

STATUS OF CLEANUP ACTIVITIES:

Cleanup activities are being conducted for source materials, soil, and groundwater.

CLEANUP PRIORITY: The Director has designated this site as a Class IV

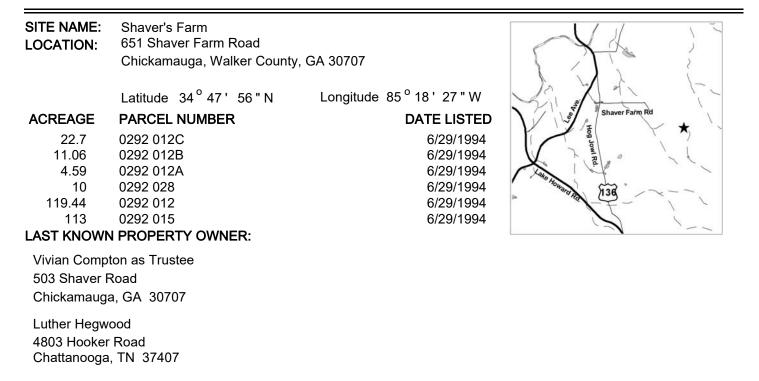

GA EPD DIRECTOR'S DETERMINATION REGARDING CORRECTIVE ACTION:

The Director has determined that this site requires corrective action.

REGULATED SUBSTANCES RELEASED, AND THREATS TO HUMAN HEALTH AND ENVIRONMENT POSED BY THE RELEASE:

This site has a known release of Carbon tetrachloride in groundwater at levels exceeding the reportable quantity. No human exposure via drinking water is suspected from this release. The nearest drinking water well is between 0.5 and 1 miles from the area affected by the release.

Substance Name	GW Soil	Substance Name	GW Soil
1,1,1,2-Tetrachloroethane		1,1,2-Trichloroethane

Cleanup activities are being conducted for source materials, soil, and groundwater.

CLEANUP PRIORITY: The Director has designated this site as a Class I

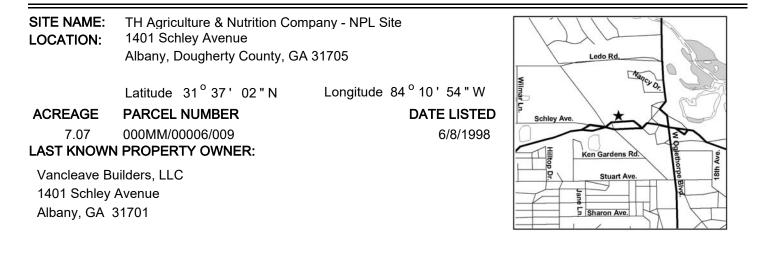

GA EPD DIRECTOR'S DETERMINATION REGARDING CORRECTIVE ACTION:

The Director has determined that this site requires corrective action.

REGULATED SUBSTANCES RELEASED, AND THREATS TO HUMAN HEALTH AND ENVIRONMENT POSED BY THE RELEASE:

This site has a known release of Mercury in groundwater at levels exceeding the reportable quantity. No human exposure via drinking water is suspected from this release. The nearest drinking water well is between 0.5 and 1 miles from the area affected by the release.

This site has a known release of PCBs in soil at levels exceeding the reportable quantity. This site has limited access. The nearest resident individual is between 1001 and 3000 feet from the area affected by the release.

Releases of Mercury and PCBs at this site have caused bioaccumulation in fish and shellfish that has resulted in the need to recommend that human consumption be limited. A cleanup and investigation have been initiated at this site, pursuant to a CERCLA 106 removal order issued by USEPA. The site is listed on the National Priority List.

STATUS OF CLEANUP ACTIVITIES:

Hazardous Site Response Act cleanup levels have been met for source materials and soil. Identified responsible parties are unable or unwilling to conduct the required investigation and/or cleanup under the Hazardous Site Response Act for groundwater. EPD may perform these actions using state funding from the Hazardous Waste Trust Fund and may lien the property or pursue cost recovery.

CLEANUP PRIORITY: The Director has designated this site as a Class I

GA EPD DIRECTOR'S DETERMINATION REGARDING CORRECTIVE ACTION:

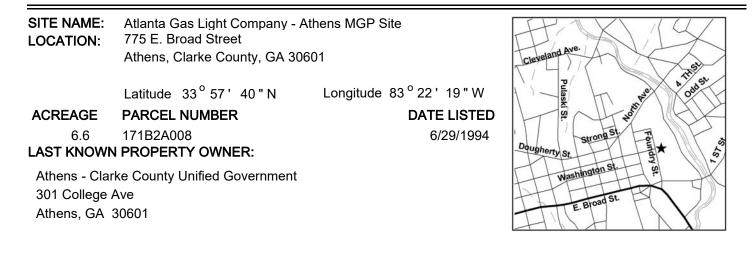

The Director has determined that this site requires corrective action.

REGULATED SUBSTANCES RELEASED, AND THREATS TO HUMAN HEALTH AND ENVIRONMENT POSED BY THE RELEASE:

This site has a known release of Tetrachloroethene in groundwater at levels exceeding the reportable quantity. No human exposure via drinking water is suspected from this release. The nearest drinking water well is between 0.5 and 1 miles from the area affected by the release.

Substance Name	GW Soil	Substance Name	GW Soil
