April 30, 2024  
Notice Close Date

CMV-063-24-01  
Control Number

Hawkins Island Retaining Wall  
(GPS Coordinates: 31.1958, -81.4000)

Activity

This notice is issued to inform the public of a receipt of an application for a variance submitted pursuant to a state environmental Law. The public is invited to comment during the 30-day period on the proposed activity. Site plans are available for review and are located in the following EPD office: Watershed Protection Branch File Room, 2 MLK Jr. Drive, SW, West Tower, Balcony, Suite 418, Atlanta, GA 30334. Please contact [GORArequest.Water@dnr.ga.gov](mailto:GORArequest.Water@dnr.ga.gov) to schedule an appointment to review the plans. Since the EPD has no authority to zone property or determine land use, only those comments addressing environmental issues related to air, water, and land protection will be considered in the application review process. Comments may be submitted via e-mail to: [EPDcomments@dnr.ga.gov](mailto:EPDcomments@dnr.ga.gov). Comments may also be provided in writing to: Program Manager, Nonpoint Source Program, Erosion and Sedimentation Control, 2 Martin Luther King Jr. Drive SW, Suite 1452 East, Atlanta, GA 30334. The words “Buffer Variance Comment”, including the Control Number shown above, should be placed in the e-mail subject line (if sent via e-mail) or on the top of the first page of written comments to ensure that your comments will be forwarded to the appropriate staff.

Type of Permit Application: Variance to encroach within the 25-foot State waters buffer.

Applicable Law: Georgia Erosion and Sedimentation Act O.C.G.A. § 12-7-6 et seq.

Applicable Rules: Erosion and Sedimentation Control Chapter 391-3-7

Basis under which variance shall be considered {391-3-7-.11 (2)(a-k)}: (a)

Description and Location of Proposed Activity:

The proposed project involves construction of a retaining wall along a property on Hawkins Island Circle in Glynn County. Land disturbing activities within the buffer of Hawkins Creek feature wooden wall installation, which is to be achieved with minimal machinery and completed with hand equipment, as well as revegetation practices. The retaining wall is intended to combat erosion along the coastal marshland – upland interface: the project aims to stabilize the bank and to retain the integrity of the property. Alternative practices were considered and deemed infeasible. This project requires 2,256 square feet of disturbance along 253 linear feet within the Cumberland – Saint Simons Watershed (03070203). Disturbed areas will be revegetated upon completion of the project.

Name and Address of Permit Applicant: Victor Maxey  
121 Hawkins Island Circle  
Saint Simons Island, GA 31522

### Summary of Rules Requirements for Variance Application:

The application for a variance must include an Erosion and Sediment Control Plan with control measures based on sound conservation and engineering practices which meet or exceed the standards in the "Manual for Erosion and Sediment Control in Georgia" and which will minimize erosion and deposition of sediments on adjacent lands or into State waters.
