Re: Semi-Annual VRP Progress Report # 10
General Chemical Site, HSI # 10498
East Point, Fulton County

Dear Mr. Thorn:

The Environmental Protection Division (EPD) is in receipt of the January 2018 Semi-Annual Groundwater Monitoring Report No. 19 (VRP Progress Report # 10; hereinafter the Report) for the General Chemical Site, in EastPoint, Fulton County. After completing a review of the Report, EPD has prepared the following comments:

- 1) Neither the Report nor any other correspondence received since EPD's September 6, 2017 letter has addressed EPD's comments made in that letter.
- 2) Please provide field sampling reports to document the sampling in accordance with the US Environmental Protection Agency's (US EPA's) Field Branches Quality System and Technical Procedures (FBQSTP) Operating Procedure for "Groundwater Sampling", SESDPROC-301-R4 (April 20, 2017). Please ensure all future field sampling reports include total well depth, screen lengths, depth of the pump/tubing intake, purge flow rate, final purge volume, and the type of materials used during sampling (i.e. Teflon), as well as that the Chemical Parameter Stabilization Criteria is consistent with Sections 3.3, and 3.4.3 or 3.5.4, of that procedure.

The above listed comment must be addressed to EPD's satisfaction in order to demonstrate compliance with the provisions, purposes, standards and policies of the Act. Please provide responses to the above listed comments as part of the next scheduled Progress Report submittal. Also, please be aware that this Site has been transferred to the newly-formed VRP Unit, and if you have any questions regarding this matter, you should call David Hayes of the VRP Unit at (404) 657-8600.

Sincerely,

David Brownlee
Unit Coordinator
Response and Remediation Program
