

2023 Annual Operations Report

This page is intentionally left blank.

Data analysis and reporting are required for the monitoring and evaluation of Georgia's Enhanced I/M Program ("the Program") by program management and the US Environmental Protection Agency (EPA). This report includes information regarding the types of program activities performed and their final outcomes. Also included are summary statistics and effectiveness evaluations of the enforcement mechanism, the quality assurance system, the quality control program, and the testing element.

This page is intentionally left blank.

Section I. Test Data Report

This page is intentionally left blank.

Test Data Report

The following report provides basic statistics on the testing program for the reporting year of January 1, 2023, through December 31, 2023. It includes:

- A. The number of vehicles tested by model year and vehicle type [CFR §51.366(a)(1)]
 - 1. See Appendix A.
- B. By model year and vehicle type, the number and percentage of vehicles [CFR §51.366(a)(2)]
 - 1. Failing initially, per test type
 - a. See Appendices A and B.
 - 2. Failing the first after-repairs test (retest), per test type
 - a. See Appendix H.
 - 3. Passing the first after-repairs test (retest), per test type
 - a. See Appendix H.
 - 4. Initially failed vehicles passing the second or subsequent after-repairs test (retest), per test type
 - a. See Appendix I.
 - 5. Initially failed vehicles receiving a Repair Waiver
 - a. See Appendix J.
 - 6. Vehicles with an undetermined final outcome (regardless of reason)
 - a. See Appendix P.
 - 7. Passing the on-board diagnostic (OBD) check
 - a. See Appendix B.
 - 8. Failing the on-board diagnostic (OBD) check
 - a. See Appendix B.
 - 9. Failing the on-board diagnostic (OBD) check and passing the tailpipe test (if applicable)
 - a. Not applicable: in Georgia's Enhanced I/M Program.
 - 10. Failing the on-board diagnostic (OBD) check and also failing the tailpipe test (if applicable)
 - a. Not applicable: in Georgia's Enhanced I/M Program.
 - 11. Passing the on-board diagnostic (OBD) check and failing the I/M gas cap evaporative system test (if applicable)
 - a. See Appendix G.
 - 12. Failing the on-board diagnostic (OBD) check and passing the I/M gas cap evaporative system test (if applicable)
 - a. See Appendix G.

13. Passing both the on-board diagnostic (OBD) check and the I/M gas cap evaporative system test (if applicable)
 - a. See Appendix G.
14. Failing both the on-board diagnostic (OBD) check and the I/M gas cap evaporative system test (if applicable)
 - a. See Appendix G.
15. MIL (Malfunction Indicator Light) is commanded on/illuminated and no codes are stored
 - a. See Appendix E.
16. MIL (Malfunction Indicator Light) is not commanded on/illuminated and codes are stored
 - a. See Appendix E.
17. MIL (Malfunction Indicator Light) is commanded on/illuminated and codes are stored
 - a. See Appendix E.
18. MIL (Malfunction Indicator Light) is not commanded on/illuminated and codes are not stored
 - a. See Appendix E.
19. Readiness status indicates that the evaluation is not complete for any module supported by on-board diagnostic (OBD) systems
 - a. See Appendix F.
- C. The initial test volume by model year and test station [CFR §51.366(a) (3)]
 1. See Appendix O.
- D. The initial test failure rate by model year and test station [CFR §51.366(a) (4)]
 1. See Appendix O.
- E. The average increase or decrease in tailpipe emissions levels for HC, CO, and NO_x after repairs by model year and vehicle type for vehicles receiving a mass emissions test [CFR §51.366(a)(5)]
 1. Not applicable: in Georgia's Enhanced I/M Program, no vehicle received a mass emissions test.

Section II. Quality Assurance Report

This page is intentionally left blank.

Quality Assurance Report

The following report provides basic statistics on the quality assurance program for the reporting year of January 1, 2023, through December 31, 2023. It includes:

A. The number of inspection stations and lanes [CFR §51.366(b) (1)]

1. Operating throughout the year:

There were 558 inspection stations and 608 inspection lanes that operated throughout the year in Georgia's Enhanced I/M Program. Stations that operated throughout the year may have inspection lanes that operated only part of the year. This occurs when an existing station changes the number of test lanes it operates.

2. Operating for only part of the year:

There were 226 inspection stations and 287 inspection lanes that operated for only part of the year in Georgia's Enhanced I/M Program.

a. There were 226 inspection stations that received overt performance audits during the year in Georgia's Enhanced I/M Program.

b. There were 226 inspection stations that received covert performance audits during the year in Georgia's Enhanced I/M Program.

B. The number of inspection stations operating throughout the year [CFR §51.366(b) (2)]

1. Receiving overt performance audits in the year:

There were 558 inspection stations that received overt performance audits during the year in Georgia's Enhanced I/M Program.

2. Not receiving overt performance audits in the year:

There was 0 inspection station that did not receive an overt performance audit during the year in Georgia's Enhanced I/M Program.

3. Receiving covert performance audits in the year:

There were 532 inspection stations that received covert performance audits during the year in Georgia's Enhanced I/M Program.

4. Not receiving covert performance audits in the year:

There were 26 inspection stations that did not receive a covert performance audit. These stations were operating as fleet stations, new car dealers, or used car dealers.

5. That has been shut down as a result of overt performance audits:

No stations were “shut down” as the direct result of an overt audit. In accordance with Georgia’s Administrative Procedures Act, the Environmental Protection Division (EPD) cannot “shut down” a station, except through the administrative hearing process. Inadequacies found during an overt performance audit that would warrant temporarily closing a station are typically related to malfunctioning or faulty testing equipment. When equipment problems are identified that might affect the integrity of the inspections, station owners are notified that they are not to conduct inspections until the equipment has been repaired and the accuracy of the equipment confirmed by a follow-up overt performance audit. Any station identified as conducting inspections after being so notified is cited for the violation and subject to a suspension and/or monetary penalty through the consent order process; civil penalties through the administrative hearing process; or criminal charges, depending on the severity and gravity of the situation. Violations and penalties associated with overt audits are accounted for under question four below, part III, “That received fines - Stations”.

C. The number of covert audits [CFR §51.366(b) (3)]

1. Conducted with the vehicle set to fail per test type:
 - a. See Appendix M.
2. Conducted with the vehicle set to fail any combination of two or more test types:
 - a. Not applicable in the in Georgia’s Enhanced I/M Program.
3. Resulting in a false pass per test type:
 - a. See Appendix N.
4. Resulting in a false pass for any combination of two or more test types:
 - a. Not applicable in the Georgia’s Enhanced I/M Program.

D. The number of inspectors and stations [CFR §51.366(b) (4)]

1. That were suspended, fired (revoked¹), or otherwise prohibited from testing as a result of covert audits:

	Licenses Suspended	Licenses Revoked
Inspectors	5	0
Stations	0	0

¹ Because it is a decentralized program, inspectors and stations are licensed by, not employed by the State of Georgia. Accordingly, the resulting action is to revoke a station’s or inspector’s license as opposed to firing them.

2. That were suspended, fired (revoked), or otherwise prohibited from testing for other causes:

	Licenses Suspended	Licenses Revoked
Inspectors	0	19
Stations	1	1

3. That received fines:

	Fined
Inspectors	22
Stations	6

- E. The number of inspectors licensed or certified to conduct testing [CFR §51.366(b) (5)]

The total number of inspectors licensed or certified to conduct testing in 2023 was 3,272 (this includes all inspectors with an active license regardless of testing activity).

There was a total of 1,962 inspectors who attended training during 2023 (this includes all training types and retests). The new inspector certification class had 1,033 attendees. Of the 1,033 attending, 886 passed the course and became newly licensed emissions inspectors with full certification (OBD and TSI).

All currently active certified inspectors are required to receive re-certification training every two years; 839 inspectors attended the recertification training. Of the 839 attending, 805 passed the recertification.

New inspector certification and recertification training continues to be offered by the management contractor. Classes are scheduled as needed. The average numbers of new inspector and recertification training classes conducted per month in 2023 respectively were 3.0 and 3.0. Note: At least one inspector was assigned per station. Some inspectors were assigned to multiple stations (See Appendix O).

- F. The number of hearings [CFR §51.366(b) (6)]

The State of Georgia uses a two-step enforcement process for inspectors and station owners that commit violations of the rules. They are first offered an opportunity to settle the allegations by way of an Environmental Protection Division (EPD) proposed settlement of suspension/revocation and/or negotiated monetary settlement through the consent order process. If a settlement cannot be reached at this level, an administrative order is issued seeking an elevated level of enforcement (license suspension or revocation). The inspector or station owner is given the opportunity to petition for an administrative hearing prior to the administrative order taking effect. The vast majority of enforcement actions are settled through the consent order process. For more serious violations, a citation is issued to place the alleged violation in state court for criminal prosecution.

There were no hearings held during the reporting period of 2023.

- G. The total amount collected in fines from inspectors and stations by type of violation [CFR §51.366(b) (7)]

The fine amounts shown below are by violation type. In some cases where there were multiple violations against an inspector, EPD may have combined the total fine into one violation code.

Code	Violation Type	Occurrence	Fines
197	Station manager failed to provide proper oversight	5	\$22,500.00
301	Failed to test covert fuel cap, issued passing certificate	1	\$250.00
303	Failed to test covert fuel cap, used alternate cap	1	\$250.00
305	Tested fuel cap, it failed, used alternate cap	5	\$2,250.00
309	Passed fuel cap modified to fail, method unknown	6	\$2,500.00
502	Passing a vehicle with a malfunctioning MIL lamp	6	\$4,000.00
503	Passing a vehicle with a MIL lamp on and engine running	3	\$2,250.00
Total			\$34,000.00

- H. The total number of covert vehicles available for undercover audits over the year [CFR §51.366(b) (8)]

The management contractor uses multiple resources (private sale, auctions, etc.) to maintain a rotating fleet of covert vehicles. This fleet is varied in its composition of vehicle ages and types. For the 2023 test year, there were a total of 15 covert vehicles available for covert audits.

- I. The number of covert auditors available for undercover audits [CFR §51.366(b) (9)]

The management contractor trained all its field auditors and most of its office staff as certified emissions inspectors. Personnel are also trained in Georgia's Enhanced I/M Program overt and covert audit procedures and enforcement requirements. During this reporting period, there were 13 covert auditors available for covert audits.

This page is intentionally left blank.

Section III. Quality Control Report

This page is intentionally left blank.

Quality Control Report

The following report provides basic statistics on the quality control program for the reporting year of January 1, 2023, through December 31, 2023. It includes:

A. The number of emissions testing sites and lanes in use in the program [CFR 51.366(c) (1)]

During the reporting year, there were 784 inspection stations and 895 inspection lanes in use in Georgia's Enhanced I/M Program. Note: Not all of these stations or lanes were operational throughout the test year.

B. The number of equipment audits by station [CFR §51.366(c) (2)]

In the reporting year, 1,510 equipment audits were performed. The management contractor performed equipment audits both during audits and during the certification of a station or lane. Note: Equipment audits were conducted during the audit types of: Certification Audits, Complete Audits, 5-Gas Audits, and 90-day Lockout Audits (See Appendix L).

C. The number and percentage of stations that have failed equipment audits [CFR 51.366(c) (3)]

Based on the management contractor's 1,510 equipment audits performed during station audits and during the certification of a station or lane, 120 stations out of 784 failed; this equates to approximately 15 percent of the stations participating in the program. Note: Some stations had more than one lane.

