Re: Paragraph 19 of Attachment A to the October 28, 2019 Consent Order

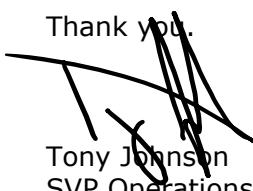

Dear Ms. Hays:

Paragraph 19 provides, in pertinent part that BD "shall commence operation of [a] fugitive emissions control system at the BD Madison facility no later than June 30, 2020."

BD completed the construction to install a "dry bed" fugitive emissions control system at the BD Madison facility on June 28, 2020, and began operations on June 30, 2020. Performance testing was also conducted and completed on June 30, 2020. The system is now being operated in a commissioning mode to fully integrate it into Madison's processes and to address any technical issues. Going forward, it is BD's intention to operate the emissions control system 24/7, during normal operations, subject to necessary adjustments to optimize the system and/or maintain worker safety.

Please let us know if you have any questions.

Thank you.
