Re: Voluntary Remediation Progress Report No. 3  
Former Automatic Sprinkler Site, HSI #10268  
Swainsboro, Emanuel County, GA  
Tax Parcel ID S12 005

Dear Mr. Janeczek:

The Georgia Environmental Protection Division (EPD) has received the August 14, 2013 *Voluntary Remediation Program Status Report No. 3* (August 2013 Report), that has been submitted pursuant to the Georgia Voluntary Remediation Program Act (the Act) O.C.G.A. 12-8-100, by AMEC on behalf of Scott Technologies, Inc. (STI). After completing its review of the referenced document, EPD has provided the following comments:

- 1) According to the August 2013 Report, non-aqueous phase liquid was identified in monitoring well MW-10 during the June 2013 sampling event. A sample was collected and analyzed for volatile organic compounds (VOCs) using USEPA method 8260B. The August 2013 Report indicated that the presence of the oily substance in MW-10 would continue to be evaluated. Please ensure that this continued evaluation includes a comprehensive groundwater and waste characterization analysis, excluding the already completed VOC analysis, for this monitoring well during the next scheduled monitoring event.

EPD has placed the August 2013 Progress Report in the HSI #10268 facility file for public review. Should you have any question or concerns regarding this site, please contact Mr. Kevin Collins of the Response and Remediation Program at (404) 463-0530.

Sincerely,

David Brownlee  
Unit Coordinator  
Response and Remediation Program

c: Andy Riley, Emanuel County Joint Development Authority
