

Sterilization Services of Georgia (SSG)

Monday, January 20, 2020

Sean Taylor
Program Manager
Stationary Source Compliance Program
4244 International Parkway
Suite 120
Atlanta, GA 30354

Mr. Taylor,

Sterilization Services of Georgia completed installation of the dry bed reactors under Georgia Air Quality Permit No. 3841-121-0010-S-03-0. The back vents from all three sterilization chambers are now connected and routed through the bank of four dry bed reactors. Testing was completed and the dry bed reactor system became operational on Saturday, January 18, 2020.

As required in Consent Order No. EPD-AQC-7007, I am hereby notifying the EPD that the performance test required in Permit Condition 6.4 is currently scheduled to start Tuesday, March 10, 2020 at 13:00. We would welcome your participation in the performance testing.

Please let me know if you have any questions.

David Connor
