* Shellfishing Ban (SB) is listed as an impairment for waters where shellfish should not be harvested/eaten due to concerns about pollutant contamination. It is important to note that public and commercial shellfishing in coastal waters is only permissible in designated "Approved Harvest Areas" throughout the coastal region. Shellfish growing area waters are monitored regularly to ensure that these areas remain in compliance with the FDA fecal coliform thresholds. All other waters of the state are classified as "Prohibited", and are closed to the taking of shellfish. Georgia's Coastal Resources Division maintains a maps of approved public shellfishing areas which can be found at the following website: <https://coastalgadnr.org/approvedrecharvestareas>.
