Subject: Soil Blending Scope of Work, November 15, 2018
Rayloc Facility, HSI Site No. 10547
600 Rayloc Drive, Atlanta, Georgia (Fulton County)
Tax Parcel ID 13242D B001

Dear Mr. Lewis:

The Georgia Environmental Protection Division (EPD) has received the above referenced document which has been submitted for the Rayloc Facility site in accordance with the Voluntary Remediation Program Act (the Act). EPD has no objections with utilizing the proposed soil blending technology, subject to compliance with Underground Injection Control permit requirements. EPD notes that the figure provided in the Scope of Work does not indicate the proposed horizontal limits of soil blending and that soil sample results presented (e.g., PDA-32, 36, 37, 38, 46, etc.) do not show horizontal delineation to Risk Reduction Standards (RRS). It will need to be demonstrated that soil beyond the limits of soil blending is in compliance with RRS.

If you have any questions, please contact Nicole Vermillion of the Response and Remediation Program at (404) 232-7891.

Sincerely,

David Hayes
Unit Coordinator
Response and Remediation Program
