Comments:

I am a lifelong resident of Washington County, and owner of land adjacent to the proposed plant site. I whole-heartedly support this project. I trust EPD and other regulatory agencies to do their jobs, holding this applicant, as others, to the applicable laws and regulations.

Georgia needs more generating capacity. This plant will be the cleanest coal-fired capacity in Georgia. Washington County, by and large, is very receptive to this type of heavy industry, and is desirous of the significant investment and jobs.

I ask that you do your jobs dispassionately, and not be swayed by a vocal, yet very small minority, mostly of non-residents, who have nothing at stake in the future of our community.
