

Compliance Status Report
Description of Potential Environmental Receptors 391-3-19-.06(3)(b)4.

Description:

The EPA's 40 CFR 68.3 defines the term *environmental receptor* as "natural areas such as national or state parks, forests, or monuments; officially designated wildlife sanctuaries, preserves, refuges, or areas; and Federal wilderness areas". This section of the CSR should discuss all nearby environmental receptors as well as *human receptors* such as nearby drinking water wells, springs and other surface water exposure points, potential surface soil exposure, and indoor air.
