

NOTICE OF AVAILABILITY OF
TOTAL MAXIMUM DAILY LOAD
SUPPLEMENT DOCUMENTS
FOR WATERS
IN THE STATE OF GEORGIA
September 12, 2022

TO ALL INTERESTED PERSONS AND PARTIES:

As part of the 2019 Water Quality Standards Triennial Review of [Water Quality Standards](#), Georgia adopted *E. coli* and enterococci criteria for waters designated as fishing, coastal fishing, and drinking water to protect recreators who may have inadvertently ingest water. The Georgia Board of Natural Resources adopted the updated criteria on January 28, 2022, followed by US EPA Region IV approval on August 31, 2022. The *E. coli* and enterococci criteria replace the fecal coliform criteria that had been in place since the 1970's.

The Georgia Environmental Protection Division (EPD) has developed forty (40) Total Maximum Daily Load (TMDL) documents for waters impaired by fecal coliform since 2002, as required by Section 303(d)(1)(C) of the Clean Water Act. Considering the recent change in bacteria indicator, EPD has created TMDL Supplement Documents to describe the translation of the fecal coliform calculations to the new bacteria indicator, either *E. coli* or enterococci, for the segments identified in the existing approved fecal coliform TMDL documents. To the extent that these existing approved TMDL documents make specific permitting recommendations based on fecal coliform, those recommendations will be translated to the appropriate bacteria indicator (either *E. coli* or enterococci) in all wasteload allocations (WLA).

A copy of each TMDL Supplemental Document is available online on the EPD TMDL webpage, under the Proposed TMDL section: <https://epd.georgia.gov/watershed-protection-branch/total-maximum-daily-loadings>

In addition, a copy of this notice and a copy of each TMDL Supplemental Document may be reviewed during normal business hours 8:00 a.m. to 4:30 p.m., Monday through Friday (except official State holidays or office closures) by appointment only, at the following location:

Environmental Protection Division
Watershed Protection Branch File Room
200 Piedmont Ave. S.W., Suite 418
Atlanta, Georgia 30334
(404) 463-1511

A single copy of each TMDL Supplemental Document is available by written or phone request to the Georgia Environmental Protection Division (EPD). Please direct requests to Ms. Arnetta Murphy at the address or phone number given above. If additional copies are requested, a copying charge of 10 cents per page will be assessed.

Written comments are welcomed. To ensure their consideration, written comments should be received on or before 5:00 p.m., **October 13, 2022**. Written comments should be addressed to:

Ms. Anna Truszczynski
Branch Chief, Watershed Protection Branch
2 Martin Luther King Jr. Drive, Suite 1470
Atlanta, Georgia 30334.

Comments may also be emailed to EPD.Comments@dnr.ga.gov. If you choose to e-mail your comments, please be sure to include the words "**TMDL Supplement Comments**" in the subject line to help ensure that your comments will be forwarded to the correct staff.

For technical information contact Tyler Parsons, TMDL Modeling and Development Unit Manager, tyler.parsons@dnr.ga.gov or (404) 463-1511.

After a review of comments, any final revisions to the TMDL Supplement Documents will be made. These documents will be submitted to US EPA to accompany each approved TMDL.

Please bring the foregoing to the attention of persons whom you believe will be interested in this matter.

TMDL Supplement Documents have been developed for the following approved Fecal Coliform TMDLs and relevant stream segments. The final TMDL documents can be found in each River Basin web page located at:
