sure you received it.

Thanks,

Rosendo.

Sal,

I'm reviewing the modeling section of Effingham County Power Plant's PSD application and I have a few questions and requests. I'll appreciate your assistance with the following:

- 1- Table 2-9 with emissions estimates for HAPs is missing.
- 2- Table 5-1 with measured ozone concentrations. Please provide the source of this data. These values don't match the data available at GA EPD for this monitoring site.
- 3- Regarding the use of the PVMRM method for modeling NO₂, has EPA responded to your May/06/2010 letter? I'm interested in any comments you might have received from EPA about the use of this modeling approach.
- 4- Please provide me with the excel files containing tables 6-2, 6-3, 6-5, 6-6, 6-7, and 6-12. I have to verify all the calculations as part of the application review process, and having the Excel files will expedite this process. Otherwise I would have to do the calculations myself and it would take me longer.

Thank you.

Rosendo.
