Dear Mr. Corbett:

The Georgia Environmental Protection Division (EPD) has determined that the Voluntary Remediation Program (VRP) Compliance Status Report (CSR) dated December 6, 2013, the VRP CSR Addendum dated August 15, 2014, and associated executed Uniform Environmental Covenants (UEC), received on May 29, 2015, for the above referenced site are complete in accordance with the Georgia Voluntary Remediation Act (the Act) O.C.G.A. §12-8-100. Furthermore, EPD concurs with your certification of compliance that soil and groundwater at the relevant voluntary remediation properties are in compliance with Type 5 risk reduction standards, which requires UECs prohibiting residential use of the site property, restricts the use of groundwater for the applicable surrounding properties, and ensures the long term maintenance and monitoring for the sediments in the Oostanaula River. Therefore, EPD is reclassifying this site as a Class III site and is removing it from the Hazardous Site Inventory in accordance with Subparagraph 391-3-19-.05(4)(b) of the Rules for Hazardous Site Response (the Rules) and §12-8-107(f) and (g)(2) of the Act as of the date of this letter.

As required by Subparagraph 391-3-19-.06(5)(f) of the Rules, a public notice announcing this determination shall be published in the *Rome News Tribune*. If you have any questions, please contact Kevin Collins of the Response and Remediation Program at (404) 657-8660.

Sincerely,

Judson H. Turner
Director
