RE: Consent Order No. EPD-AQC-7007
Sterilization Services of Georgia

Dear Mr. Welch:

On January 7, 2020, Consent Order No. EPD-AQC-7007 was executed with Sterilization Services of Georgia for violations of conditions of Air Quality Permit No. 3841-121-0010-S-03-0. The Order required the Company to pay a monetary settlement, complete installation and operation of dry bed reactors to control back vent emissions, conduct a performance test for those controls, and provide test data to the Division that verifies the controls are reducing back vent ethylene oxide emissions by at least 99%. The Division has received the required settlement payment. In addition, the dry bed reactors were installed and results from testing conducted March 11-12, 2020, indicate compliance with the Permit requirements.

Based on the information received by the Division, the Consent Order has been terminated by the full and complete performance of each condition. If you have any questions concerning this issue, please feel free to contact Sherry Waldron at 404-362-4569 or sherry.waldron@dnr.ga.gov. Thank you for your cooperation in this matter.

Sincerely,

Sean Taylor