D. Number and percentage of stations and lanes shut down as a result of equipment audits [CFR §51.366(c) (4)]

No stations were "shut down" as the direct result of a failed equipment audit. In accordance with Georgia's Administrative Procedures Act, EPD cannot "shut down" a station except through the administrative hearing process. When equipment problems are identified that might affect the integrity of the inspections, station owners are notified that they shall not conduct inspections until the equipment has been repaired and the accuracy of the equipment confirmed by a follow-up overt performance audit. Any station identified as conducting inspections after being so notified is cited for the violation and subject to a suspension and/or monetary penalty through the consent order process; civil penalties through the administrative hearing process; or criminal charges, depending on the severity and gravity of the situation.

E. Additional Information Requested:

1. Reports on all audit activities

A summary of audit activities performed by the management contractor during the reporting year can be found in Appendix L.

2. Auditor Performance Evaluations

Monthly Auditor Performance Evaluations were performed for all field auditors employed throughout the reporting year. The evaluations consisted of the following criteria: number of audits scheduled/completed, completeness and thoroughness of recorded data/observations, enforcement effectiveness, and feedback from EPD staff/emissions station owners/inspectors, and results from ride-along evaluations performed by the management staff and the QA/QC department. EPD I/M unit staff and enforcement staff conducted follow-up audits of the management contractor's audits on a random basis. No significant issues or problems were identified.

Section IV. Enforcement Report

This page is intentionally left blank.

Enforcement Report

The following report provides basic statistics on the enforcement program for the reporting year of January 1, 2023, through December 31, 2023. It includes:

- A. An estimate of the number of vehicles subject to the inspection program derived from the vehicle registration database. [CFR §51.366(d) (1)]

2023 Registration Data²

County (County Code)	Vehicles Potentially Subject to I/M Program
Cherokee (35)	167,567
Clayton (13)	148,667
Cobb (7)	446,119
Coweta (27)	92,177
DeKalb (2)	376,830
Douglas (57)	83,148
Fayette (112)	76,568
Forsyth (79)	149,530
Fulton (1)	513,892
Gwinnett (16)	561,798
Henry (54)	145,703
Paulding (75)	102,218
Rockdale (89)	52,252
Total	2,916,469

² The above table contains the number of vehicles subject to inspection for 2023. Data source: Driver Record and Integrated Vehicle Enterprise System (DRIVES) managed by the Georgia Department of Revenue (DOR).

- B. The percentage of motorist compliance is based upon a comparison of the number of valid tests with the number of vehicles subject to the program.

As can be seen, the number of vehicles potentially subject to the I/M program (2,916,469), based on the DRIVES registration database, is less than the number of initial inspections (3,166,056) performed in 2023. This total was derived by taking all initial tests and excluding all aborts and covert tests. This difference can increase or decrease and can be attributed to any of the following.

1. The DRIVES database cannot accurately differentiate between light-duty trucks with a gross vehicle weight rating (GVWR) over or under 8,500 pounds.
2. There is no way of anticipating the number of vehicles not previously registered in Georgia entering the 13-county Atlanta area due to new residency or used car sales; however, these vehicles receive tests prior to being counted in the DRIVES data.
3. Senior Exemptions and Out-of-Area Extensions are not considered.
4. Most State of Georgia government agencies are headquartered in the metro Atlanta area and their vehicles are registered in an I/M program county, but many of these vehicles are permanently assigned to counties or areas a significant distance from the I/M program area and therefore are not required to be inspected.
5. The registration information is only a "snapshot" of the fleet when the data was retrieved from DRIVES.
6. Vehicles legally or illegally registered outside of the I/M program area.
7. VIN errors in the I/M inspection database and DRIVES.
8. Georgia excludes the newest three (3) vehicle model years.
9. Used car dealers and auction houses often inspect vehicles being sold even though these vehicles may not be sold to owners living in the non-attainment area.
10. Vehicles which fail multiple times may have several initial inspections.

Of these, the most significant reason for this discrepancy appears to be the difficulty using the DRIVES registration data to differentiate between light-duty trucks (LDT) over or under the 8,500 pounds GVWR subjectivity threshold for the I/M program.

Since Georgia moved to electronic verification of vehicle liability insurance on DRIVES through the registration process in 2002, VIN errors are identified and corrected more efficiently.

The graph below illustrates data collected regarding registered vehicles in the 13-county non-attainment area, annual total tests performed, paid test volume, and the subject vehicle population for test years 2009 through 2023. This graph also illustrates the expected vehicle volumes projecting forward to test year 2024. As expected, subject vehicle numbers are less than the registered vehicles due to the several vehicle exemptions listed above. Tested vehicles indicate that more vehicles are tested than anticipated from the subject vehicle data for several reasons listed above.

C. Total number of compliance documents issued to inspection stations

Compliance documents (e-certificates of emissions inspections) are sold in blocks of 200 to new individual station owners and in blocks of 100 to past-standing individual station owners; they are issued electronically via the I/M inspection database by certificate number to each of the station's analyzers. All inventories are documented and accounted for in a database table. For each vehicle inspection performed, the analyzer e-certificate inventory is decremented by one and a hard copy of the official Certificate of Emissions Inspection is printed showing that unique certificate number assigned. The total number of certificates used is equal to the number of paid tests as shown in the database. During 2023, there were 3,238,100 certificates issued.

D. The total number of missing compliance documents

With the procedures described above for selling, issuing, and accounting of e-certificates, the history in Georgia's Enhanced I/M Program has shown there is little cause for concern regarding "missing compliance documents." However, the potential to produce counterfeit certificates continues to be of concern. With electronic matching of emissions inspections to the registration records on DRIVES, the occurrence of counterfeit certificates has been virtually eliminated. However, there are still instances when tag office clerk is presented with a paper Certificate of Emissions Inspection and no electronic verification of the inspection results is shown on DRIVES. In these cases, tag office personnel have become cautious, and utilize specific instructions on confirming the Test ID and visually identifying counterfeit certificates. The Test ID is a unique security number only printed on passing emissions certificates (generated by an algorithm that uses various test parameters from the vehicle's inspection). When a motorist presents a fraudulent certificate for vehicle registration, the tag office personnel notify either EPD officers or local law enforcement officers who can charge the individuals with submitting false documents to a government agency, which can be a felony in Georgia.

E. The number of time extensions and other exemptions are granted

1. See Appendix K

F. The number of compliance surveys conducted, number of vehicles surveyed, and the compliance rates found

The Environmental Protection Division (EPD) and the Department of Revenue (DOR) continue to improve upon the transfer of electronic data from the I/M inspection database to the Driver Record and Integrated Vehicle Enterprise System (DRIVES) database. Additionally, with better integration and utilization of inspection results by DRIVES and better understanding by county tag office clerks, the registration denial component of the program continues to become an increasingly effective tool to ensure program compliance. However, vehicles owned by the State of Georgia and any municipality or political subdivision in the state used exclusively for government functions are not issued tag expiration decals like privately owned or corporate vehicles. Once issued, the government license plates are good until the next five to seven-year tag cycle for government agencies. Without annual registration renewal, it is possible that some government-owned vehicles are out of compliance with the I/M inspection requirement under a program enforced through registration denial.

Several methods are used to strengthen the relationship between government agencies operating fleets of vehicles and EPD. They include outreach and communication with fleet managers; semi-annual notices are provided reminding them of their obligation to inspect their subject vehicles each year.

For fleet vehicles owned and registered by various state agencies in Atlanta but operated or assigned well outside of the 13-county I/M program area, EPD streamlined the process by which state fleet managers can obtain the proper Out-of-Area Extensions. State agencies can now adhere more closely to the inspection rules and better account for their subject vehicles driven in the 13-county metro Atlanta non-attainment area.

Fleet information and the emission testing schedule is posted in Georgia's Clean Air Force website under Stations and Inspectors, Fleet information.

G. Information provided regarding program enforcement by registration denial. [CFR §51.366(d) (2)]

A report of efforts and actions to prevent motorists from falsely registering vehicles out of the program area or falsely changing the fuel type or weight class on the vehicle registration, and the results of special studies to investigate the frequency of such activity.

Preventing motorists from falsely registering vehicles out of the program area or falsely changing the fuel type or weight class on the vehicle registration is accomplished at the county level. Various means of detecting vehicles falsely registered out of the program area are also employed. At each county tax commissioner's office, property tax records and vehicle registration records are compared to reveal any inconsistencies between the location of the registered vehicle and the location where homestead exemption is claimed. Additionally, complaints from citizens regarding out-of-area vehicle registration are forwarded to the respective county tax commissioners' office for further investigation.

The measures taken to preclude vehicle owners from falsely changing the fuel type or vehicle weight for the purpose of seeking exemption from the I/M program are also taken at the county tag offices. An affidavit that indicates the change in fuel type or vehicle weight along with repair work orders indicating engine or chassis modification are required at the time of vehicle registration or when the owner requests any change in the registration record.

H. The number of registration file audits, number of registrations reviewed, and compliance rates found in such audits

Registration file audits are done in conjunction with enforcement actions involving inspection stations or inspectors caught conducting fraudulent emissions inspections. Through the normal course of the investigation, suspect emissions test records are examined for signs of validity. Any that appear to have a likelihood of being fraudulent are further investigated on the registration database for signs of fraudulent activity. Although these audits or activities are not specifically tracked or tabulated, if necessary, investigations involve review of registration records.

Section V. Public Information and Consumer Protection Program (PI&CP)

This page is intentionally left blank.

Public Information and Consumer Protection Program (PI&CP)

Executive Summary

The Public Information and Consumer Protection Program (PI&CP) of Georgia's Clean Air Force (GCAF) celebrated 27 years of continued successful public outreach initiatives. The GCAF PI&CP team responded to more than 35,000 inquiries via CRM tickets, email and comment cards. The GCAF Call Center responded to more than 55,000 calls from English and Spanish-speaking motorists, inspection stations and repair facilities, while the program website welcomed over 768,000 visitors. Close to 7.5M impressions were delivered via the annual advertising campaign, and more than 1.7M impressions resulted via paid and organic social media marketing.

The year kicked off with updated program collateral, website, and outreach plans for the 2023 testing season.

Key program collateral included: the annual registration renewal inserts, which is mailed to all registered 13-county metro Atlanta motorists to provide registration information; the annual question and answer (Q&A) brochures / business cards and quarterly Repair *Watch* Public Report booklets, which offered repair and waiver assistance; and the quarterly Repair *Watch* e-newsletters, which delivered general program information and promoted available program resources.

New educational PR campaigns were launched with the use of press releases, infographics, infographic video, and web banners covering the following topics: Georgia Vehicle Registration and Emissions Inspection How-To; Celebrate Earth Day Every Day; Who is Most At-Risk During Georgia's Ozone Season; Six Tips for Buying a Used Vehicle; How Emissions Testing is Helping Improve Our Air; and Top Commuting Options for Metropolitan Atlanta Residents. The campaigns were posted online and distributed to local and relevant media.

Additional media relations efforts included an annual media training and updated resources, such as the internal crisis communications plan and public-facing program information kit.

Social media marketing continued on Facebook, Twitter (X), Instagram, and YouTube, and incorporated the launch of YouTube Shorts and Spanish content. Overall, social media efforts garnered more than 1.7M impressions and 11 percent net follower growth.

The annual online motorist survey launched in April and ran through October, receiving 460+ responses and a 72% positive rating for the motorist testing experience.

The annual advertising campaign kicked off in April with a focus on Earth Day and continued through December via social media (Facebook/Instagram), digital audio (Pandora), digital video on CTV (Hulu/Locality), display pre-roll video (YouTube/Google Display), and print ads in GIADA magazine. The campaign earned approximately 7.5 million impressions, which is a 53 percent increase compared to 2022.

The program website, www.cleanairforce.com, welcomed over 768,000 visitors and continued with ongoing updates and user-friendly features. The program continued to offer translated information in Spanish, Korean, Vietnamese, and Mandarin Chinese.

The year concluded with the preparation of 2024 program updates.

2023 PI&CP Summary

Quarter	Motorist Calls Assisted (English)	Motorist Calls Assisted (Spanish)	Station Calls Assisted	Repair Assistance Calls
1	13,155	71	935	1,346
2	11,315	14	1,010	85
3	13,381	12	972	76
4	12,462	15	850	48
Total	50,313	112	3,767	1,555

Quarter	CRM Tickets	Emails	Hard Copy Comment Cards	Electronic Comment Cards
1	10,599	450	1	0
2	8,254	258	2	0
3	8,837	101	3	0
4	7,023	39	0	0
Total	34,713	848	6	0

Motorist Outreach

Key Messages & Goals

Maintain awareness of the following:

- A. Environmental and health benefits of emissions testing
- B. Regular maintenance for improved emissions test results and cost savings

Continue to:

- A. Educate seniors on the possible exemptions available
- B. Provide foreign language resources
- C. Drive motorists to www.cleanairforce.com to gain access to program info and testing locations

Provide:

- A. Timely communications on the registration and inspection process, in addition to changes in tag office, service center and GCAF industry services, locations, and hours of operations

Motorist Outreach Tools

- A. Paid advertising campaign
- B. Social media marketing
- C. Website
- D. Toll-free hotline
- E. Collateral materials
- F. Consumer comments/complaints system including annual online survey and comment cards (hard copy and electronic)
- G. Media relations, including crisis management and earned media
- H. Community outreach initiatives

Evaluation Methods

- A. Internet tracking studies via the annual online motorist survey that served as a mapping of motorist awareness and attitudes toward the program
- B. Traffic/volume data collected from each emissions test site
- C. Comment cards/website queries - most frequent comments and concerns
- D. Hotline inquiries - volume of calls and types of issues; escalations via CRM tickets
- E. Media coverage - quantity and quality of message delivery
- F. Website traffic and trend analysis via Google Analytics
- G. Social media engagement and trend analysis via Sprout software

Motorist Program Deliverables

- A. Continued to promote awareness of program benefits and repair tips
- B. Provided consistent message delivery, reiterated appreciation to motorists
- C. Controlled key messages and ensured consistent branding
- D. Strengthened awareness and acceptance of Georgia's Clean Air Force
- E. Averted negative coverage/perception proactively

Motorist Outreach Audiences

- A. Metro Atlanta motorists
 - 1. Registered owners of 1999 - 2020 model year gasoline-powered cars and light-duty trucks (with a gross vehicle weight rating [GVWR] of 8,500 pounds or less) in the 13 metro counties; this included seniors and non-English-speaking motorists (Spanish, Korean, Vietnamese, and Mandarin Chinese)
 - 2. Annual media campaign targets adults ages 25-54 who own/lease and operate a passenger vehicle and live within the 13-county non-attainment region
- B. Metro Atlanta media
 - 1. Print: Includes daily and weekly publications in the metro Atlanta area; full media list available upon request
 - 2. Radio: See Advertising and Marketing section
 - 3. Interactive/Digital: See Advertising and Marketing section

C. Advocacy groups

1. Environmental and consumer advocacy groups: GCAF provided program information through press releases, www.cleanairforce.com, the GCAF Call Center and email, as requested.

D. Ethnic audiences (Hispanic, Vietnamese, Korean, and Mandarin Chinese)

1. GCAF provided program information through press releases, www.cleanairforce.com, the GCAF Call Center and email, as requested. See Community Outreach for additional information.

E. Senior citizen groups

1. GCAF provided program information through press releases, www.cleanairforce.com, the GCAF Call Center, and email, as requested. See Community Outreach for additional information.

Advertising and Marketing

Objectives

- A. Maintain awareness of Georgia's Clean Air Force and the following:
 1. Environmental and health benefits of emissions testing
 2. Regular maintenance for improved emissions test results and cost savings
- B. Provide drivers with easy access to program information and testing locations
- C. Drive traffic to the www.cleanairforce.com website and social media channels

Strategy

- A. Target only 13-county metro Atlanta residents
 - 1. Audience:
 - a. General motorists (ages 18-64)
 - b. Non-English-speaking motorists: Hispanic, Vietnamese, Korean, and Mandarin Chinese
 - 2. Geography:
 - a. Cherokee County
 - b. Clayton County
 - c. Cobb County
 - d. Coweta County
 - e. Dekalb County
 - f. Douglas County
 - g. Fayette County
 - h. Forsyth County
 - i. Fulton County
 - j. Gwinnett County
 - k. Henry County
 - l. Paulding County
 - m. Rockdale County
- B. Concentrate activity in relevant, highly visible local media outlets
- C. Utilize a multi-channel platform to reach motorists and increase overall presence

Paid Media/Annual Advertising Campaign

GCAF ran a successful paid media campaign from April through December, which included:

- A. Digital audio
- B. Digital video - CTV
- C. Print
- D. Social media
- E. Display/pre-roll video

Advertising Campaign Summary

The advertising campaign earned close to 7.5 million impressions* with rotating videos and still ads on Facebook and Instagram, digital audio and web banners on Pandora, digital CTV video on Hulu and Locality, display and pre-roll video on YouTube and Google Display, plus print ads in GIADA magazine. The ads highlighted Earth Day and focused on general program benefits in both English and Spanish.

**The 2022 advertising campaign delivered 5M impressions, for a 53% increase in exposure year-over-year (YOY).*

A detailed report of the advertising campaign and its results has been provided to EPD.

Social Media

This year's social media activities included the continuation of Facebook, Twitter ("X"), YouTube, and Instagram. Content focused on a range of topics including testing tips, repair advice, used vehicle sale reminders, health and air pollution topics, and survey promotion.

The following analytics include organic metrics and paid metrics.

Social Media Highlights:

- A. **New!** Launched YouTube Shorts to further utilize PR campaign content
- B. **New!** Launched posts in Spanish to offer bilingual social marketing outreach
- C. Curated a blend of education- and awareness-focused content, continuing conversational tone
- D. Maintained consistent branding designs and templates

E. Continued with Instagram/Facebook Stories

F. Incorporated video content

Social Media Analytics		
Impressions	Engagements	Post Link Clicks
1,776,794 (compared to 545K in 2022 for a 225% increase)	7,166 (compared to 4,225 in 2022 for a 68% increase)	5,715* (compared to 2,107 in 2022 for a 171% increase)

**Link click total is from Facebook and Twitter only*

Facebook

GCAF continued to use social media as part of its communications program via Facebook (<https://www.facebook.com/GeorgiasCleanAirForce/>) to communicate its key messages, program-related news, information and statistics to fans and visitors. Fans may communicate directly with GCAF by posting a message on the page's wall or sending a direct message. GCAF promoted Facebook through the program website, emails, advertising and PR campaigns, plus GAS messages.

 January – December 2023	
Impressions	928,780*

**916,648 paid impressions; 12,132 organic impressions*

Top Facebook Posts

GCAF ran paid boosts of key messages for increased reach and visibility, including the promotion of the online annual survey, in addition to paid spots as part of the annual advertising campaign.

Facebook Ads

- A. Ran April – November 2023
- B. Impressions: 916,648 (303% ↑)

Twitter/X

The Twitter ("X") handle (@GACleanAirForce) continued as an additional outlet to disseminate program messaging and tips, and to promote the GCAF website. Twitter messaging complemented Facebook and Instagram messages, and included graphics, when available. GCAF promoted Twitter through the program website, emails, advertising, and PR campaigns, plus GAS messages.

YouTube

The [GCAF YouTube channel](#) continued targeting motorists, inspectors, and the repair industry. The following videos were created and posted:

- A. Georgia Vehicle Registration and Emissions Inspection How-To (March)
- B. Celebrate Earth Day Every Day (April)
- C. Who is Most At-Risk During Georgia's Ozone Season? (May)
- D. Six Tips for Buying a Used Vehicle (July)
- E. How Emissions Testing is Helping Improve Our Air (September)
- F. Top Commuting Options for Metropolitan Atlanta Residents (December)

GCAF began creating and posting YouTube Shorts to take advantage of short-form videos.

YouTube Short videos that were created and posted include:

- A. Who is most at-risk during Georgia's ozone season?
- B. How does vehicle pollution impact human health?
- C. How Emissions Testing Helps Our Air #airquality #emissionstesting #atlanta

GCAF promoted its YouTube channel through the program website, emails, advertising and PR campaigns, plus GAS messages.

Top Instagram Posts

Public Relations/Media Relations

The PI&CP team wrote, designed, and distributed six PR campaigns during the year, which included five press releases with accompanying infographics, infographic videos, and web banners, plus a video and customized web page for Earth Day.

PR Campaigns

Below is a list of the PR campaigns that were created and distributed throughout the year.

- A. Georgia Vehicle Registration and Emissions Inspection How-To (March)
- B. Celebrate Earth Day Every Day (April)
- C. Who is Most At-Risk During Georgia's Ozone Season (May)
- D. Six Tips for Buying a Used Vehicle (July)
- E. How Emissions Testing is Helping Improve Our Air (September)
- F. Top Commuting Options for Metropolitan Atlanta Residents (December)

All items are available online at <https://cleanairforce.com/common/press>.

Media Interviews and Coverage

GCAF updated its media contacts list, answered media inquiries, provided program information, and efficiently monitored any pertinent news coverage related to the I/M program.

The Media Crisis Communications Plan was updated, talking points were issued as needed, and issue management strategies and communications plans were reviewed for preparation of controversial consumer and media issues.

A virtual annual media training was held for EPD staff on November 1. The training included media tips and common media scenarios, plus a Q&A session for attendees.

Motorist Resources

GCAF provided many resources for motorists to seek program information or file a comment or complaint. Each of these resources, listed below, provided an effective and timely avenue for motorist assistance.

GCAF Call Center

The GCAF Call Center assisted 55,747 calls, averaging more than 4,600 calls per month. More complex inquiries were forwarded to the GCAF team who assisted with 34,713 CRM ticket inquiries.

Additionally, the GCAF Call Center fielded 4,952 live chat inquiries.

During the reporting year, GCAF continued the use of a self-service after-hours IVR menu on the motorist and Spanish queues. The self-service IVR menu includes the same information as the daytime message, but when the caller requests to speak with a representative a recording plays stating that the office is currently closed and to leave a message for a callback.

Customer service representatives (CSRs) utilized Knowledge Base (an online information tree) to assist callers. GCAF updated Knowledge Base with program updates and announcements as necessary.

The annual call center training presentations were updated and provided to CSRs. The training provided an overview of 2023 updates and any recent changes within the program, along with common caller topics for motorists, stations and inspectors, and repair technicians and facilities.

