

SUBJECT: Small Quantity Generator Re-Notification Required Starting in 2021

Dear Small Business Owner/Operator:

Are you a small quantity generator (SQG) of hazardous waste (i.e., a generator of between 100 and 1,000 kg (220 and 2,200 lbs) of non-acute hazardous waste per month)?

SQGs in Georgia are now required to **re-notify every four years**. To remain in compliance with the re-notification requirement, you need to update your notification by completing and submitting the Notification of RCRA Subtitle C Activities (Site Identification Form), also known as EPA Form 8700-12. The first re-notification is due by

September 1, 2021

SQGs are being asked to submit the re-notification electronically via MyRCRAid by logging into RCRAInfo and requesting MyRCRAid permissions for your site (if you have not already registered). You can log into or register for RCRAInfo at

<https://rcrainfo.epa.gov/rcrainfoprod/>

Then, you should create a New Submission and select the option to provide a subsequent notification. The form will be pre-populated with the most recent information for your site in RCRAInfo. Please review the information in each box for accuracy and update as necessary before submitting.

Note: An SQG that submits an accurate and complete re-notification within the four years before an SQG re-notification deadline would be considered in compliance with this provision.

Note: SQGs submitting Site ID forms in the four years prior to 2021 for another purpose, such as notifying as a healthcare facility under the 2019 Hazardous Waste Pharmaceuticals final rule (84 FR 5816), satisfy the re-notification requirement under § 262.18(d).

For more information, please contact one of the following at the Hazardous Waste Management Program, Georgia EPD, Land Protection Branch:

Linda.Weglewski@dnr.ga.gov

Annise.Jones@dnr.ga.gov

Jeffrey.Bankhead@dnr.ga.gov

Additional information regarding hazardous waste generation and applicable regulations can be found at www.epa.gov/hwgenerators.

The next re-notification will be due **September 1, 2025**. Generators should also re-notify whenever there is a change to the site contact, ownership, or type of RCRA Subtitle C hazardous waste activity conducted.
