

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION 4
ATLANTA FEDERAL CENTER
61 FORSYTH STREET
ATLANTA, GEORGIA 30303-8960

March 24, 2021

Ms. DeAnna Oser, Program Manager
Georgia Environmental Protection Division
4244 International Parkway, Suite 120
Atlanta, GA 30354

Ms. DeAnna Oser:

Thank you for submitting the Quality Assurance Project Plan for the *Georgia Ambient Air Monitoring Program to Evaluate New and Emerging Technologies for Ethylene Oxide, Revision 0*, December 2020 (December 2020 QAPP submittal).

The EPA would like to clarify that the Georgia Environmental Protection Division's (GA EPD) collection of air samples, the data quality assessment, the data validation, and the reporting of results which began in September 2019 are covered under the *Quality Assurance Project Plan for the Georgia Ambient Air Monitoring Program for Ethylene Oxide, Revision 0*, approved in September 2019 and the *Georgia Ambient Air Monitoring Program for Ethylene Oxide, Revision 1*, approved April 2020. Upon EPA approval of the December 2020 QAPP submittal, air sampling data collected, data quality assessment and validation activities, and the reporting of results conducted from the approval date will be covered under that document.

Thank you for your work to promote healthy air quality in Georgia and the nation. If you have any questions or concerns, please contact me at (404) 562-9141 or Sara Waterson at (404) 562-9061.

Sincerely,

Gregg Worley, Chief
Air Analysis and Support Branch
