

Compilation of Stakeholder Questions

Question	Response Provided
Do these rules increase annual fees that I pay now?	No, they do not increase annual emission fees. They will only impact stakeholders that apply for permit changes or new permits.
Please confirm that there will be no fee associated with Title V renewals or off-permit changes.	There is no fee for a TV renewal or for off-permit change requests.
How much will the application fees be?	See pre-proposal changes to the Fee Manual.
Are fees required for a NPR letter?	No, fees are not required for a NPR letter.
How does expedited permit application fees factor into APB funding projections?	We did factor in the expedited permit application fee when we did the projections. We collected about 250,000 dollars per year in expedited permit application fee. We have accounted that. Sakina will also discuss this when she talks about projections. We assumed that going into the future, we will continue to get that 250,000 dollars per year in expedited permit application fees. We assume that it will remain the same in the future.
When and if you receive comments from stakeholders, does EPD plan to respond to these written comments? And can EPD post the responses on its website or copy them back to the stakeholder group?	<p>On the pre-proposal, we will share the comments that we receive; we do expect some of the comments to be procedural or typographical error and clarifications.</p> <p>Note: No comments were received other than the questions asked prior to and during the stakeholder meeting.</p>
Can you explain the March 1st application fee start date? What is the thinking behind that date?	We recognized that we are going to have emission reduction and sharp decline in fee revenue. We have been building reserve, and we tried to put off adding additional fees as long as possible. We selected that date because we felt that was the longest we can reasonably wait to implement the permit application fee.
