RE: Request for Variance under the Provisions of O.C.G.A. § 12-7-6(b)(17)
City of Brunswick MS4 Maintenance
Brunswick, Glynn County
File: CMV-063-23-03

Dear Mr. Alberson:

The Georgia Environmental Protection Division's Watershed Protection Branch has reviewed your buffer variance application for the subject project. The review was conducted to consider the potential impacts of the proposed project's encroachment on State waters within the context of the Georgia Erosion and Sedimentation Act. This review, and the variance granted herein, is limited to only the request(s) in the buffer variance application for permission to conduct land-disturbing activities within 25-foot buffer along coastal marshlands as measured horizontally from the coastal marshland-upland interface in accordance with the Coastal Marshlands Protection Act.

Pursuant to Ga. Comp. R. and Regs. 391-3-7-.11(2)(a), authorization is hereby granted to encroach within the 25-foot buffer adjacent to State waters as delineated in your revised application dated January 7, 2022. ***Buffer impacts authorized by this variance must be completed within five years of the date of this approval letter. If the approved buffer impacts cannot be completed prior to the expiration date, a time extension must be requested in writing at least 90 calendar days prior to the expiration date with justifiable cause demonstrated.***

Authorization for the above referenced project is subject to the following conditions:

- 1) All graded slopes 3:1 or greater must be hydroseeded and covered with Georgia DOT approved wood fiber matting or coconut fiber matting. If not hydroseeded, Georgia DOT approved matting that has been incorporated with seed and fertilizer must be used. All slopes must be properly protected until a permanent vegetative stand is established;
- 2) The amount of land cleared during construction must be kept to a minimum;
- 3) All disturbed areas must be seeded, fertilized and mulched as soon as the final grade is achieved. Also, these disturbed areas must be protected until permanent vegetation is established;

- 4) A double row of Georgia DOT type "C" silt fence or an approved high performance silt fence must be installed between the land disturbing activities and State waters where appropriate; and
- 5) The applicant must provide yearly progress reports containing detailed documentation of buffer disturbances associated with this project.

The granting of this approval does not relieve you of any obligation or responsibility for complying with the provisions of any other law or regulations of any federal, local or additional State authority, nor does it obligate any of the aforementioned to permit this project if they do not concur with its concept of development/control.

If you have questions concerning this letter, please contact Brian Kent, CPESC, Erosion and Sedimentation Control Unit, Nonpoint Source Program, at (470) 604-9419.

Sincerely,

Jeffrey W. Cown
Director