GCAF Service Centers

GCAF Service Centers not only provided assistance for waivers, extensions and exemptions, but also answered general motorist and station inquiries. GCAF continued supplying program collateral including 2023 question and answer (Q&A) brochures in English and Spanish. Public Information Manager Becky Dent Robinson worked with Service Center Manager Tameca Lanier to ensure that GCAF collateral posted at the tag offices/part-time service centers was current and up to date.

Georgia's Clean Air Force Website (www.cleanairforce.com)

GCAF continued to maintain and update the program website to provide cohesive program information and resources for its three key audiences: motorists, stations, and the repair industry. The website welcomed 768,238 visitors* throughout the year, a 15 percent increase compared to 2022*.

**The full analytics for 2022 are not available for a full comparison.*

For motorist convenience, the website included:

- A. Vehicle inspection report (VIR) summary reprint functionality
- B. Online comment cards in both English and Spanish
- C. Foreign language assistance, including a translation option of program information into Spanish, Korean, Vietnamese, and Mandarin Chinese
- D. Link to an updated, online resource with diagnostic trouble codes (DTCs), warranty, recall and technical service bulletins (TSBs) information
- E. Testing tips, including how to prepare for a test, avoid a wait, the benefits of testing early, and email sign-up
- F. Waiver applications in electronic format for online submissions
- G. Testing station locations with a quick search via a zip code
- H. Rotating home page banners linking to key information

For station convenience, the website included:

- A. All applications in electronic format for online submissions, including station and inspector certification and recertification applications
- B. Inspector training manual and print-on-demand feature for station signage
- C. Key GAS message postings
- D. Fleet information
- E. Link to the inspector recertification training class video (posted via YouTube) to enable inspectors the convenience of observing at home, instead of in-person training
- F. Interactive practice test for current and prospective inspectors

For repair technician convenience, the website included:

- A. Link to an online training course for the recognized repair technician program
- B. Link to an updated, online resource with diagnostic trouble codes (DTCs), warranty, recall and technical service bulletins (TSBs) information
- C. Additional resources for technician assistance
- D. Promotion of new and existing recognized repair technicians

The live chat feature continued to offer immediate assistance for program inquiries.

Email Inquiries

Motorists had the opportunity to submit email inquiries via the GCAF website. Each inquiry received a response within three business days. The GCAF team responded to a total of 30,416 inquiries for the year 2023. There are four (4) different categories of inquiry: ecerts@cleanairforce.com with 13 inquiries, info@cleanairforce.com with 848 inquiries, industry@cleanairforce.com with 17,135 inquiries, and waivers@cleanairforce.com with 22,031 inquiries.

Annual Online Motorist Survey

This year marked the 16th year GCAF has conducted an online survey via the GCAF website. During the period of April through October, GCAF received 460+ surveys.

- A. 44.49% of respondents rated their emissions testing experience as “excellent” and 27.21% rated the experience as “good” to total a 72% positive rating (down 5% from 2022).
- B. “Cleaner air in metro Atlanta” was the highest rated benefit of testing at 56.36%.
- C. 61% of respondents supported the testing of vehicle emissions to reduce air pollution in metro Atlanta.
- D. Social media / advertising was the highest ranked resource for effectiveness.
- E. 56% positively rated program information on emissions testing to be helpful and accessible.

The survey was promoted via:

- A. Social media, including paid Facebook ads
- B. GCAF website (links were posted on the most visited web pages, in addition to a “take survey” button that was posted at the top of the website panel)
- C. E-marketing to motorists, stations and tag offices
- D. Flyers posted at GCAF Service Centers and training rooms, and promoted to stations for posting

The chart below illustrates the history of motorists' testing experience ratings from 2018 to 2023.

A full report of the survey responses was provided to EPD and can be found at EPD's office.

Collateral Material

IMPORTANT INFORMATION ABOUT YOUR VEHICLE'S
2023 EMISSIONS INSPECTION

- TEST EARLY:** Georgia's Clean Air Force (GCAF) recommends having your vehicle inspected four to six weeks prior to the registration renewal date every year (the vehicle owner's birthday).
- ONGOING MAINTENANCE:** Follow the recommended maintenance and tune-up schedule for your vehicle to allow for any needed repairs.
A properly maintained vehicle gets better gas mileage than a poorly maintained one. Furthermore, an improperly maintained vehicle may lead to a compromised emissions control system that is not effective in removing or reducing harmful air pollutants. This could result in a failed emissions test. Make sure your vehicle is ready and help keep Georgia's air clean.
- NEW VEHICLE EXEMPTIONS:** The three most recent model years are exempt each year. In 2023, all 2021 and newer model year vehicles are exempt from emissions testing.

WHICH VEHICLES NEED TO BE TESTED?

- In 2023, all 1999 - 2020 model year gasoline-powered cars and light-duty trucks (8,500 pounds gross vehicle weight rating or less) registered in Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding or Rockdale County must be inspected.
- 1999 - 2020 model year vehicles that are newly acquired or recently moved into the 13-county area must have proof of passing inspection within the last 12 months and must be registered within 30 days (seven days if purchased from a non-registered dealer).

POSSIBLE EXCEPTIONS

Senior Exemption: The vehicle owner must be 65 years old or older; the vehicle must be 10 model years old or older (2013 model year or older), and the vehicle must be driven less than 5,000 miles per year (the odometer must be functional in order to demonstrate the "under 5,000 miles/year" requirement). Seniors who have received an exemption in the past may be able to renew by phone at 1.800.449.2471.

Out-of-Area Extension: Available for vehicle owners who meet all requirements (the requirements can be found at CleanAirForce.com); vehicle must be tested upon return to the area. Vehicles can be tested well in advance if the driver will be out of the area at the time of registration.

Repair Waiver: Available if emissions-related repairs meet or exceed the Repair Waiver limit amount; other qualifications based on vehicle model year apply.

HOW MUCH WILL THE INSPECTION COST?

A test costs up to \$25; for more details please visit www.CleanAirForce.com. Stations must post the testing fee on their official GCAF sign.

All collateral that required annual updates were updated and posted online.

A. Question & Answer (Q&A) Brochure – English and Spanish

English Question and Answer (Q&A) brochures were distributed to all emission stations, service centers, EPD, and GCAF office personnel. The brochures provided information about the following: vehicle testing requirements; testing and buying tips; used vehicle sales information; failure and repair information; service center locations; and extension/exemption information. A Spanish version was available online.

B. Question & Answer (Q&A) Business Cards – English and Spanish

Business card size versions of the annual Q&A brochures were created in English and Spanish and provided to all stations. The business cards include a QR code which motorists could scan with their phones to view digital copies of the brochures.

C. Comment Cards

Each Q&A brochure included a perforated comment card for motorists to mail to GCAF and voice their opinions on the program. The comment cards included a rating system on inspectors, inspection stations, *Repair Watch*, collateral material, website, hotline, and service centers. The comment card is also available electronically on the GCAF website in English and Spanish. GCAF received six (6) comment cards total.

D. Registration Renewal Insert

Registered motorists in the program's 13-county area received a registration renewal via mail or via their county tag office. The inserts provided a general overview of the emission inspection process. GCAF translated the insert into Spanish, Vietnamese, Korean, and Mandarin Chinese, and posted online. See County Tag Office Outreach for additional information.

E. *Repair Watch*

Motorists can view the quarterly repair effectiveness report (*Repair Watch*) either at an emissions station or via GCAF's website. The report allows motorists to find a repair facility in their area by city and zip code. See the *Repair Watch* section under Industry Outreach for additional information.

F. *Repair Watch* E-News

GCAF's quarterly e-newsletter, *Repair Watch* E-News, was distributed to run in conjunction with the *Repair Watch* quarterly report. Two (2) versions were created, one targeting motorists/tag offices and one for stations/repair facilities. The newsletters provided information on testing tips and resources, preparing for an emissions test, repair advice, and general program statistics.

G. Motorists' Rights Poster

GCAF continued to offer Motorists' Rights posters to educate motorists on their rights during and after vehicle inspection. The poster included information on inspection procedures and cost, used vehicle sales, retests, referee tests, fraud, and more. A Spanish version is posted online.

H. Who Gets Tested When?

The annual "Who Gets Tested When?" flyer was created and posted on the website and at GCAF Service Centers, aiding motorists, and tag office staff with registration scenarios.

Community Outreach

GCAF's community outreach plan was designed to increase the reach of PI&CP resources, specifically the use of registration renewal inserts and additional collateral material. The following groups were targeted via media relations: Hispanic, Korean, Vietnamese, Mandarin Chinese, and senior citizens. Outreach to these groups included translation of certain items of collateral material, a translation option of program information into Spanish, Korean, Vietnamese, and Mandarin Chinese languages via the program website, and inclusion of targeted media outlets and organizations for PR campaign distribution.

Hispanic Outreach

GCAF translated the registration renewal insert, Buyer Beware flyer, Seller Beware flyer, and Q&A brochure and business cards into Spanish and posted them online. The Spanish versions were promoted to stations to alleviate communication issues. Social media marketing included the use of Spanish posts. Additionally, GCAF offers Spanish assistance via the toll-free hotline and an online comment card in Spanish.

Korean Outreach

GCAF translated the registration renewal insert into Korean and posted it online. The Korean version was promoted to stations to alleviate communication issues.

Vietnamese Outreach

GCAF translated the registration renewal insert into Vietnamese and posted it online. The Vietnamese version was promoted to stations to alleviate communication issues.

Mandarin Chinese Outreach

GCAF translated the registration renewal insert into Mandarin Chinese posted it online. The Mandarin Chinese version was promoted to stations to alleviate communication issues.

Senior Citizen Outreach

Messaging was incorporated into social media postings to target seniors.

GCAF continued the Waiver Information Line (option 4) to expedite senior registration renewals. GCAF continued dissemination of the Senior Exemption Application Requirements document for service center and tag office posting. GCAF promoted its collateral materials to senior motorists and organizations.

Non-Contract Deliverables

- A. GCAF used Google Analytics to track traffic to the GCAF website.
- B. The GCAF Call Center continued partnering with GCAF Service Centers to provide status updates on previously submitted applications, as well as assisting seniors who called in to renew their exemptions.
- C. The Waiver Information Line (option 6) remained available at the GCAF Call Center.

Industry Outreach

Georgia's Clean Air Force conducted industry outreach to active emissions inspection stations (both test only and test and repair) and prospective business owners.

Outreach goals included: educate emissions inspectors on testing procedures and program rules; ensure dissemination of accurate program information; provide high quality motorist assistance; and maintain an acceptable level of inspection stations to serve the metro Atlanta area.

Outreach Messages

- A. If a vehicle's battery was recently repaired or disconnected or if emissions-related repairs had recently been conducted, a vehicle should be driven for one to two weeks, including some highway driving, prior to having a retest.
- B. The RepairWatch program provides a marketing opportunity and exceptional assistance to consumers.
- C. Vehicles that are well-maintained throughout the year create less pollution and have a greater chance of passing the emissions inspection.
- D. Emissions testing is important for our health:
 - 1. Vehicle emissions led to the creation of ground-level ozone, which can aggravate asthma and other respiratory conditions.
 - 2. Emissions testing is helping to identify and clean up heavy polluting vehicles in the metro Atlanta area.
 - 3. Emissions testing is improving metro Atlanta's air quality.

Target Audiences

- A. Vehicle emissions station owners, managers, and inspectors within Georgia's Enhanced I/M program
- B. Industry Advisory Board (IAB) officers and meeting attendees
- C. Repair industry
- D. Used vehicle dealers
- E. Fleet managers

Industry Outreach Resources/Deliverables

Station Personnel Quick Guide To The Dashboard

A new resource, the Station Personnel Quick Guide To The Dashboard, was created and posted online.

