Re: Pre-Design Investigation Report – July 15, 2015
Manchester Tank Company, HSI No. 10765
811 West Avenue
Cedartown, Polk County, Georgia
Tax Parcel 024-014

Dear Mr. Schiff:

The Georgia Environmental Protection Division (EPD) has reviewed the above referenced document which has been submitted for the former Manchester Tank Company site. Subsequent to our meeting on September 23, 2015, EPD offers the following comment relating to the referenced document.

1. For the proposed treatment systems shown in Figure 5-2, please ensure that representative influent and effluent sampling demonstrate that hazardous air pollutants (HAPs) meet the emission discharge projections outlined in Section 5.1.2.

The work completed as part of the pre-design investigation and proposed groundwater treatment system designs appears to be well documented and substantiated. EPD commends these efforts and looks forward to the installation of the containment systems and the subsequent startup period as this corrective action work continues to move forward.

Please continue to submit Semi-Annual VRP Progress Reports as described in the VRP. EPD anticipates receipt of the next Semi-Annual VRP Progress Report by December 2, 2015. EPD understands that the draft Consent Order will be finalized once access issues are resolved for the site.

If you have any questions, please contact Robin Futch PG, PMP of the Response and Remediation Program at (404) 657-8686.

Sincerely,

Jason Metzger
Acting Program Manager
Response and Remediation Program
