**Re: August 2016 VRP Progress Report  
TLC Cleaners  
2060 Lower Roswell Road  
Marietta, GA 30068**

Dear Mr. Hayes:

This letter serves as the August 2016 Voluntary Remediation Program Progress Report. EPS is submitting this report on behalf of IPTV-B-C14, LLC for the above referenced site. A Compliance Status Report (CSR) was submitted in November 2015. As requested by the Georgia Environmental Protection Division (EPD), additional soil gas and indoor air sampling was conducted in December 2015 and January 2016 and was documented in the February 2016 CSR Addendum. In a letter dated May 9, 2016, the EPD requested additional soil gas and indoor air sampling and requested that the data be submitted to EPD by July 30, 2016.

As discussed, EPS planned to collect the samples in June 2016; however, for the few days before the planned sampling event, the sub-slab depressurization system was shut down occasionally by contractors working to convert the former dry cleaner to a florist shop. In order to obtain samples representative of air quality during normal operation of the florist shop (*i.e.*, continuous operation of the depressurization system), EPS installed a telemetry system to verify continuous operation of the depressurization system prior to collecting the samples. On July 19 and 20, 2016, soil gas and indoor air samples were collected. EPS is currently evaluating the data in regards to the sub-slab depressurization system. This data and our evaluation will be presented to the EPD in or before the next Progress Report (January 2017).

If you have any questions, please call.

Sincerely,

Justin Vickery  
Associate
