Subject: First Semi-Annual Progress Report
GA DOT Jesup District Office Complex (HSI 10742)
204 North Highway 301, Jesup, Wayne County, Georgia

Dear Mr. Clute:

The Georgia Environmental Protection Division (EPD) has reviewed the First Semi-Annual Progress Report, dated December 3, 2018, for the referenced site. EPD has the following comments:

1. The Georgia Department of Transportation (GDOT) submitted a certification of compliance for soils as specified in Rule 391-3-19.06(4)(c). Please resubmit the certification of compliance in the compliance status report (CSR). The CSR should include supporting documentation demonstrating that sufficient soil sampling was performed to characterize the release to the Property.
2. **Groundwater Delineation:** Groundwater delineation activities have not been completed to the delineation criteria provided under the VRP Act.
 - a. MW-26 was installed downgradient of MW-15 to serve as the point of demonstration (POD) for the upper aquifer. The monitoring well currently exceeds Type 1 RRS for 1,1-DCE.
 - b. MW-25 was installed to vertically delineate impacts near MW-3A. The monitoring well currently exceeds Type 1 RRS for 1,1-DCE.

Please complete additional site characterization activities to meet delineation requirements provided under the VRP Act.

3. **Milestone Schedule:** Until delineation is completed, EPD requests that semi-annual groundwater sampling be performed at the approved limited list of monitoring wells, with the inclusion of MW-15, MW-8, and MW-2D. Once delineation is complete, a comprehensive groundwater sampling event should be performed.