Station Owner Presentation

The station owner training program is designed to assist all new station owners with opening their station(s). All current station owners are required to view the Station Owner Presentation in order to renew their station license.

The purpose of this presentation is to: inform station owners of the program requirements and their oversight responsibilities; expedite the station start-up process; assist station owners with identifying and reporting improper and/or fraudulent emissions testing; and educate station owners about ongoing maintenance and managerial functions within the analyzer software. The presentation is updated annually or as needed with any updates to program processes.

Industry Advisory Board (IAB)

GCAF participates in IAB meetings, if held, as a vital opportunity for communication between EPD, GCAF, and the emissions inspection and emissions repair industries and for program updates.

Repair *Watch* Program

The quarterly repair effectiveness reporting mechanism was continued, consisting of two (2) reports: the Facility Summary and the Public Report. The Facility Summary is the individual repair facility's report card, while the Public Report is a complete listing of all facilities that qualified for public use.

Repair facilities that completed 12 or more emissions-related repairs within the designated six-month reporting period, maintained an initial retest passage rate of 80 percent or better, and showed that the vehicles being reported received all recommended emissions-related repairs, qualified for listing in both reports. Stations were not included in the report if they were suspended or revoked at the time of printing.

Facility Summaries were posted on the GCAF Dashboard. The online availability enabled instant access to the summaries and the ability to print multiple copies at any time during the quarter. The Public Report was posted on the GCAF website and booklets were mailed to all testing stations. GCAF assisted stations with securing additional copies, upon request. Below is a summary of all reports:

Reporting Quarter	Collection Period	Expiration Date
Q1	July 1 – December 31	April 30
Q2	October 1 – March 31	July 31
Q3	January 1 – June 30	October 31
Q4	April 1 – September 30	January 31

Quarterly Repair *Watch* E-Newsletters were distributed to stations to communicate program updates and reminders.

GAS Messages

Program changes, announcements, and reminders were delivered throughout the year to the industry, via messages over GAS units and email. In 2023, 31 messages were sent to inspection stations, EPD, GCAF, service centers, call center staff, and IAB members. Pertinent GAS messages were posted to the GCAF website and dashboard, as necessary.

Call Center Assistance

The call center answered and resolved 3,767 inquiries from inspection stations. Additionally, a message center remained available after-hours and weekends for reporting of trouble issues. GCAF continued its training of station assistance representatives through the annual call center training presentation and email reminders/notices.

GCAF utilized Knowledge Base, an online information tree, to support call center representatives with technical inquiries.

Georgia's Clean Air Force Website (www.cleanairforce.com)

WELCOME STATION OWNERS AND INSPECTORS

This section is for you to learn about licensing, training, and certification exams; and find useful resources just for you.

We hope you find the information on this site helpful as you become a part of GCAF or continue your participation with the program.

The GCAF website was periodically updated with program information, including station contact details, Industry Advisory Board contacts and meeting schedule, inspector training information and schedule, posting of important GAS messages, and sign vendor listings. GCAF promoted the website to the industry as a reliable resource for program information.

Station Signage

To reinforce strong visual identity and message consistency, GCAF monitored station signage and assisted with sign inquiries. GCAF updated the sign vendor list, as needed, and posted it on the website.

Industry Database

GCAF utilized its database, compiled of vehicle emissions station operators in the 13-county metro Atlanta area, as a basis for all website and direct mail activities.

Used Vehicle Dealer Outreach

Outreach efforts to used vehicle dealers included three electronic fact sheets – one (1) targeting motorists ("Buyer Beware"), one (1) targeting sellers to outline their responsibilities ("Seller Beware"), and one (1) targeting dealers to outline their responsibilities ("Dealer Compliance"). The "Buyer Beware" and "Seller Beware" flyers were available in English and Spanish. The GCAF website offers a web page dedicated to providing information to dealers and motorists about the laws concerning used vehicle sales and the available Used Vehicle Sale Complaint Form.

GCAF promoted used vehicle sale information via the *Repair Watch* E-News e-newsletter and via paid print ads in *GIADA* magazine.

The tracking and database tool continued via the GCAF Dashboard for all used sales complaints, providing easy search and reporting functionality.

Non-Contract Deliverables

- A. The GCAF Call Center continued partnering with the GCAF Industry Administrative Department to provide stations and inspectors with general information regarding their license expiry date, insurance status, application status, etc.
- B. The Non-Compliant Sign Program continued, with updated sign updates and specifications distributed to stations.

Repair Industry Outreach

WELCOME REPAIR FACILITIES AND TECHNICIANS

We hope you find the information on this site helpful as you become a part of GCAF or continue your participation with the program.

For additional information, please contact the GCAF Customer Call Center at 1.800.449.2471, option #3 (Repair Facility Assistance)

To ensure the continued success of Georgia's Enhanced I/M Program, GCAF offers outreach materials for the repair industry to maintain and increase its technical knowledge. GCAF's repair industry outreach program included: information call center assistance; inclusion of a link to an online repair technician training; promotion of online training; technical service bulletin (TSBs) monitoring; and a repair database.

Call Center Assistance

The Call Center answered and resolved 1,555 inquiries from repair technicians and repair facilities in the metro Atlanta area. Additionally, a message center remained available after-hours and weekends for reporting of trouble issues. GCAF continued its training of repair assistance representatives through the annual call center training, monthly trainings, and email reminders/notices.

GCAF utilized Knowledge Base, an online information tree, to support call center representatives with technical inquiries.

Online Repair Technician Training

To increase the knowledge of repair technicians in the metro Atlanta area, the online training program continued with a link on the GCAF website to the dedicated training web page hosted by ASE. Technicians were required to take ASE's Automobile & Light Truck certification training (either A1 or A2 trainings: SAE A1 – Engine Repair or SAE A2 – Engine Performance) and receive a passing score.

Promotion of Online Training and Technicians

RECOGNIZED REPAIR TECHNICIANS

To assist motorists with selecting a qualified repair technician to assist with emissions-related repairs, Georgia's Clean Air Force (GCAF) promotes on-line training for technicians. This training enhances the service levels of the participating technicians with the ultimate goal of reducing unnecessary repairs and costs to consumers.

Repair technicians who have passed GCAF's training are listed below.

MIKE DEEN Express Oil Change and Service Center 625 Poplar/Tree Parkway Cumming, GA 30041 770.844.4843 www.expressoil.com	LEONARD BOONE Hickory Flat Highway Automotive 6182 Hickory Flat Highway Cumming, GA 30079 678.861.7295 www.hickoryflathighwayautomotive.com	JEREMY HERNALSTEEN Bushnell Tire and Auto Repair 3830 Roswell Road NE Atlanta, GA 30342 404.452.9505 www.bushnellrepair.com

GCAF promoted the online training via:

- A. The quarterly e-newsletter *Repair Watch* E-News
- B. Website microsite dedicated solely to repair technicians
- C. Call center IVR script announcement

DTC, Warranty, Recall, and TSB Information

To provide updated information on DTC, warranty, recall, and TSB information, GCAF provided online links to the [National Highway Traffic Safety Administration](#) and [OBD Clearinghouse](#). These resources enabled motorists and repair technicians to look up specific vehicle information and to assist with emissions-related repairs. Additionally, GCAF utilized the OBD Clearinghouse's vehicle search functionality.

Repair Effectiveness Rating

The monthly Repair Effectiveness Rating includes Initial After-Repairs tests where repairs were made before the retest was conducted. Aborts are not included in the rating. Below is a summary of all annual ratings:

Repair Effectiveness				
Test Type	Pass	Pass %	Fail	Fail %
OBD	142,929	82.6%	30,197	17.4%
TSI	10	90.9%	1	9.1%
Total	142,939	82.6%	30,198	17.4%

County Tag Office Outreach

As the initial and most utilized point of contact for program information, GCAF incorporated several outlets for communicating, training, and assisting the 13 metro Atlanta county tag offices regarding the I/M program.

Annual Training

GCAF updated its annual training presentation and handouts and distributed them to tag office contacts to provide pertinent updates and reminders. The handouts included program collateral, GCAF and EPD contact information, plus procedures for fraud.

Registration Renewal Insert

GCAF developed, printed, and distributed the annual registration renewal inserts. The inserts were updated with annual changes, including model year vehicles covered. Each tag office was supplied an ample number of inserts to use as handouts throughout the year. Additional inserts were provided upon request. GCAF partnered with Datamatx for distribution and storage.

Who Gets Tested When?

The 2023 "Who Gets Tested When?" flyer was posted on the GCAF website and distributed to tag office contacts to assist with general motorist inquiries. The document provided registration scenarios and how to properly address each.

Question and Answer Brochures

GCAF provided Q&A brochures and business cards upon request.

Foreign Language Collateral Assistance

GCAF promoted the availability of the registration renewal insert in Spanish, Korean, Vietnamese, and Mandarin Chinese to assist county tag offices to communicate with non-English speaking motorists. Use of the Q&A brochure, Q&A business cards, and Motorists' Rights poster in Spanish were also encouraged. GCAF promoted the website as an online portal for translated collateral materials, in addition to the translation option of program content into Spanish, Korean, Vietnamese, and Mandarin Chinese languages.

Tag Office E-marketing and Personnel Database

2023 Emissions Testing Updates and Reminders for Tag Office Staff

Email updates, including quarterly *Repair Watch* E-News e-newsletters, were distributed to tag office contacts regarding program updates and reminders. A database was maintained with email addresses of tax commissioners and office personnel. GCAF utilized an email marketing service to maintain the database of email addresses.

Point of Contact

GCAF served as the point of contact for tax commissioners and tag office staff and provided assistance regarding I/M-related inquiries.

Appendix A

Overall Initial Test and After-Repairs (Retest) Results by Test Type

Overall Initial Test and After-Repairs (Retest) Results by Test Type (eight tables) illustrates the overall inspection results by inspection type, initial and after-repairs (retest), test type, OBD and TSI, and vehicle class for inspections performed on passenger vehicles and trucks. Note: The Georgia inspection procedure allows inspectors the option to replace failing fuel caps before the conclusion of the inspection; hence there are two separate sections in the tables to account for this option.

The first four tables provide overall results for initial tests, while the latter four tables provide overall results for after-repairs tests (retests) performed after the vehicle was repaired. The data on all eight tables is presented in the same format as follows:

- Section A provides the model year of the vehicles tested. In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration.
- Section B: "Results for Vehicles as Presented for Inspection", displays the overall pass and fail statistics, number and percentage, and the sum of the pass and fail results.
Note: In this section, if the fuel cap replacement option was exercised during the initial inspection, it was counted as a fail result.
- Section C: "Fuel Cap Pass", takes into account vehicles that pass the initial test, plus those that pass the test after the fuel cap replacement option is exercised or the vehicle is tested again. $(\text{Pass} + \text{Replaced} + \text{Tested Again}) / (\text{Grand Total} - \text{Abort}) = \text{total for calculating the pass percentage.}$
- Section D: "Fuel Cap Fail", takes into account vehicles missing (who do not replace) the gas cap, combined with the fail results to arrive at the fail percentage. $(\text{Fail} + \text{Missing Not Replaced}) / (\text{Grand Total} - \text{Abort}) = \text{total for calculating the fail percentage.}$
- Section E provides the total for tests with an "Unknown" result.
- Section F provides the total for tests with a "Fuel Cap Not Tested" result.
- Section G provides the total for tests with an "Abort" result.
- Section H provides the "Grand Total" which represents the sum of either Sections C, D, E, F and G or the "Pass/Fail Total" from Sections B and Sections E and G.

