Mr. David Brownlee
Acting Unit Director
Hazardous Site Response Program
Environmental Protection Division
2 Martin Luther King Jr. Drive, Suite 1462
Atlanta, GA 30334

Subject: **Second Semiannual Progress Report of the Voluntary Remediation Program
Atlanta Gas Light Company
Former Manufactured Gas Plant Site
Rome, Georgia
HSI #10109
AECOM Project #60159358**

Dear Mr. Brownlee,

As part of the Conditional Approval of the Application for the Voluntary Remediation Program (VRP) for the Rome manufactured gas plant (MGP) site (the Site) provided by the Georgia Environmental Protection Division (EPD) in a letter dated January 19, 2012, AECOM, on behalf of Atlanta Gas Light Company (AGLC), has prepared this correspondence to document the Site activities that have occurred since the last Semiannual Progress Report submittal. This is the second semiannual progress report that is required as part of the VRP program for the Site.

In addition, a summary of the results of a river survey monitoring event conducted will be submitted under separate cover. This event indicated that no scouring had occurred. A schedule for the frequency and duration of the long-term river monitoring program will be included in this submittal.

Finally, AGLC is in receipt of a letter from the EPD dated January 11, 2013 that provided comments on the response to comments that AGLC submitted as part of the First Semiannual Progress Report on the VRP Application in regards to the proposed revisions to the VRP Application and the monitoring plan. AGLC is currently reviewing these comments and will prepare a response or request a meeting to discuss these comments or resolutions to these comments. Please contact Greg Corbett at (404) 584-3719 or me at (212) 798-8582 or e-mail me at christie.battenhouse@aecom.com with any immediate questions or comments on this submittal.

Sincerely,

Christie J. Battenhouse, P.G.
Senior Project Manager
