Re: Removal from Hazardous Site Inventory
Former Southern Pipe Coating Operation, HSI# 10757
6420 Corley Road
Norcross, Gwinnett County, Georgia

Dear Mr. Hart:

The Georgia Environmental Protection Division (EPD) has reviewed the Voluntary Remediation Program Compliance Status Report (CSR) dated November 1, 2012, and the recorded Environmental Covenant dated April 29, 2013 for the above referenced site. Based on that review, I have determined the CSR is complete and concur with your certification of compliance that this site is in compliance with residential risk reduction standards with controls. Therefore, I am designating this site as not needing further action and I am removing this site from the Hazardous Site Inventory in accordance with §391-3-19-.05(4)(b) of the Rules of Hazardous Site Response and §12-8-107 of the Voluntary Remediation Program Act as of the date of this letter.

EPD's approval of the CSR extends only to those technical aspects of the document that expressly require EPD approval under applicable rules and statutes. This approval is not an endorsement by EPD that it accepts as conclusive any representations made in the document. Nor does EPD guarantee or warrant that the document is free of errors or omissions. EPD may later withdraw approval of this document, in whole or in part, if EPD determines that withdrawal is necessary to ensure compliance with the applicable rules and statutes. As required by §391-3-19-.06(5)(f) of the Rules, a public notice announcing this determination shall be published in the Gwinnett Daily Post. If you have any questions regarding this matter, please contact Elise Chew of EPD's Response and Remediation Program at 404-657-8600.

Sincerely,

Charles D. Williams, Manager
Response and Remediation Program
