

NOTICE OF THE OPPORTUNITY FOR PUBLIC COMMENT

GEORGIA DEPARTMENT OF NATURAL RESOURCES
ENVIRONMENTAL PROTECTION DIVISION
AIR PROTECTION BRANCH

STATE OF GEORGIA

COUNTY OF FLOYD

NOTICE OF PSD PRELIMINARY DETERMINATION AND DRAFT PART 70 OPERATING PERMIT MODIFICATION

To All Interested Parties:

The Georgia Environmental Protection Division (EPD) announces its intent to modify Part 70 Air Quality Operating Permit No. 2631-115-0021-V-02-0 issued to Temple – Inland (Rome Linerboard Mill) by the issuance of Prevention of Significant Deterioration (PSD) Permit Amendment No. 2631-115-0021-V-02-1. The facility is located at 238 Mays Bridge Road, Rome, Georgia. The facility operates an unbleached Kraft linerboard mill.

The primary purpose of this permit amendment is to allow physical modifications to the Recovery Furnace and the Linerboard Machines. The Recovery Boiler will undergo general repairs and tube replacement and the Linerboard Machines will have equipment changes to allow the facility to produce linerboard at the currently permitted level on a consistent basis. The Georgia Environmental Protection Division is preparing Title V Operating Permits in accordance with Title V of the Clean Air Act. This permit amendment will be enforceable by the Georgia EPD, the U.S. Environmental Protection Agency (EPA), and other persons as otherwise authorized by law.

The draft permit, PSD Preliminary Determination, and all information used to develop the draft permit are available for review. This includes the application and all other relevant materials available to the permitting authority. This information is available for review at the office of the Air Protection Branch, 4244 International Parkway, Atlanta Tradeport - Suite 120, Atlanta, Georgia 30354. A copy of the application may also be available for review at the office of the Floyd County Clerk, Floyd County Administrative Building, 12 East 4th Avenue, Suite 209, Rome, Georgia 30162 (Telephone: 706-291-5110), along with a copy of the draft permit and PSD Preliminary Determination. Electronic files of the application, draft Title V permit, PSD Preliminary Determination will be available at our internet site <http://www.georgiaair.org/airpermit> by selecting " PSD/112(g)/NAA-NSR/PCP Permits" on the menu. (Please note that the Internet is generally accessible from most public libraries in Georgia and at the Air Protection Branch office listed above.)

If copies are desired, a copying machine for public use is provided by EPD at the Atlanta Air Protection Branch office. The first 25 copies are free of charge and every page thereafter costs \$0.10 per page. Copies will be made on a first-come, first-served basis. Files are available for review and copying 8:30 a.m. to 4:00 p.m., Monday – Friday, excluding holidays.

You are hereby notified of the opportunity to submit written public comments concerning the draft Part 70 Operating Permit Modification and the Preliminary Determination concerning the modification. The Preliminary Determination is a summary of the technical review of the application and contains a copy of the Company's application along with supporting documents and the draft Permit Amendment. The draft permit serves as both a draft PSD permit and a draft Part 70 permit amendment. Persons wishing to comment on the draft Part 70 Operating Permit Modification and Preliminary Determination are invited to submit their comments, in writing, to EPD at the Atlanta address above, postmarked no later than 30 days after the date of publication in the newspaper. All comments postmarked on or prior to that date will be considered by the Division in making its final decision on the permit.

The Division has concluded that Temple – Inland’s application should be approved and that a permit should be granted. This conclusion is based upon evidence that the proposed project will comply with the Division's Rules and Regulations for Air Quality Control, Chapter 391-3-1; that the emissions from the source will not cause or add to a violation of any applicable National Ambient Air Quality Standard (NAAQS) or Prevention of Significant Deterioration (PSD) increment; and will comply with the Federal PSD regulations, 40 CFR 52.21, including the use of Best Available Control Technology (BACT) for regulated pollutants.

Net emission increases of PM_{2.5}, NO_x, CO, SO₂, lead, fluorides, sulfuric acid mist from the proposed project do not exceed the significant emission levels established by the PSD regulation. The net emission increases of PM₁₀, VOC, TRS, and H₂S from the proposed project exceed the significant emission levels established by the PSD regulation. The Division has determined that these emissions will not cause an adverse impact on ambient air quality, and the air quality levels should pose no significant health risk around the plant.

The project annual and 24-hour concentrations for PM₁₀ were lower than the Class II Area significance levels; therefore, the project did not require PSD increment modeling and no percentages of PSD increment consumption were calculated.

It was determined that the project did not require a Class I Area analysis.

Any requests for a public hearing must be made in writing within the 30-day public comment period. Such requests should specify in detail the portion of the Air Quality Control Rules which the individual believes may not have been adequately reviewed. A public hearing may be held if the Director of the EPD finds that such a hearing would assist the EPD in a proper review of the facility’s capability to comply with the requirements of Federal and State Air Quality Control regulations. State laws specify that a permit shall be issued on evidence satisfactory to the Director of compliance with applicable State and Federal regulations and requirements.

Following the 30 day public comment period, as required by PSD and Part 70 regulations, a proposed amendment, incorporating any changes that result from comments received during the public comment period, will be made available to U.S. EPA and affected states. In accordance with Part 70 regulations, EPA Region 4 has a 45-day period in which to review this proposed permit amendment. Information pertaining to U.S. EPA’s review period can be found on their website at www.epa.gov/region4/air/permits.

After the comment period has expired, the EPD will consider all comments, make any necessary changes, and issue the Part 70 Operating Permit and a Final Determination. Copies of the final Title V Operating Permit, Final Determination, comments received, EPD’s responses to comments, and any other relevant information will then be made available for public review during normal business hours at the office of the Air Protection Branch, as well as at the Internet addresses given above.

For additional information, contact James Capp, Program Manager, Stationary Source Permitting Program, at the Atlanta address, or by phone at 404/363-7000. Please refer to this notice when requesting information.