The bottom row of each table summarizes the total number and overall percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

Appendix B

Test Results by Test Type

Test Results by Test Type (four tables) illustrates a side-by-side view of all initial and after-repairs (retest) results by test type, OBD and TSI, and vehicle class for inspections performed on passenger vehicles and trucks. Tables one and two display results for passenger vehicles and trucks, respectively, receiving an OBD test; and tables three and four display results for passenger vehicles and trucks, respectively, receiving a TSI test.

The first column on all tables - Section A - provides the "Model Year" of the vehicles tested. In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration.

The results for "Initial Tests" are presented in Section B of each table. Pass and fail statistics, number, and percentage, as well as the number of tests with and "Unknown" result are displayed. The "Total" in Section B is a sum of the pass and fail results combined.

The "After-Repairs Tests" (retest) results are presented in Section C of each table. Pass and fail statistics, number, and percentage, as well as the number of tests with and "Unknown" result are displayed. The "Total" in Section C is a sum of the pass, fail and unknown results combined.

Section D provides the "Grand Total" and represents the sum of pass and fail and test results for both initial and after-repairs inspections combined.

The bottom row of each table summarizes the total number and overall percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

Appendix C

Visual (Catalytic Converter) Results by Test Type

Visual (Catalytic Converter) Results by Test Type (four tables) illustrates both initial and after-repairs (retest) results for the visual inspection for presence of the catalytic converter. The results are presented by test type, OBD and TSI, and vehicle class for inspections performed on passenger vehicles and trucks. Tables one and two display the visual results for passenger vehicles and trucks, respectively, receiving an OBD test; and tables three and four display the visual results for passenger vehicles and trucks, respectively, receiving a TSI test.

The first column on all tables, Section A, provides the "Model Year" of the vehicles tested. In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration.

The results for "Initial Tests" are presented in Section B of each table. Pass and fail statistics, number, and percentage, as well as the number of tests with and "Unknown" result are displayed. The "Total" in Section B is a sum of the pass, fail and unknown results combined.

The "After-Repairs Tests" (retest) results are presented in Section C of each table. Pass and fail statistics, number, and percentage, as well as the number of tests with and "Unknown" result are displayed. The "Total" in Section C is a sum of the pass, fail and unknown results combined.

Section D provides the "Grand Total" and represents the sum of pass, fail and unknown test results for both initial and after-repairs inspections combined.

The bottom row of each table summarizes the total number and overall percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

Appendix D

Functional (Fuel Cap Test) Results by Test Type

Functional (Fuel Cap Test) Results by Test Type (eight tables) illustrates the initial and after-repairs functional (fuel cap test) results by test type, OBD and TSI, and vehicle class for inspections performed on passenger vehicles and trucks. Note: The Georgia inspection procedure allows inspectors the option to replace failing fuel caps before the conclusion of the inspection; hence there are two separate sections in the initial inspection table to account for this option.

The first four tables provide functional results for initial tests; while the latter four tables provide overall results for retests performed after the vehicle was repaired. The first column on all tables, Section A, provides the "Model Year" of the vehicles tested. In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration.

On all tables, the "Results for Vehicles as Presented for Inspection", Section B, displays the actual pass and fail statistics, number and percentage, and the sum of the pass and fail results. Note: In this section, if the fuel cap replacement option is exercised during the initial inspection, it is counted as a Fail result.

The first four tables (initial results) also contain a section for "Final Results Utilizing Fuel Cap Replacement Option", Section C, which takes into account test results when the fuel cap is replaced during the initial inspection, as well as results for vehicles tested again. Both the pass and fail statistics, number, and percentage, are displayed, however in this section, if the fuel cap replacement option is exercised during the initial inspection or the vehicle is tested again and passes, those results are combined with the fuel cap pass results, when calculating the pass percentage. $((\text{Pass} + \text{Replaced} + \text{Tested Again}) / (\text{Pass/Fail Total})) = \text{total for calculating the pass percentage.}$

Further, the results for vehicles missing (who do not replace) the gas cap are combined with the fail results to arrive at the fail percentage. $((\text{Fail} + \text{Missing Not Replaced}) / (\text{Pass/Fail Total})) = \text{total for calculating the fail percentage.}$

Tables one through four (initial results) also include Section D that represents the number of tests with an "Unknown" result; Section E for inspections where the "Fuel Cap Not Tested"; Section F for tests with an "Abort" result; and Section G for the "Grand Total" which represents the combined total of "Pass/Fail Total" from Sections B, Section D, and Section E.

Tables five through eight (after-repairs results) also include Section C that represents the number of tests with an "Unknown" result; Section D for tests with an "Abort" result; and Section E for the "Grand Total" which represents the combined total of the "Pass/Fail Total" of Section B, Section C, and Section D.

The bottom row of each table summarizes the total number and overall percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

Appendix E

OBD Malfunction Indicator Light (MIL) and Associated Diagnostic Trouble Codes (DTCs)

OBD Malfunction Indicator Light (MIL) and Associated Diagnostic Trouble Codes (DTCs) (two tables) presents MIL and DTC correlation results from both initial and after-repairs OBD tests performed on passenger vehicles (Table one) and trucks (Table two). Tests with an "Abort" or "Unknown" result were excluded. Note: These totals will not match Appendix B 100% due to after repair inspections that did not require the OBD portion to be retested.

The first column on both tables, Section A, provides the "Model Year" of the vehicles tested. In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration. Sections B through E present statistics demonstrating the correlation between the MIL being commanded on or not and the presence of DTCs. The appropriate heading represents each column for inspections occurring with the MIL commanded on and DTCs stored, MIL commanded on and no DTCs stored, MIL commanded off and no DTCs stored, and MIL commanded off and DTCs stored.

Sections B and C provide DTC results, number, and percentage, for when the MIL is commanded on, whereas Sections D and E provide results, number, and percentage, for when the MIL is not commanded on. Note: According to EPA guidance, if the MIL is not commanded on, the test system should not query for DTCs. The final Georgia software version follows this guidance.

The number of "Total OBD Tests" performed for each model year is presented in Section F. The total is the sum of each of the numbers producing results presented in Sections B, C, D and E.

The bottom row of each table summarizes the total number and overall percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

Appendix F

OBD Readiness and Associated Monitors

OBD Readiness and Associated Monitors (two tables) presents results from failed inspections due to readiness and associated monitors on both initial and after-repairs OBD tests performed on passenger vehicles (Table one) and trucks (Table two). Tests with an "Abort" or "Unknown" result were excluded.

Data is presented on both tables as follows:

- Section A provides the "Model Year" of the vehicles tested. In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration.
- Section B presents the OBD Readiness fail results, number, and percentage.
- Section C presents the number of monitors "not ready" for both passing and failing vehicles. The section is broken down to provide statistics for inspections where zero through six or more monitors are not ready. Note: Model years 1996 - 2000 are allowed to have up to and including two readiness monitors not set, without failing for OBD Readiness. Model years 2001 and newer are allowed to have only one readiness monitor not set. Exceptions outside this standard rule exist. Therefore, Section B includes vehicles that fall under the standard rule and exceptions.
- Section D represents the "Total OBD Tests" performed for each model year; it is the sum of the results provided in Section C. Note: These totals will not match Appendix B 100% due to after repair inspections that did not require the OBD portion to be retested.

The bottom row of each table summarizes the total number and overall percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

Appendix G

OBD and Functional (Fuel Cap Test) Results

OBD and Functional (Fuel Cap Test) Results (two tables) illustrates the fuel cap results for passenger vehicles (Table one) and trucks (Table two) that passed and failed the OBD inspections. This data includes results from both initial and after-repairs inspections but excludes tests with an "Abort" or "Unknown" result. Note: These totals will not match Appendix B 100% due to after repair inspections that did not require the OBD portion to be retested.

Data is presented on both tables as follows:

- Section A provides the "Model Year" of the vehicles tested. In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration.
- Section B presents fuel cap results for vehicles that pass the OBD test.
- Section C presents fuel cap results for vehicles that fail the OBD test.
- Section D represents the "Total OBD Tests" performed for each model year; it is the sum of the results provided in Sections B and C.

The fuel cap results presented in Sections B and C, number, and percentage, are as follows:

- Pass
- Fail
- Missing Not Replaced
- Replaced During the Inspection Process
- Tested Again and Passed
- Other (this includes null and previous pass results)

The bottom row of each table summarizes the total number and overall percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

Appendix H

First After-Repairs (Retest) Results by Test Type

First After-Repairs (Retest) Results by Test Type (10 tables) illustrates the first retest results for passenger vehicles and trucks by test type, OBD and TSI.

- Tables one through four provide results using the overall test results by test type. Within each test type, the results are presented by vehicle class, with passenger vehicles presented first, followed by trucks.
- Tables five and six provide visual (catalytic converter) overall results for first retests performed on passenger vehicles and trucks, respectively, receiving an OBD or TSI test.
- Tables seven and eight provide functional (fuel cap test) overall results for first retests performed passenger vehicles and trucks, respectively, receiving an OBD or TSI test.
- Tables nine and 10 provide overall results for first retests performed on passenger vehicles and trucks, respectively, receiving an OBD or TSI test.

Data is presented on all tables as follows:

- Section A provides the "Model Year" of the vehicles tested. In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration.
- Section B presents pass and fail results, number, and percentage.
- Section C presents the "Pass/Fail Total".
- Section D provides the number of tests that received an "Unknown" result.
- Section E provides the "Grand Total" which is the sum of the results provided in Sections C and D.

The bottom row of each table illustrates and summarizes the total number and percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

Appendix I

Second/Subsequent After-Repairs Test Results by Test Type

Second/Subsequent After-Repairs Test Results by Test Type (10 tables) illustrates the second or subsequent retest results for passenger vehicles and trucks by test type, OBD and TSI.

- Tables one through four provide results using the overall test results by test type. Within each test type, the results are presented by vehicle class, with passenger vehicles presented first, followed by trucks. Note: No second/subsequent after-repairs results were found for TSI tests for tables three and four.
- Tables five and six provide visual (catalytic converter) overall results for retests performed on passenger vehicles and trucks, respectively, receiving an OBD or TSI test.
- Tables seven and eight provide functional (fuel cap test) overall results for retests performed on passenger vehicles and trucks, respectively, receiving an OBD or TSI test.
- Tables nine and 10 provide overall results for retests performed on passenger vehicles and trucks, respectively, receiving an OBD or TSI test.

Data is presented on all tables as follows:

- Section A provides the "Model Year" of the vehicles tested. In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration.
- Section B presents pass and fail results, number, and percentage.
- Section C presents the "Pass/Fail Total".
- Section D provides the number of tests that received an "Unknown" result.
- Section E provides the "Grand Total" which is the sum of the results provided in Sections C and D.

The bottom row of each table illustrates and summarizes the total number and percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

Appendix J

Vehicles with Initial Fail Result that Receive Repair Waiver

Vehicles with Initial Fail Result that Receive a Repair Waiver (one table) illustrates by model year and vehicle class, passenger vehicles and trucks, the statistics for repair waivers that were both "Approved" (number and percentage) and "Declined" (number only). The percentage approved is achieved by taking the number of "Approved" repair waivers for passenger vehicles and trucks and dividing it by the total number of passenger vehicles and trucks, respectively, with an initial fail result.

