Description and Location of Proposed Activity:

This project will install sidewalks, add curb and gutters, and improve grass shoulders for drainage. Buffer intrusions are related to adding permanent pervious fill for sidewalk construction and will be mitigated with native riparian seed mix. The proposed project will result in approximately 160 linear feet (2,653 square feet) of buffer disturbance lasting approximately 2-3 months. The site effects an unnamed tributary to Butler Creek in the Etowah Watershed (03150104).
