

Tire Products Grant

Spalding County

FY25 Awardee

Spalding County was awarded \$80,115 to replace Sunny Side Community Park's walking trail. A total of 7.8 tons of tire-derived products were used in this project.

The previous walking trail was deteriorating which posed safety hazards.

The walking trail plays a vital role for the local community. The new surface improves accessibility for elders and others with mobility issues, increases durability for high foot traffic, and improves safety by providing a smooth walking surface.
