RE: Draft Site Limitations for ADRS Services
4830 Ogeechee Road, Savannah - Chatham County, Georgia
Proposed Material Recovery Facility

Dear Mr. Shurling:

The Solid Waste Management Program of the Environmental Protection Division (EPD) has completed its review of the January 3, 2020 Site Assessment Report letter, and January 3, 2020 Specific Development Plan prepared by Maupin Engineering. These documents can be accessed on the EPD web page at <https://epd.georgia.gov/public-announcements-0/land-protection-branch-public-announcements>.

Based on the data submitted, EPD has drafted "Site Limitations" which would form the basis for design of the proposed material recovery facility in a manner that complies with *Georgia's Rules for Solid Waste Management*. A copy of these is attached.

Comments on the proposed facility's site suitability report and the draft "Site Limitations" are welcome. However, if EPD is to consider such comments prior to determining if a Site Suitability Notice is warranted for this facility, they must be received prior to July 6, 2020. Please note that issuance of a Site Suitability Notice by EPD does not constitute a permitting decision for the proposed facility and comments regarding siting issues may be considered up to the time a final permitting decision is made.

Please feel free to contact Jim Guentert at 404-362-2556 if you have any questions.

Sincerely,

Charles J. Mueller, Chief
Land Protection Branch

Proposed Solid Waste Handling Facility
June 3, 2020
Page 1 of 1

1. The area considered for acceptability includes only the 55.8-acre parcel shown on *Sheet C3, Proposed Boundaries*, dated 1/3/2020, of Maupin Engineering's Specific Development Plan. Solid waste recover and processing operations shall be restricted to the 9.2-acre parcel, identified as "existing cleared facility" on *Sheet C1, Site Plan*, dated 1/3/2020 of Maupin Engineering's Specific Development Plan.
2. Solid waste handling operations shall not be conducted in any wetlands, as defined by the US Corps of Engineers, unless evidence is provided to the Director, by the applicant, that use of such wetlands has been permitted or otherwise authorized under all other applicable state and federal law and rules. A statement certifying that wetlands will not be impacted as a result of construction activities at the site shall be submitted. This statement shall be signed and stamped by the professional engineer responsible for the Design and Operational Plan for the subject site. Wetland areas shall be delineated on the Design and Operational Plan.
3. The facility shall not restrict the flow of the 100-year flood, reduce the temporary water storage capacity of the floodplain, or result in a washout of solid waste or material so as to pose a hazard to human health and the environment.
