Description and Location of Proposed Activity:

This project will construct a warehouse distribution center. The design was created to minimize disturbance as well as prevent downstream impacts to the extent practicable. An on-site wet detention basin, an underground detention basin, and a proprietary water quality treatment device will control stormwater and protect water quality. Mitigation credits will also be purchased. The proposed project will result in approximately 1,450 total linear feet (71,422 total square feet) of buffer disturbance lasting approximately 1 year located at Annewakee Creek, in the Chattahoochee Watershed.
