Subject: VRP Semi-Annual Progress Report #4
Proposed Chamblee Apartments,
5211 Peachtree Industrial Boulevard
Tax Parcel 18-299-13-005
Wood Project No. 6121-16-0351

Dear Mr. DuBose:

Wood Environment and Infrastructure Solutions, Inc. (Wood, formerly Amec Foster Wheeler Environment & Infrastructure, Inc.) respectfully submits this Semi-Annual Progress Report #4 on behalf of the James F. Hickman, Jr. Trust. This progress report is required by the Voluntary Remediation Program (VRP) statute and requested by the Georgia Environmental Protection Division (EPD) in its VRP acceptance letter dated September 9, 2016.

PROJECT SUMMARY

The Proposed Chamblee Apartments property (Site) is an approximate 3.86-acre parcel addressed at 5211 Peachtree Industrial Boulevard in Chamblee, DeKalb County, Georgia. The Site is identified on the DeKalb County Tax Assessor’s website as 18-299-13-005. Historically, the Site was developed with a trucking company and a filling station beginning in the late 1950s, then various automobile dealerships from 1978 through 2016. Refer to Figures 1.

Soil and groundwater assessments conducted between 2005 and 2016 indicated impacts to soil and groundwater. As a result, a VRP Application for the Site was submitted to the EPD on July 28, 2016. The Site was accepted into the VRP as indicated in a letter from the EPD dated September 9, 2016.

SLX GRAND Atlanta, LLC has initiated redevelopment of the Site with a five-story 240-unit multifamily apartment building and an associated parking structure.

The initial VRP Semi-Annual Progress Report dated March 9, 2017 documented installation of an additional monitoring well on the property and the results of laboratory testing of a groundwater sample obtained from the new well along with groundwater samples obtained from three existing monitoring wells on the property. The report also included the results of hydraulic conductivity testing conducted at the Site along with the results of contaminant fate and transport modeling. EPD issued a review letter dated July 19, 2017 with no comments.

VRP Semi-Annual Progress Report #2, dated September 8, 2017 documented the Site condition at the time of the report. The report indicated that the sales and attached service building had been
demolished, the secondary service building remained intact at the south corner of the Site, and no
ground-disturbing activities had yet occurred. EPD issued a review letter dated September 26, 2017
with no comments.

VRP Semi-Annual Progress Report #3, dated March 29, 2018 documented the Site condition at the
time of the report. The report indicated that construction had begun on the property and that the
secondary service building had been demolished. The report indicated that the automobile lifts
which were present in the building were found to be pneumatic lifts rather than hydraulic lifts and
that no subsurface tanks or piping containing hydraulic fluid were present. As such, no soil testing
was warranted. Progress Report #3 also documented the assessment and remediation of a
mechanic’s pit encountered near the northeast corner of the property and delineation and
remediation of petroleum-impacted soils at the boring SB-6 area, also in the northeast corner of the
Site. Refer to Figure 3 for conditions in March 2018.

**ACTIONS TAKEN SINCE LAST SUBMITTAL**

No new environmental testing or remediation activities have been performed at the subject Site
since the submittal of Semi-Annual Progress Report #3. No suspect conditions were reported by
Whiting-Turner, the on-site general contractor.

**ROUTINE INSPECTION**

Mr. Chuck Ferry of Wood performed a drive-by to observe construction progress at the Site on
August 14, 2018 and Mr. Steve Davenport of Wood visited the Site on September 7, 2018 to conduct
a routine inspection. At the time of the Site visit, construction of the two buildings in the northern
two-thirds of the Site was well underway. Excavations for footings for a retaining wall were in
progress along the southern property boundary. Photos of recent Site conditions are attached.

**CLOSING**

This report is for the exclusive use of SLX GRAND Atlanta, LLC and for regulatory submittal. If
additional information is required, please contact Mr. Chuck Ferry at (404) 817-0107 or by email at
chuck.ferry@woodplc.com.

Sincerely,

Wood Environment & Infrastructure Solutions, Inc.

Steve Davenport

GROUNDWATER SCIENTIST STATEMENT
GROUNDWATER SCIENTIST STATEMENT

I certify that I am a qualified groundwater scientist or engineer who has received a baccalaureate or postgraduate degree in the natural sciences or engineering and have sufficient training and experience in groundwater hydrology and related fields, as demonstrated by state registration and completion of accredited university courses, that enable me to make sound professional judgments regarding groundwater monitoring and contaminant fate and transport. I further certify that this report was prepared in conjunction with others working under my direction.

Mr. Charles T. Ferry, P.E.
Georgia Registration No. 10957
