RE: Fifth Semi-Annual VIRP Progress Report, April 11, 2016.
Columbia County Car Care Center, HSI No. 10394
4014 Washington Road, Martinez, Columbia County, Georgia

Dear Dr. Singh:

The Georgia Environmental Protection Division (EPD) has reviewed the Columbia County Car Care Center's (5C) Fifth Semi-Annual Voluntary Investigation and Remediation Plan (VIRP) Progress Report dated April 11, 2016. EPD's comments are provided below and should be addressed in accordance with the Voluntary and Remediation Program Act (the Act).

- 1) EPD requests the completions of one more groundwater sampling event for wells MW-11D and PMW-1 to verify that the current site conditions have met Type 2/4 risk reduction standards (RRS). The reason for EPD's request is due to the laboratory results of the July 2, 2014 duplicate sample for PMW-1 indicating a tetrachloroethylene concentration (6.0 ug/L) above the Type 1 RRS, and the lack of two consecutive results for MW-11D below Type 1 RRS for PCE. In addition, contaminated soils remain in place in the area where PMW-1 and MW-11D are located.
- 2) As a result of contaminated soils still in place, EPD will require that 5C implement a Uniform Environmental Covenant (UEC) for their property. A UEC should be developed for the affected parcel as part of the final remedy. This UEC should include the following Activity Use and Limitations: 1.) restrictions on the use or extraction of groundwater beneath the Property for drinking water or for any other non-remedial purposes; 2.) the requirement that a vapor intrusion model be developed and submitted to EPD before any building reconstruction can occur; 3.) prior to conducting construction or subsurface utility work that may result in exposure to soil or groundwater in the designated areas, a worker must have appropriate HAZWOPER training per OSHA's Hazardous Waste Operations and Emergency Response Standard 29 CFR 1910.120; and 4.) submittal of annual Site Use, Activity and Monitoring inspections that certify that the asphalt is still in place and in good condition and certification of non-residential use of the Property.

5C must address these comments to EPD's satisfaction in order to demonstrate compliance with the provisions, purposes, standards and policies of the Act. EPD may, at its sole discretion, review and comment on documents submitted by 5C. However, failure of EPD to respond to a submittal within any timeframe does not relieve 5C from complying with the provisions, purposes, standards and policies of the Act.

Columbia County Car Care Center, HSI No. 10394

Please submit a compliance status report (CSR), certifying RRS for both soil and groundwater, that also addresses the above comments, by March 15, 2017. A draft of the UEC may be submitted with or prior to the CSR submittal for EPD's review and comment.

If you have any questions, please contact Montague McPherson of the Response and Remediation Program at (404) 657-8600.

Sincerely,

Kevin Collins
Unit Coordinator
Response and Remediation Program
