Coosa River GAR031501050209	Beach Creek to Stateline Floyd	Coosa Stream	FC removed based on 2012-2016 data from RV_14_4622: FC 0/20 gm - FC criteria met for the designated use of Fishing. E. coli was put in Category 3 for the designated use Recreation. There are currently no E. coli data available for evaluation. The water has previously been assessed as impaired for CFB (commercial fishing ban) and FCG(PCBs). The commercial fishing ban is in place due to historical PCB contamination in the area which has led to elevated levels of PCBs in fish tissue. The TMDL for CFB was done for PCBs in fish tissue. The cause CFB is being removed to prevent redundancy since CFB and FCG(PCBs) refer to the same pollutant. In addition, CFB is not an allowable cause value in the EPA National Database (ATTAINS). The expected TMDL date for temperature was changed from 2018 to 2023.

Alcovy River GAR030701030803	Wrights Creek to Bear Creek/Jackson Lake Newton	Ocmulgee Stream	FC was removed from the Fishing Use as 2012-2016 data from RV_04_888 shows the criteria is being met: FC 1/20 gm. FC was removed from the Recreational Use because the bacterial indicator for the Recreational Use was changed from FC to E. coli in the last Triennial review. No E. coli data are available at this time to assess the recreational use, so the water is being put in Category 2 until E. coli data are available. Waters are put in Category 2 when one use is being met, but there is insufficient information to assess the other uses(s).
Bay Gall Creek GAR030701040116	Pond 500 feet upstream Carl Vinson Pkwy to Sandy Run Creek Houston	Ocmulgee Stream	New Category 3 water for DO based on 2015 data from RV_05_2281. EPD needs to determine the "natural DO" for the water before determining if the DO criteria are being met.

Gladesville Creek GAR030701031307	Headwaters to Little Falling Creek Jasper	Ocmulgee Stream	DO is being placed in Category 3. Low DO values were observed, but were likely caused by the presence of a beaver dam upstream of the sampling location. Low DO due to the presence of a beaver dam would be considered to be a natural condition. EPD needs to determine that there is not another cause of the low DO before making a final assessment.
High Falls Lake GAR030701031118	Entire Lake except area around dam pool Butts, Lamar, Monroe	Ocmulgee Lake	High Falls Lake (GAR030701031115) was split into two sections in 2018. Savannah River GAR030601030409	Lake Hartwell to Cedar Creek Hart	Savannah Stream	In the past we mistakenly labeled this water as having a use of Recreation. According to the Rules and Regulations for Water Quality Control, this water has a designated use of Fishing, so the water is only being assessed for the Fishing use.
Savannah River/Front River GAR030601090320	Ebenezer Creek to SR 25 Effingham, Chatham	Savannah Stream	This reach was created by splitting GAR030601090309 (Savannah River - Ebenezer Creek to Tide Gate) at SR 25. This change was made because the coverage for this section of the River overlapped with the coverage for the Savannah Harbor that starts at SR 25. The coverage for the Savannah Harbor is remaining the same, so the coverage for the River was changed to stop at SR 25. "Front River" was also added to the water name as the last portion of the reach is actually called "Front River" on NHD. Also, added FC and moved water from Category 1 to Category 5 based on 2012-2016 data from RV_01_120.
