Lab Qualifiers

U = Non-Detect

W = Non-Detect

J = Result is less than the reporting limit but greater than or equal to the method detection limit and the concentration is an approximate value.

H = Sample was prepped or analyzed beyond the specified holding time

p = The relative percent difference between the primary and confirmation analysis is >40%. The lower value has been reported.

B = Compound was found in the blank and the sample.

* = Lab control sample or laboratory control sample duplicate detected outside acceptable limits.

RS = Resample.

E = Result exceeded instrument calibration range.

F1 = Matrix spike and/or matrix spike duplicate recovery is outside acceptance limits.

F2 = Matrix Spike/Matrix Spike Duplicate Relative Percent Difference exceeds control limits.

HF = Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request.

Note-Due to the age of some of this data, some lab flag definitions are unknown.