The first column, Section A, provides the "Model Year" of the vehicles tested.

The results of repair waivers that were processed for failing passenger vehicles are presented in Section B. Approved and declined statistics, number, and percentage, as well as the number of failed initial tests on passenger vehicles are displayed.

The results of repair waivers that were processed for failing trucks are presented in Section C. Approved and declined statistics, number, and percentage, as well as the number of failed initial tests on trucks are displayed.

The number of failing initial inspections will not match Appendix A. Appendix A includes all inspections and Appendix J only includes inspections with unique VINs to refrain from counting an inspection more than once.

Section D provides the "Total Vehicles" that received an initial fail result. This is the sum of the passenger vehicles (first column of Section B) and trucks (first column of Section C) that received an initial fail result.

Section E provides the total number of repair waivers that were approved and declined and the overall approved percentage.

The bottom row of each table summarizes the total number and overall percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

It should be noted that the number of repair waivers shown in Appendix J does not always equal the number of repair waivers shown in Appendix K. Due to VIN mismatches, there are a few occasions where a repair waiver cannot be connected to an initial inspection; only those repair waivers that can be tied to an initial inspection are accounted for in Appendix J. Appendix K is an accurate accounting of all Repair Waivers processed.

Appendix K

Summary of Waivers Processed & Referee Tests Performed

Summary of Waivers Processed & Referee Tests Performed (three tables) illustrates the summary of all waivers issued and referee tests observed. The first two tables provide information on waivers process, while the third table provides information about referee tests.

Summary of Waivers Processed (two tables) provides the summary of all waivers, extensions, and exemptions (collectively referred to as "waivers") processed during the reporting period.

The first table displays information on waivers, extensions and exemptions "Approved" during the reporting period; the second page of the report displays information on waivers, extensions and exemptions "Denied" during the reporting period.

The first column on both tables provides the "Model Year" of the vehicles for which the waivers were processed. The second column represents the "Grand Total" of waivers processed during the reporting period; it is the sum total of all waivers presented in the remaining columns of the tables.

The bottom row of each table summarizes the total number of each column accordingly.

Referee Tests Performed (one table) illustrates, by model year, the number of referee tests performed during the reporting period and the results of each.

The first column on the table provides the "Model Year" of the vehicles for which the referee tests were performed. The second column represents the "Total" number of referee tests performed during the reporting period. The remaining columns display the actual pass and fail results in both number and percentage. The number of referee tests shown in the table only includes pass and fail test results. Aborted tests are not included.

The bottom row of the table illustrates and summarizes the total number and percentage of each column accordingly.

Note: All percentages are rounded to one decimal place. As a result, not all percentage columns may total to exactly 100%.

It should be noted that the number of repair waivers shown in Appendix K does not always equal the number of repair waivers shown in Appendix J. Due to VIN mismatches, there are a few occasions where a repair waiver cannot be connected to an initial inspection; only those repair waivers that can be tied to an initial inspection are accounted for in Appendix J. Appendix K is an accurate accounting of all Repair Waivers.

Appendix L

Audit Activity

Audit Activity (one table) provides a breakdown on the number of overt, covert, EPD, and quality assurance audits performed by type on a monthly basis. The report is presented in cumulative format for the calendar year.

The bottom row of the table summarizes the total number of each column accordingly.

Appendix M

Covert Audits Conducted by Inducement and Test Type

Covert Audits Conducted by Inducement and Test Type (one table) illustrates the number of covert audits performed by inducement and test type, OBD and TSI.

The last column represents the "Total" number of covert audits conducted by inducement type. The types of inducements include:

- Emission False Pass
- Functional False Pass
- Visual False Pass
- No False Pass
- OBD Bulb Check False Pass
- OBD MIL Command/Codes
- OBD Readiness False Pass
- OBD Non-Communication

The bottom row of the table summarizes the total number of each column accordingly.

Appendix N

Covert Audits Conducted Resulting in a False Pass by Test Type

Covert Audits Conducted Resulting in a False Pass by Test Type (one table) illustrates the number of covert audits performed that resulted in a false pass. The information is presented by test type, OBD and TSI.

The last column represents the "Total" number of covert audits resulting in a by false pass by inducement type. The types of false pass inducements include:

- Emission False Pass
- Functional False Pass
- Visual False Pass
- No False Pass
- OBD Bulb Check False Pass
- OBD MIL Command/Codes
- OBD Readiness False Pass
- OBD Non-Communication

The bottom row of the table summarizes the total number of each column accordingly.

Appendix O

Inspection Station Information by Test Type

Inspection Station Information by Test Type (three major sections) presents station information, initial test and fail results by model year and test type, OBD and TSI.

The station information provided includes:

- Station ID
- Name
- Address
- City
- Zip
- County
- Technician Count (number of inspectors, which includes only those inspectors that actually performed emissions tests for the station during the reporting period)

For each station, by test type, the "Total" number of initial tests performed and the fail results, both number and percentage, are provided by model year.

The bottom of each table illustrates the summary for the particular station detailing the total number and overall percentage of each individual column.

Appendix P

Vehicle Outcome by Test Type and Vehicle Class

Vehicle Outcome by Test Type and Vehicle Class (two base tables, with four supporting tables for a total of six tables) is provided to analyze the fleet emissions impact of vehicles for which there is no know final outcome (no final pass ("NFP")). NFP vehicles are those that receive one or more failed emissions tests, but never meet the I/M program requirements by ultimately passing the emissions test or receiving a waiver. In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration.

For this analysis, each vehicle tested in 2023 will be presented by test type: TSI and OBD, then vehicle class: passenger vehicle or truck, and ultimately assigned to one of four categories described below, based on its sequence of inspection results:

- Pass/Pass (P/P): These vehicles pass their emissions inspection, thereby completing their inspection sequence, on the first attempt.
- Fail/Pass (F/P): These vehicles fail their initial emissions inspection, and then report for one or more subsequent inspections (presumably following repairs) until they ultimately achieve a passing result, thereby completing their inspection sequence.
- Fail/Waiver (F/W): These vehicles fail their initial emissions inspection, and then report for one or more subsequent inspections (presumably following repairs), however they are not able to achieve a passing result. Ultimately, they meet the repair requirements and are issued a waiver, thereby completing their inspection sequence.
- Fail/Fail (F/F): These vehicles fail their initial emissions inspection and any subsequent retests. Therefore, these vehicles never complete their inspection sequence by either passing the emissions inspection or receiving a waiver.

These categories provide for the comparison of emissions results from the initial versus subsequent emissions inspections (ultimately the emissions reductions) of vehicles as they proceed through the I/M program. Percentages for each sequence are included.

For vehicles that received a TSI emissions test, the average initial and final emissions levels were calculated for each of the four categories of test sequences. This provides for the comparison of initial and final emissions levels among the categories which, when considered in the context of the number of vehicles in each category, gives the relative impact on fleet-wide emissions for each category. Results are presented as the measured TSI emissions concentrations. The tables below present details of those results as follows:

- Table P.3 - Average TSI 2500 HC Emissions
- Table P.4 - Average TSI 2500 CO Emissions
- Table P.5 - Average TSI Idle HC Emissions
- Table P.6 - Average TSI Idle CO Emissions

Note: Unlike in all other appendices where rounding is to one decimal place, because gas concentrations are reported in small numbers, the percentages reported in tables are rounded to two decimal places.

Appendix Q

Most Common Repairs and Associated Emissions Benefit

Most Common Repairs and Associated Emissions Benefit (six tables) is an analysis designed to identify and report the most common repairs performed on vehicles in the I/M program. Further the analysis provides the emissions levels and emissions changes (initial failing emissions compared to final passing emissions results) associated with the repairs.

In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration. For vehicles receiving a TSI test, the initial inspection, final inspection, and change in emissions concentrations were calculated for each of the most common "repair slates" (explained below). For OBD tests, the repair slates were linked to Diagnostic Trouble Codes (DTCs) present at the initial inspection and not present at the final inspection.

When a vehicle receives a retest, following an initial fail result and presumably after being repaired, the inspection technician may enter information about any repairs that were done by entering "Y" or "N" in each of the 10 fields representing different general areas of repair. Herein, we grouped all repairs between an initial failed inspection and a final passed inspection into a single "repair slate" for that inspection cycle. A repair slate consists of 10 characters, each character representing one of the 10 different types of repairs that might be entered. If a given repair was performed in an inspection cycle, the repair slate position for that repair was set to "Y". Otherwise, the repair slate position for that repair was set as "N".

Types of Repairs

The first table lists the 10 types of repairs and the repair slate position of each. As an example, a vehicle that received a repair to the EGR system, repair slate position five, would have a repair slate of "NNN.NYN.NNNN", with the "Y" being in the fifth out of the 10 positions.

It should be noted these 10 repair types each cover a fairly broad range of repairs. Consequently, this can prevent a very precise relationship between the repair type and emissions inspection result from being developed. For example, an "EXH" repair might involve a repair to the catalyst from which we expect a large emissions benefit, or a repair to the gasoline fill pipe from which we expect no emissions benefit.

Most Common Repair Slates

The most common repair slates for vehicles receiving each type of inspection (TSI and OBD) are presented in the second table. The top set of repair slates was slightly different for each of the inspection types; since each inspection tests the vehicle somewhat differently, we expect that different types of repairs result. The table also provides the total number of vehicles that received repairs. The number of vehicles inspected one time and not required to return for a retest is also provided. Finally, the total number of vehicles tested is presented; this is the sum of the vehicles repaired vehicles and the single-inspection, non-repaired vehicles.

Analysis for Vehicle Receiving a TSI Test

For TSI vehicles, the average emissions concentrations at the initial and final inspections were calculated for each of the most common repair slates. The following is a description of the results presented in the third and fourth tables, all presented by vehicle class, passenger vehicles and trucks:

- Change in TSI2500 HC emissions following most common repairs
- Change in TSI2500 CO emissions following most common repairs

Analysis for Vehicles Receiving an OBD Test

The approach for the analysis of repairs to vehicles that received an OBD inspection (rather than a tailpipe emissions test) is different than that for the TSI tested vehicles. For OBD vehicles, a failed inspection results from one or more Diagnostic Trouble Codes (DTCs) being set. The DTCs provide information about what type of problem(s) the vehicle has that may need repairs. Generally, when a vehicle passes an OBD inspection, no DTCs will be set. Therefore, the DTCs set when the vehicle is initially tested and no longer set at the time of retest, are compared to the repairs performed.

Since there are far too many possible combinations to create a "DTC slate" analogous to the repair slates, repairs were correlated with DTCs on an individual basis (rather than as slates) for the OBD repair analysis.

The fifth and sixth table in Appendix Q is titled "Repair to OBD Vehicles and Associated DTCs". The nine common repair types are listed horizontally across the top. Vertically, each row of the table represents one DTC. Both the DTC Code (P-Code) and DTC description are provided. The values presented in the table represent the number of times a DTC that was set during the initial inspection was no longer set upon retest during the same inspection cycle, presumably as a result of the repair designated.

Appendix XYZ

Additional Analysis for Georgia's 2023 I/M Program Annual Operation Report

Appendix XYZ provides the details from Appendices P and Q as a means to evaluate the effectiveness of the Georgia I/M Program at repairing high-emitting vehicles, thereby reducing fleet-wide mass emissions. In addition to the tables of data provided is a description of how the data is prepared and evaluated, followed by the conclusions drawn.

