

NOTICE OF THE OPPORTUNITY FOR PUBLIC COMMENT

GEORGIA DEPARTMENT OF NATURAL RESOURCES ENVIRONMENTAL PROTECTION DIVISION AIR PROTECTION BRANCH

STATE OF GEORGIA
COUNTIES OF FULTON and CLAYTON
NOTICE OF NAA-NSR PRELIMINARY DETERMINATION AND DRAFT PART 70
OPERATING PERMIT MODIFICATION

To All Interested Parties:

The Georgia Environmental Protection Division (EPD) announces its intent to modify Part 70 Air Quality Operating Permit No. 4512-063-0105-V-03-0 issued to Delta Air Lines, Inc. Technical Operations Center by the issuance of Nonattainment Area New Source Review (NAA-NSR) Permit Amendment No. 4512-063-0105-V-03-2. The facility is located at 1775 Aviation Boulevard, Atlanta, Georgia. The facility services airplanes.

The primary purpose of this permit amendment is to allow physical modifications to construct and operate Engine Test Cell No. 5 (SHEA ID No. 5898) in addition to supporting equipment. The Georgia Environmental Protection Division is preparing Title V Operating Permits in accordance with Title V of the Clean Air Act. This permit amendment will be enforceable by the Georgia EPD, the U.S. Environmental Protection Agency (EPA), and other persons as otherwise authorized by law.

The draft permit, NAA-NSR Preliminary Determination, and all information used to develop the draft permit are available for review. This includes the application and all other relevant materials available to the permitting authority. This information is available for review at the office of the Air Protection Branch, 4244 International Parkway, Atlanta Tradeport - Suite 120, Atlanta, Georgia 30354. Electronic files of the application, draft Title V permit, NAA-NSR Preliminary Determination will be available through our internet site <http://epd.georgia.gov/air/psd112gnaa-nsrpcp-permits-database>. (Please note that the Internet is generally accessible from most public libraries in Georgia.)

If copies are desired, a copying machine for public use is provided by EPD at the Atlanta Air Protection Branch office. There will be a copying charge of \$0.10 per page. Copies will be made on a first-come, first-served basis. Files are available for review and copying 8:30 a.m. to 4:00 p.m., Monday - Friday, excluding holidays.

You are hereby notified of the opportunity to submit written public comments concerning the draft Part 70 Operating Permit Modification and the Preliminary Determination concerning the modification. The Preliminary Determination is a summary of the technical review of the application and contains a copy of the Company's application along with supporting documents and the draft Permit Amendment. The draft permit serves as both a draft NAA-NSR permit and a draft Part 70 permit amendment. Persons wishing to comment on the draft Part 70 Operating Permit Modification are required to submit their comments, in writing, to EPD at the above Atlanta Air Protection Branch address or via email to epdcomments@dnr.ga.gov (emails must contain the facility name and "air permit" in the subject line). Comments must be received by the EPD no later than 30 days after the date on which this notice is published in the newspaper. (Should the comment period end on a weekend or holiday, comments will be accepted up until

the next working day.) The Division, in making its final decision to issue the Part 70 permit, will consider all comments received on or prior to that date.

The Division has concluded that Delta Air Lines, Inc. Technical Operations Center's application should be approved and that a permit should be granted. This conclusion is based upon evidence that the proposed project will comply with the Division's Rules and Regulations for Air Quality Control, Chapter 391-3-1; and will comply with the Federal NAA-NSR regulations, 40 CFR 51.165, including the use of Lowest Achievable Emission Rate (LAER) for regulated pollutants.

Net emission increases of particulate matter, volatile organic compounds, sulfur dioxides, carbon monoxide from the proposed project do not exceed the significant emission levels established by the PSD regulation. The net emission increases of nitrogen oxides from the proposed project exceed the significant emission levels established by the NAA-NSR regulation. The Division has determined that these emissions will not cause an adverse impact on ambient air quality, and the air quality levels should pose no significant health risk around the facility.

Any requests for a public hearing must be made in writing within the 30-day public comment period. Such requests should specify in detail the portion of the Air Quality Control Rules which the individual believes may not have been adequately reviewed. A public hearing may be held if the Director of the EPD finds that such a hearing would assist the EPD in a proper review of the facility's capability to comply with the requirements of Federal and State Air Quality Control regulations. State laws specify that a permit shall be issued on evidence satisfactory to the Director of compliance with applicable State and Federal regulations and requirements.

Following the 30 day public comment period, as required by NAA-NSR and Part 70 regulations, a proposed amendment, incorporating any changes that result from comments received during the public comment period, will be made available to U.S. EPA and affected states. In accordance with Part 70 regulations, EPA Region 4 has a 45-day period in which to review this proposed permit amendment. Information pertaining to U.S. EPA's review period can be found on their website at <http://www.epa.gov/caa-permitting/georgia-proposed-title-v-permits>.

After the comment period has expired, the EPD will consider all comments, make any necessary changes, and issue the Part 70 Operating Permit and a Final Determination. Copies of the final Title V Operating Permit, Final Determination, comments received, EPD's responses to comments, and any other relevant information will then be made available for public review during normal business hours at the office of the Air Protection Branch, as well as at the Internet addresses given above.

For additional information, contact Eric Cornwell, Program Manager, Stationary Source Permitting Program, at the Atlanta address, or by phone at 404/363-7000. Please refer to this notice when requesting information.
