Hello,

The NPS Regional Haze team has been working to review the draft Florida and North Carolina Regional Haze SIPs. We have several overarching concerns and recommendations that we think are likely to carry across the VISTAS states. We have pulled the attached documentation together and shared it with Florida and North Carolina contacts on Friday (5/14). We look forward to continuing discussions with each of the VISTAS states as SIP development continues. As always, please reach out if you have questions or concerns. Also, please forward this along to anyone I may have missed.

Best,
Melanie
