Honorable Patrick Crews
Chairman, Troup County Board of Commissioners
100 Ridley Avenue
LaGrange, GA 30240

Re: Troup County Board of Commissioners
Troup County C&D Landfill
Troup County – Permit Number 141-023D (SL)

Dear Commissioner Crews:

Your application for a Solid Waste Handling Permit, including the necessary supplemental data for your operation, has been reviewed and approved.

Your permit, No. 141-023D (SL), is attached and includes conditions and limitations for your operation.

Personnel of the Environmental Protection Division will make periodic inspections of your operations. These inspections will be discussed with you or your personnel.

This permit is now in effect; however, under Georgia Law it is subject to appeal for thirty (30) days following issuance and is subject to modification or possible vacation if appealed. Should an appeal be received within the thirty (30) day appeals period, you will be immediately notified and further construction or operation under this permit may not be undertaken until such time as the appeals process is concluded.

If you have any questions or need more information, please contact Keith Stevens at (404) 362-2539 or via e-mail at Keith.Stevens@dnr.ga.gov.

Sincerely,

A handwritten signature in cursive script that reads "William Cook".

William Cook
Manager
Solid Waste Management Program

cc: James Emery, Troup County Engineer
John Sayer, EPD
Keith Stevens, EPD

PERMIT NO.: 141-023D(SL)

ISSUANCE DATE: 11/16/2020

GEORGIA

DEPARTMENT OF NATURAL RESOURCES

ENVIRONMENTAL PROTECTION DIVISION

LAND PROTECTION BRANCH

Solid Waste Handling Permit

Permittee Name: **Troup County Board of Commissioners**

Facility Address: **174 Parmer Road
LaGrange, Georgia 30240**

In accordance with the provisions of the Georgia Comprehensive Solid Waste Management Act, and the Rules promulgated pursuant thereto, this permit is issued for the following operation:

**Troup County Municipal Solid Waste Landfill, SR109, Mountville Phase 2;
located at the southwest boundary of the county's landfill off SR109 approximately
1 mile southwest of Mountville in Troup County.
(Latitude 33°1'57.62", Longitude -84°54'21.96").**

This permit is conditioned upon the permittee complying with the attached conditions of operation, which are hereby made a part of this permit.

All statements and supporting data submitted to the Environmental Protection Division of the Department of Natural Resources have been evaluated, considered and relied upon in the issuance of this permit.

This permit is now in effect; however, under Georgia law it is subject to appeal for 30 days following issuance, and is subject to modification or revocation on evidence of noncompliance with any provision of the Act or of the Rules promulgated pursuant thereto; or with any representation made in the above mentioned application or the statements and supporting data entered therein or attached thereto; or with any condition of this permit.

Richard E. Dunn, Director
Environmental Protection Division

1. All previous solid waste handling permits and permit modifications are hereby superseded.
2. The disposal facility shall be operated on only under the direct supervision of an operator duly certified in accordance with Rule 391-3-4-.18.
3. The Design and Operational Plan submitted by the Permittee and approved by the Division on November 12, 2020, for this facility is hereby made a part of this permit and the facility shall be operated in accordance with the Plan. Conditions of this permit supersede any provisions of the plan which may conflict.
4. No putrescible wastes shall be disposed of at this facility. Only construction/demolition waste, inert waste, and yard trimmings may be accepted at the facility. Regulated quantities of hazardous wastes shall not be accepted.
5. Solid waste unloading shall be restricted to the working face of the operation in such a manner that waste may be easily incorporated into the landfill with available equipment.
6. A uniform compacted layer of clean earth cover no less than one (1) foot in depth shall be placed over all exposed construction and demolition waste material at least monthly. Should the waste disposed be found to cause odors or be attractive to disease vectors or birds then daily cover shall be applied in accordance with rule 391-3-4-.07(3)(e).
7. A uniform compacted layer of clean earth cover not less than one (1) foot in depth shall be placed over each portion of any intermediate lift following completion of that lift.
8. A uniform compacted layer of clean earth cover not less than two (2) feet in depth shall be placed over the final lift no later than one month following the establishment of final grades. The final cover shall be consistent with the final cover system delineated in the approved facility Design and Operational Plan.
9. All-weather access roads shall be provided to the disposal facility and provisions shall be made for prompt equipment repair or replacement when needed.
10. Access to the landfill shall be limited to authorized entrances, which shall be closed when the facility is not in operation.
11. Signs shall be posted at the entrance to the facility stating the days and hours of operation and the type of material accepted for disposal.
12. The facility shall be graded and drained to minimize runoff onto the landfill surface, to prevent erosion, and to drain water from the surface of the landfill.
13. Site survey control shall be provided and maintained to insure compliance with the approved Design and Operational Plan.