Additional Analysis for Georgia's 2023 I/M Program Annual Operation Report

1 Introduction

The Georgia Environmental Protection Division (EPD) prepares an annual Operations Report for the Georgia Enhanced Vehicle Inspection and Maintenance (I/M) Program, which contains detailed statistics covering a wide range of metrics. In this report, we will present several analyses of the 2023¹ I/M Program data. The goal of these additional analyses is to provide additional information about the effectiveness of the Georgia I/M Program at repairing high-emitting vehicles and reducing fleet-wide mass emissions.

The analyses include two (2) primary investigations. The first is to examine the fleet emissions impact of vehicles for which there is no known final outcome (no final pass ("NFP")). NFP vehicles are those that receive one (1) or more failed emissions tests, but never meet the I/M program requirements by ultimately passing the emissions test or receiving a waiver.

The second is to identify and examine the most common repairs performed on vehicles in the I/M program. Further, the analysis provides the emissions levels and emissions changes (initial failing emissions compared to final passing emissions results) associated with the repairs. For vehicles receiving a TSI test, the initial inspection, final inspection, and change in emissions concentrations were calculated for each of the most common "repair slates" (explained below). For OBD tests, the repair slates were linked to Diagnostic Trouble Codes (DTCs) present at the initial inspection and not present at the final inspection.

¹ In 2023, model years subject to inspections were 1999 to 2020. Any model year vehicle outside of that range could have been inspected for one of the following reasons: at motorist's request or for late registration.

Additional Analysis for Georgia's 2023 I/M Program Annual Operation Report

2 Preparation and Quality Control of Raw Data

Vehicle inspection records collected in Georgia from January 2023 through December 2023 were used for this study. That process is described below.

- A. For the year 2023 records, Georgia's covert audit dataset was merged into the inspection results dataset however, these covert audit records were removed for the purposes of this analysis.
- B. Vehicles that were missing information in key variables were removed. This includes any vehicles missing their VIN, vehicle type, test cycle (OBD or TSI), model year, test date or overall test result.
- C. Georgia's waivers dataset was merged by VIN to the inspection results dataset, so that vehicles that received a waiver could be identified. The only waivers that pertain to this analysis were those following a failed inspection(s) and repair. Student, military and other waivers for untested vehicles were not used.
- D. Inspections with an "Abort" result were ignored. These were identified as those with a result of "A" in their overall emissions, overall OBD or overall test result, or with a non-zero, non-null abort code.
- E. Result for vehicles that received more than one (1) type of emissions inspection (i.e., a vehicle's initial inspection was a TSI test, followed by a retest that was an OBD test) were ignored because to make the comparison of initial and final inspection results would be too difficult.
- F. Only one (1) record for each vehicle was considered in the calendar year. Each test sequence is started with an initial inspection and continues until that vehicle passes an inspection or receives a waiver.
- G. Test sequences have been identified, and the initial and final outcomes in those test sequences can be used to categorize each as an initial pass (P/P), initial fail/ultimate pass (F/P), initial fail/ultimate waiver (F/W), or initial fail/ultimate fail (no waiver or passing inspection found in the dataset) (F/F).

Additional Analysis for Georgia's 2023 I/M Program Annual Operation Report

3 Vehicle Outcome by Test Type and Vehicle Class

The objective of this analysis ultimately is to investigate the fleet emissions impact of vehicles for which there is no known final outcome (no final pass ("NFP")). NFP vehicles are those that receive one (1) or more failed emissions tests, but never meet the I/M program requirements by ultimately passing the emissions test or receiving a waiver. For this analysis, each vehicle tested in 2023 will be presented by test type: TSI and OBD, then vehicle class: passenger vehicle or truck, and ultimately assigned to one (1) of four (4) categories described below, based on its sequence of inspection results:

- A. Pass/Pass (P/P): These vehicles pass their emissions inspection, thereby completing their inspection sequence, on the first attempt.
- B. Fail/Pass (F/P): These vehicles fail their initial emissions inspection, and then report for one or more subsequent inspections (presumably following repairs) until they ultimately achieve a passing result, thereby completing their inspection sequence.
- C. Fail/Waiver (F/W): These vehicles fail their initial emissions inspection, and then report for one or more subsequent inspections (presumably following repairs), however they are not able to achieve a passing result. Ultimately, they meet the repair requirements and are issued a waiver, thereby completing their inspection sequence.
- D. Fail/Fail (F/F): These vehicles fail their initial emissions inspection and any subsequent retests. Therefore, these vehicles never complete their inspection sequence by either passing the emissions inspection or receiving a waiver.

These categories provide for the comparison of emissions results from the initial versus subsequent emissions inspections (ultimately the emissions reductions) of vehicles as they proceed through the I/M program. Vehicles that meet the I/M program requirements with an expected sequence of P/P, F/P or F/W may be compared to vehicles that fail to meet the requirements (F/F).

The number of vehicles in each category is presented by "Model Year" and "Vehicle Class" - passenger vehicles or trucks. Tables 3.1 and 3.2 present the information based on vehicle test type: TSI and OBD respectively.

For vehicles that received a TSI emissions test, the average initial and final emissions levels were calculated for each of the four (4) categories of test sequences. This provides for the comparison of initial and final emissions levels among the categories - which, when considered in the context of the number of vehicles in each category, gives the relative impact on fleet-wide emissions for each category. Results are presented as the measured TSI emissions concentrations. The tables below present details of those results as follows:

- A. Table 3.3 - Average TSI 2500 HC Emissions
- B. Table 3.4 - Average TSI 2500 CO Emissions
- C. Table 3.5 - Average TSI Idle HC Emissions
- D. Table 3.6 - Average TSI Idle CO Emissions

Some trends were observed in tables 3.3 through 3.6. First, the final (passing) emissions results of vehicles that failed, and then passed (F/P) were nearly as low as the emissions of the vehicles that initially passed (P/P). This indicates that for the F/P vehicles, the correct repairs were performed properly, bringing the vehicles up to par with the P/P vehicles.

Also observed were the emissions levels of the F/F vehicles did not change from initial to final inspection. This was most likely in part because the initial inspection was the final inspection because no repairs were performed.

Finally, in viewing all the tables, we observed while overall there was a small number of vehicles with no known outcome or NFP (designated as F/F). Those vehicles had a much higher "mean" emissions than vehicles that completed the inspection cycle by achieving a passing inspection result.

Note: Because gas concentrations are reported in small numbers, the percentages reported in tables 3.4 and 3.6 are rounded to two (2) decimal places.

4 Most Common Repairs and Associated Emissions Benefit

The objective of this analysis is to identify and examine the most common repairs performed on vehicles in the I/M program. Further the analysis provides the emissions levels and emissions changes (initial failing emissions compared to final passing emissions results) associated with the repairs.

For vehicles receiving a TSI test, the initial inspection, final inspection, and change in emissions concentrations were calculated for each of the most common "repair slates" (explained below). For OBD tests, the repair slates were linked to Diagnostic Trouble Codes (DTCs) present at the initial inspection and not present at the final inspection.

When a vehicle receives a retest, following an initial fail result and presumably after being repaired, the inspection technician may enter information about any repairs that were done by entering "Y" or "N" in each of the 10 fields representing different general areas of repair. Herein, we grouped all repairs between an initial failed inspection and a final passed inspection into a single "repair slate" for that inspection cycle. A repair slate consists of 10 characters, each character representing one of the 10 different types of repairs that might be entered. If a given repair was performed in an inspection cycle, the repair slate position for that repair was set to "Y". Otherwise, the repair slate position for that repair was set as "N".

Types of Repairs

The first table lists the 10 types of repairs and the repair slate position of each. As an example, a vehicle that received a repair to the EGR system - repair slate position five (5) - would have a repair slate of "NNN.NYN.NNNN", with the "Y" being in the fifth out of the 10 positions.

It should be noted these 10 repair types each cover a fairly broad range of repairs.

Consequently, this can prevent a very precise relationship between the repair type and emissions inspection result from being developed. For example, an "EXH" repair might involve a repair to the catalyst from which we expect a large emissions benefit, or a repair to the gasoline fill pipe from which we expect no emissions benefit.

State of Georgia

Additional Analysis for Georgia's 2023 I/M Program Annual Operation Report

4.1 Types of Repairs

Repair Slate Position	Repair Type	Abbreviation
1 (YNN.NNN.NNNN)	Ignition System	IGN_SYSTEM
2 (NYN.NNN.NNNN)	Intake/Fuel Induction System	I_F_INDUCT
3 (NNY.NNN.NNNN)	Engine Diagnostics	ENG_DIAG
4 (NNN.YNN.NNNN)	Evaporative System/Fuel Cap	FUEL_EVAP
5 (NNN.NYN.NNNN)	EGR System	EGR
6 (NNN.NNY.NNNN)	Sensors and Switches	SENS_SWITCH
7 (NNN.NNN.YNNN)	Exhaust System/Catalyst/Fill Pipe	EXH
8 (NNN.NNN.NYNN)	Air Injection System/Air Pump	AIR_INJ
9 (NNN.NNN.NNYN)	Internal Engine Repairs	ENG_REPAIRS
10 (NNN.NNN.NNNY)	Other Related Repair	OTH_REPAIRS

Most Common Repair Slates

The most common repair slates for vehicles receiving each type of inspection (OBD and TSI) are presented in the second table. The top set of repair slates was slightly different for each of the inspection types; since each inspection tests the vehicle somewhat differently, we expect that different types of repairs result. For example, EGR repairs were common for OBD vehicles, but since the TSI inspection does not test for NOx, EGR repairs were zero (0). The table also provides total number of vehicles that received repairs. The number of vehicles inspected one time and not required to return for a retest is also provided. Finally, the total number of vehicles tested is presented; this is the sum of the vehicles repaired vehicles and the single-inspection, non-repaired vehicles.

It can be seen from Table 4.2 that substantially more repair data were available for OBD vehicles than for TSI vehicles. For OBD vehicles, 6.3 percent of vehicles received repairs.

Analysis for Vehicles Receiving an OBD Test

The approach for the analysis of repairs to vehicles that received an OBD inspection (rather than a tailpipe emissions test) is different than that for the TSI tested vehicles. For OBD vehicles, a failed inspection results from one (1) or more Diagnostic Trouble Codes (DTCs) being set. The DTCs provide information about what type of problem(s) the vehicle has, that may need repairs. Generally, when a vehicle passes an OBD inspection, no DTCs will be set. Therefore, the DTCs set when the vehicle is initially tested and no longer set at the time of retest, are compared to the repairs performed.

Since there are far too many possible combinations to create a "DTC slate" analogous to the repair slates, repairs were correlated with DTCs on an individual basis (rather than as slates) for the OBD repair analysis.

Table 4.5 entitled "Repair to OBD Vehicles and Associated DTCs". Nine (9) common repair types are listed horizontally across the top. Vertically, each row of the table represents one DTC. Both the DTC Code (P-Code) and DTC description are provided. The values presented in the table represent the number of times a DTC that was set during the initial inspection, was no longer set upon retest during the same inspection cycle, presumably as a result of the repair designated. Note: Rows with DTCs that relate to similar components or problems are grouped together in the table.

Some consistent trends can be observed. For example, evaporative system DTCs were most often turned off after Fuel/Evap repairs; and EGR DTCs were most often turned off by EGR repairs.