14. Erosion and sediment control devices shall be installed and maintained as necessary to control all surface water runoff from disturbed areas.
15. Operations shall be conducted at all times in such a manner as to prevent air, land, and water pollution and to prevent public health hazards.
16. Scattering of wastes by wind shall be controlled by fencing or other barriers, and the entire facility shall be policed daily.
17. Regulated quantities of hazardous waste shall not be disposed of at this facility.
18. Suitable measures to control fires that may start shall be provided. Stockpiled soil is considered to be the most satisfactory firefighting material.
19. The Permittee shall fully satisfy all applicable financial responsibility requirements for closure and post-closure care in accordance with Solid Waste Rule 391-3-4-.13. If a funded trust is used to satisfy financial responsibility requirements for this site, at no point shall the area of the disposal facility that has received waste and has not been closed exceed that area which could be properly closed using the funds available in the trust. The pay in period for annual trust fund payments shall be the lesser of the remaining design life of the facility or remaining capacity, as reported in accordance with Solid Waste Rule 391-3-4-.17.
20. The landfill shall be closed in accordance with Rule 391-3-4-.11 and the closure plan included in the approved Design and Operation Plan.
21. A minimum 50-foot undisturbed buffer shall be maintained between the waste disposal area and all wetlands, as defined by the U.S. Army Corps of Engineers, unless evidence is provided to the Director by the Permittee that the use of wetlands has been permitted under all applicable state and federal laws and rules. The owner or operator must also place a demonstration of compliance in the operating record and notify the Director that it has been placed in the operating record.
22. The Permittee shall compile and submit quarterly reports of all solid waste disposed at the facility no later than the 30th day after the beginning of each calendar quarter in accordance with Solid Waste Rule 391-3-4-.17(1).
23. Prior to receipt of waste, the Division shall be provided with written certification, by a professional engineer licensed to practice in Georgia, that a newly constructed cell or phase has been completed in accordance with the permit. Unless notified by the Division within 15 days of receipt by the Division of the written certification, the facility owner or operator may commence disposal of solid waste.
24. The Permittee shall record and retain in the operating records at or near the facility the record keeping requirements of Solid Waste Rule 391-3-4-.07(3)(u).

25. In accordance with O.C.G.A. 12-8-39(a) and (b), the Permittee shall provide a mechanism to collect a cost reimbursement fee upon each ton or the volume equivalent of a ton of waste received at the disposal facility regardless of its source. A minimum of \$1.00 per ton or volume equivalent of the cost reimbursement fee shall be paid into a local restricted account and shall be used for solid waste management purposes only.
26. In accordance with O.C.G.A. 12-8-39(e), the Permittee shall assess and collect on behalf of the EPD from each disposer of waste a surcharge per ton of solid waste disposed. Surcharges assessed and collected shall be due to the Environmental Protection Division on the first day of July of each year.
27. The Permittee shall comply with all other applicable state and local laws, rules, and ordinances.
28. Coverage under this permit may automatically terminate unless construction of the Construction and Demolition disposal area has commenced within three hundred sixty-five (365) days and completed within seven hundred thirty (730) days from the effective date.
